Nature is arraying herself in beautiful colors, and the milliners and dress makers are doing the best they can under the circumstances.

Another new democratic party, made up of samples, is to be inaugurated in New York city on June 7. It will be known as the "Liberal Democracy." and its liberality consists in a recognition of all the democratic sms of the last five years, with room left for all without attachments.

It is not Tillman this time but another equally vehement anti-imperialist duct. senator who is in trouble in Washington. Senator Money of (Mississippi refused to pay his fare on a street car, and after fruitless persuasion and due warning the conductor fired Money off the car. The senator drew his jack knife and slashed at the conductor, making sundry wounds, and the conductor planted his fist on Money's mouth. If the Mississippi senator values his dignity and his beauty at more than 5 cents he was a loser by the

Our Waynesville correspondent makes fitting reference to the unjust restrictions placed on citizenship in this state by the requirement that before a citizen can vote he must have been a resident of the state two years. Article VI of the constitution of North Carolina provides that a naturalized citizen twenty-one years old "who shall have resided in the state twelve months vote shall be deemed an elector". This is changed by the amendment to read "in the state of North Carolina two years, in the county six months." There was no just and legitimate reason for partisan considerations, on the understanding that the greatest number of the new residents of the state are republicans. Had Asheville held a May election this year, as it had in preceding years, citizens who have been residents of the state for one year, would have voted at that election and found themselves disfranchised in the November election by this clause in the constitutional amendment that had become effective on July 1.

CHARGES AGAINST JUDGE CLARK

THE

TITE HAVE no doubt Judge Walter Clark will answer the charges made against him by Major James W. Wilson. The incident, however, is chiefly interesting as illustrating present conditions in the democratic party in this state. Were the party united and harmonious and blessed with upright leadership Clark would have escaped this assault, either because if guilty of the charges he would not have been so important a personage in the present political campaign as to have drawn upon him this publication by a fellow democrat, or if there was doubt of his guilt that portion of the democratic press that now rejoices in the opportunity to assail him would have come to his defense. As it is now Clark is the candidate of one faction of the democratic party. By the other faction he is hated, chiefly because of his factional connections. There is plenty to be said against Clark as a politicien. We believe him to be an unscrupulous partisan, and in other ways not flitted for the position he now holds. But we mark the source of the present attack on him and note the vivid light it casts on the present distressful position of the democratic party in North Carolina. Judge Walter Clark is the only democratic representative on the bench of the Supreme court of this state. By the syndicate of politicians that now controls democratic politics in North Carolina he is slated for the democratic candidacy for the chief justiceship at the coming election. The charges now made against him by a prominent democrat, and supported by certain newspapers that have in the past trained with the party may force the machine to revise the slate and put forward its second choice. How much the charges will effect Judge Clark beyond his candidacy depends upon the proof Wilson can furnish of his allegations of misconduct on the bench. If these allegations are proved they can be followed by nothing less than the impeachment of Judge Clark.

ARE OUR SOLDIERS "BRU-

TAL?" TITE ARE having plenty of talk from our "anti-imperialist" friends in congress on the "brutality of the American soldiers" in the Philippines, based on the charges that are now being tried by court martial against officers for subjecting Filipinos to the "water cure treatent". Senator Beveridge, who is acquainted with affairs in the Philippines from observations there, in his Indianapolis speech Wednesday touched in a general way on the wholesale charges made by those who use that method of disparaging the whole policy of our government in the Philippines.

"Do they tell us of the brutality of American soldiers? War has no record of mercy, tenderness and care that compares with the American treatment of prisoners in the Philippines. Generals Otis, Hughes, and McArthur have testified to the care and kindness of American officers and men to Filipino prisoners. They are cared for even as our own. I have seen wards of our own hospitals turned over to Filipino sick and wounded. American physicians attend them, American nurses minister to them. We are told of reconcentration camps. And what are

Read the story of American reconcentration in Marinduque. The Filipinos there were fed with food bought by American money. When those who terrorized them had been killed or captured, Filipino physicians signed voluntary statements that 'the people's health within those American lines was fifty per cent. better than it had been in their own homes. And those people departed to their field, at last made peaceful, with rejoicings on their lips that they had finally been rescued from their own oppressors, and with blessings on the American flag and the American soldiers who had worked that deliver-

Tarantulas are now bred in Australia for their webs, the filiaments of which are made into thread for balloons. Each tarantula yields from twenty to forty yards of filiaments, of which eight twisted together form a single thread of sufficient stoutness, and it is much lighter than silk. In the new ones that are floating around the opinion of Prof. Burt of Cornell university, the silk spider of South Carolina a relative of the tarantula, could be successfully bred for its s ilk pro-

A friend of working girls advised them to learn a poem as they went to and from their work instead of simply reading street car advertisements. A verse, a line of poetry, a single, noble thought every day-who of us could not make time for this, if we would? And how rich a harvest one next preceeding the election, and ninety ty that is eating the gladness from our days? > The South is in a position in every way to gain by high prices for meats, for its opportunities for raising stock are cheaper than in other sections, and the months when grazing is impossible for stock is less than half compared to northern sections. Stock feeding costs little in the South, when the cheapness of cultivating feed is considered.-New Bern Journal.

THAT POLL TAX MATTER

It is usually held that one of the qualifications of good citizenship, is to be prompt and honest in the payment of taxes. But this year, judging from the newspapers published in this state, there must be a lack of such citizens .-New Bern Journal.

Despite the frequent warnings to the white voters of Rowan county over 500 white men who are liable to a poll ax have not yet paid this tax. Only six days are left in which the votes of those who have not paid can be saved. An earnest effort has been made to induce all the white men of the county to make immediate settlement with sheriff and if the tax is not paid no one will be responsible but the voter himself .-Salisbury Sun.

LAST EVENING'S DANCE A DECIDED SUCCESS

The dance given at the Battery Park last evening was but a repetition of the successful and enjoyable ones of the past given under the same management. Although the guests were somewhat late in arriving, the evening's festivities were none the less satisfactory, for every guest present was . dancing and entered fully into the enjoyment of the evening at the very beginning.

Although stags were much in evibringing two and three of the gentler for perjury.
