Apple Company Expects Give Old Trees a Shaking up-Harmless, It Is Said.

J. C. Tebbetts, who helped to organize the North Carolina Apple and Live Stock company, which is to plant large orchards in Surry county, stated this morning that his company is going to experiment with the use of ex-plosives in destroying the insects and borers in fruit trees. On the 2000 acres of land which the company has purchased in Surry county, Mr. Tebetts says there are about 1500 apple from 15 to 20 years old. rees have received little attention uring the past several years and are not bearing very well. In cases like this, he said, the trees are greatly benefited by breaking up the ground under and around with explosives. He uid that it not only loosened the ground but killed all the insects and vorms, by the shock.

This will no doubt be learned with interest by the fruit growers of this section who may have tried all manner of means to get rid of the borers. According to Mr. Tebbetts, a hole is

roots just enough to benefit it but not nough to interfere with its growth. Mr. Tebbetts stated also that his company is to hold a stockholders

meeting in about ten days, when the election of officers will be held. He said that J. B. Sparger of the Sparger Brothers Orchard company had consented to act as president. There are a few stockholders of the company in Asheville but most of them are in Surry county.
