Asheville Can Secure Two or Three Woodworking Plants, Says S. M. Smith.

**MOUNT MITCHELL ROAD
EQUIPMENT IS BOUGHT**

Mr. Smith and Associate Have Secured Murchison Timber Tract.

S. Montgomery Smith, who has during the past few months made several large timber deals in the Mt. Mitchell section, is of the opinion that Asheville can secure two or three woodworking plants in the near future if the proper steps are taken and enough encouragement is given the promoters. According to Mr. Smith, a saw mill and a stove factory are to be built in this section at once in connection with the development of the timber lands of the Mt. Mitchell territory.

Mr. Smith not long ago sold to Dickey & Campbell an 8000-acre tract on the slopes of Mt. Mitchell and they are now making arrangements to build a standard gauge railroad from a point near Black Mountain to Mt. Mitchell; in fact, the grading has already begun and orders have been placed for the rolling stock, 20 cars and an engine. The track laying is to be started as soon as the Southern railway puts down a switch at the southern terminus of the new road. Work has also begun on the mill site of the Dickey & Campbell company, where the course of a small stream is being changed to give more room. The Mountain Retreat association has given them a right of way for the road over its property at Montreat. The grading work will be increased as fast as the camps can be constructed.

Mr. Smith stated that specifications have been made for the Dickey & Campbell mill equipment and that four manufacturing firms are bidding to furnish it. The mill is to be of the double band saw and re-saw type, with a capacity of 100,000 feet per day of ten hours.

The road will pass through about two miles of the hardwood tract which Mr. Smith recently sold to the Scott-Lambert Lumber company and for the development of this tract a mill is to be erected of 50,000 feet daily capacity. This is one of the plants which Mr. Smith thinks might be located at Asheville. This could be done, as the road is to be standard gauge, making it possible to bring the logs on to Asheville in the cars of the private road. If it is not built here it will be located near the spruce mill of Dickey & Campbell, near Black Mountain.

A very large stove manufacturing concern is now corresponding with Mr. Smith with reference to establishing a stove plant in easy access to hardwoods, and this, too, Mr. Smith thinks, might as well be located here with the hardwood saw mill. The plant can use much of the hardwood timber which could not be cut into merchantable lumber.

In connection of the Black Mountain spruce tract, which was sold to Dickey & Campbell, Mr. Smith and his associates have just acquired the well known Murchison tract of hardwood timber near Mt. Mitchell, and also the Big Ivy tract both comprising about 22,000 acres. The Murchison tract, especially, is considered very valuable in this part of the state, much of the acreage being virgin.

**HASN'T BOUGHT A HOUSE
IN THE PAST 24 HOURS**

Mr. Lynch Comparatively Quiet, Having Bought Only a New Automobile.

B. A. Lynch, familiarly known as Diamond and always dynamic, has not acquired any more real estate during the past 24 hours. The news value of an item lies chiefly in its unusual character—hence this announcement.

Ordinarily, when Mr. Lynch lets a day go by without taking over a house or two, or does not interest himself in some other form of realty, the circumstance may be attributed to the failure of some man to keep his engagement, or some like untoward event. Mr. Lynch did, however, purchase another automobile—he already had a high priced Stevens—the new car being a steamer, direct from the White company. The purchasers of the car concluded they could not use it at this time and naming a bargain price, Mr. Lynch bought it. He expects to sell the car.

FAMILY POISONED

Authorities to Investigate the Strange Death of Three Persons at Tampa.

Tampa, Fla., Nov. 12.—Three persons, comprising an entire family, were found dead in their home here yesterday, death evidently resulting from poison. The dead: H. K. Collier, Helen M. Brown, sister of Collier, Agnes Collier, aged nine, Collier's daughter.

The face of each victim was distorted when found by a delivery boy. The body of the man was on a back porch, that of the woman on the kitchen floor, while the child was in the hallway. The theory of toxicology is advanced, but authorities believe it a case of acute poisoning.

CITE STEEL WITNESSES

Operations of Corporation's Railways in Superior Ore Region to Be Inquired Into.

Washington, Nov. 12.—Summons has been sent to officials of the Duluth & Iron Mountain railroad and the Duluth, Mesaba & Northern railway, the lines in the Lake Superior ore region owned by the steel trust, to appear before the United States Steel corporation, which resumes hearings next Monday.

Representative Stanley, chairman of the committee, announces that the inquiry for some time will be directed into the transportation charges for the shipment of ore, which it is contended are exorbitant and greatly to the disadvantage of independent shippers. It is contended that the steel corporation has a monopoly of the transportation facilities into the Superior region, and that while it pays the same high rates charged to independents, the shipping receipts go back into the corporation coffers. The investigation probably will continue until the holidays. Andrew Carnegie and probably J. Pierpont Morgan will testify before the hearings are concluded.

"I am pleased to recommend Chamberlain's Cough Remedy as the best thing I know of and safest remedy for coughs, colds and bronchial trouble," writes Mrs. L. B. Arnold of Denver, Colo. "We have used it repeatedly and it has never failed to give relief." For sale by all druggists.

The Famous Rayo Lamp

The best part of the day is the evening, when the whole family is gathered together around the lamp.

The old days of the smoky fireplace and flickering candle are gone forever. In their place have come the convenient oil stove and the indispensable Rayo Lamp.

There are to-day, in the United States alone, more than 3,000,000 of these Rayo lamps, giving their clear, white light to more than 3,000,000 homes.

Other lamps cost more, but you cannot get a better light than the low-priced Rayo gives. It has become so popular we say almost call it "the official lamp of the American family."

The Rayo is made of solid brass, with handsome nickel finish—no painted surfaces. Ask your dealer for a Rayo lamp or write for descriptive circular to our nearest Standard Oil Company.

**In Asheville
Churches**

NOTE—Pastors and church officers are requested to send in copy of changes in announcements by 4 p.m. Friday.

Central Methodist church, Rev. C. W. Byrd, D. D., pastor.—Sunday school 9:30 a. m.; preaching at 11 a. m. and 7:30 p. m., by the pastor.

All are cordially welcome to the services and to the reading room.

Always something new at Theatros.

**FIGHT ON PINE BEETLE
IS TO BE ORGANIZED**

Special to The Gazette-News.

Charlotte, Nov. 12.—A movement of great importance to this entire section of country, which has been inaugurated by the United States government, to get rid of the pine beetle, is now being taken up by the Greater Charlotte club and the North Carolina Forestry association.

A great meeting is to be held in Charlotte November 24, to get concerted action in this vital work of saving the pine trees now being destroyed with such rapidity by this pest.

At this meeting such men as Dr. A. D. Hopkins, who is in charge of the forest insect investigation of the United States bureau of entomology; J. S. Holmes, secretary of the North Carolina Forestry association, and other men versed in scientific treatment of this destructive little insect, will be present to advise the best course to pursue.

So rapid is the process of destruction that the situation has become alarming and there is need of immediate action. If something is not done at once there is danger of the old field pine forests of North and South Carolina being entirely destroyed in a few years and our main supply of pine for the future thus cut off.

Every man who owns an acre of land on which old field pine is growing should attend the meeting in Charlotte and learn how to get rid of the destructive pine beetle.
