Some of those present even went so far as to declare that so far as it went it was equal to many state fairs. Cattle and other live stock and the agricultural products of the estate were the main features. Potatoes, grown near Mr. Vanderbilt's lodge on Mount Pisgah, nearly 5000 feet above sea-level, were present, as also, were Mr. and Mrs. Vanderbilt. CATANIA IS SHOWERED WITH VOLCANIC ASHES

Catania, Sicily, Sept. 18.—A north wind is blowing today and a greater quantity of ashes, cinders and stones is being carried in the direction of this city, although the eruption of Mount Etna is not increasing in volume. Prof. Ponte, the volcanologist, says more lava has been thrown out in the six days than during twenty-six days of the disturbance a year ago. Although the eruption of Mount Etna seems to be losing something of its activity and the earthquakes are less frequent in occurrence, the immense flood of lava which has spread down the mountain continues its work of destruction. There are now five main streams stretching for miles over the country. Mr. Ricco, director of the observatory, who has spent two days on the top of Mount Etna to make observations, returned to the observatory. He said the initial speed of the lava at the mouth of the crater has slightly diminished but that incandescent material is still being poured out in perhaps as great quantity as on the first few days. Several cones have formed near the new craters, varying from 65 to 100 feet in height. A new mountain, 500 feet high, has sprung up, which is emitting smoke and cinders.

He Makes Money in Trucking.

Catawba County News.
From 75 square rods of ground James McRee this year has sold \$205 worth of tomatoes, his family has preserved nine dozen gallons; the table has been liberally supplied and there are still some left on the vines. His boys sold \$65 worth of cantaloupes from less than half an acre and he has sold no end of watermelons of which he kept no record. He had a load of nice ones here yesterday. Other truck was also sold. And in addition to this trucking he has 12 acres of cotton, the best corn crop he has had in years, made 200 bushels of oats and 260 of wheat. There isn't a thrifter farmer in the county, and what he has done, not only this year but in other years, in the trucking line, is an object lesson. There is money in truck in this section, and any general farmer can carry truck patches along with other work and never notice that he is doing any extra labor. Mr. McRee says that he would have done about as much work anyway as he did with his patches, and there is the clean, extra cash for it.
