

# A LITTLE DANDERINE WILL MAKE YOUR HAIR LUSTROUS, SOFT, FLUFFY, ABUNDANT

Get a 25 Cent Bottle Now and Forever Stop Falling Hair, Itching Scalp and Dandruff

If you wish to Double the Beauty of your Hair in Ten Minutes surely Try a Danderine Hair Cleanse

Your hair becomes light, wavy, fluffy, abundant and appears as soft, lustrous and beautiful as a young girl's after a Danderine hair cleanse. Just try this—moisten a cloth with a little Danderine and carefully draw it through your hair, taking one small strand at a time. This will cleanse the hair of dirt, dirt and excessive oil and in just a few moments you have doubled the beauty of your hair.

A delightful surprise awaits particularly those who have been careless, whose hair has been neglected or is scraggy, faded, dry, brittle or thin. Besides beautifying the hair at once, Danderine dissolves every particle of dandruff, cleanses, purifies and invigorates the scalp, forever stopping itching and falling hair.

Try as you will, after one application of Danderine you cannot find any dandruff or a loose or falling hair, and your scalp will never itch, but what will please you most will be after a few weeks' use when you will actually see new hair—fine and downy at first—yet—really new hair sprouting all over the scalp. Danderine makes the hair grow long, heavy and luxuriant and we can prove it. If you care for pretty, soft hair and lots of it surely get a 25 cent bottle of Knoviton's Danderine from any druggist or toilet counter, and just try it.

## Local Furniture Plant To Make Fine Product

Will Begin Operations by February 1, According to Present Plans—To Have Modern Equipment—May Employ from 150 to 175 Men.

The plant of the American Furniture company, of which F. S. Kennett is manager, situated on the French Broad river below the National Casket company's plant, will be in operation by February 1, if nothing untoward happens to prevent. That it will open then is practically certain, provided the weather does not become so bad that building operations will have to cease entirely or there is some hitch in the installation of the machinery that is now entirely unfinished. All plans for the opening are being laid, and every indication at present is that on that date Asheville will have in operation one of the most up-to-date furniture plants in the state or, for that matter, in the entire country.

The plant will not begin operations on full capacity, but in the beginning there will be between 60 and 75 men employed. The majority of these will be experienced furniture workmen and it will be necessary for these to educate the others in the work, before the force of workmen is increased. This training of new men will go on steadily and swiftly from the beginning, and within six or eight months after the plant opens, the calculations of Mr. Kennett are that the factory will be running on full capacity, and between 150 and 175 men will be employed in the work. That will mean a great increase in the payroll for Asheville, and since only men will be employed in the plant, it will also probably mean a much increased population for the city, as experienced furniture workers are comparatively well paid and are generally men with families.

**To Erect Houses.** For the benefit of these workmen, Mr. Kennett will begin the construction of a number of houses across the Macadam road from the plant about the first of the year, and within a short while after operations have begun, there will be a small village in the vicinity of the factory. The trade of these people will naturally come to Asheville, and their quota will add materially to the volume of business done by the merchants of the city.

**Factory Buildings.** The work on the factory proper is progressing rapidly and the buildings are fast assuming definite shape. The main building, which is 186 feet long by 60 wide, is practically up and within a few days will be entirely under roof. A part of it is already covered and the frame work is all in place. The first covering of boards on the outside is finished, and there remains the work of putting on the heavy paper over this and the outside weatherboarding. When this exterior work is completed the matter of finishing the interior will be a small question, whatever the weather may be.

**White Cochins Bantams.** Louis G. Durham, Hendersonville, first cock, first pullet. **Golden Seabirds Bantams.** J. C. H. Wilson, Waynesville, first second and third cocks, first and second hens, first pullet. **Black Breasted Game Bantams.** J. P. Swift & Son, Waynesville, first cock, first hen. **White Leghorn, Single Comb.** J. E. Gudger, Asheville, first cock, second and third hens, second pullet. **Black Minorcas, Single Comb.** J. P. Swift & Son, Waynesville, first cock, first, second, third, fourth hens, first pullet.

**Light Brahma Class.** Fernhurst Poultry farm, Asheville, first cock, first, second, third and fourth hens, first and second cockerels, first pen. **Pit Game Class.** A. E. Eve, Asheville, first cock, first hen. **Golden Wyandotte Class.** C. E. Robertson, Burnsville, first cock.

**Buff Plymouth Rocks.** W. F. O'Neal, first cockerel, first, second and third hens, first pullet. **Black Minorcas, Single Comb.** J. P. Swift & Son, Waynesville, first cock, first, second, third, fourth hens, first pullet. **Chain Carrier.** There will be an automatic arrangement for carrying the dried lumber from the kiln into the cutting room in the main building, which will consist primarily of an endless chain apparatus which will take the lumber out in a continuous stream and dump it into the cutting room just fast enough to supply the workmen. It will be cut there and then taken to the glue room nearby on the same floor. From this point it will be distributed to the various points in the factory, where the stock is to be turned into the finished product.

**Main Building.** The main building is three stories high, and except for some storage space on the ground floor, the whole building will be devoted to the preliminary work in getting the furniture together. This furniture in the rough will then be transported across to the finishing and storage building, which is to be a two-story structure and is connected with the main building by a double bridge on the first and second floors. There the finishing touches will be put on and the finished product stored ready for shipment. This building is next to the spur track connecting with the Southern railway and for that reason is more convenient for storage purposes, as the consignments may be quickly loaded without needless expense of either time or trouble.

**Output of Plant.** The output of the plant will be entirely of oak and mahogany furniture. This will be made up in the medium and high grades alone, as no shoddy furniture will be manufactured at all. It is Mr. Kennett's opinion that there is too much of the lower grades of furniture produced in the south now, and not enough of the high class kind, and he feels that there will always remain a steady demand for the better kind, thus insuring a safe and profitable business. There are certainly only a very few plants in the state that are paying their whole attention to the production of the best grades of furniture.

There is very little demand for solid oak or mahogany. The oak will be of the quartered variety, principally, while the mahogany will practically all be veneered. The cores for both will be mostly of maple wood, although it is possible that a small percent of beech may be used. It is thought that there is an ample supply of both in this section to supply the plant, as there should be a large quantity that is indigenous, and heretofore there has been very little demand for it, the result of which would indicate that the majority of it is still standing. There is, of course, plenty of oak to supply the demand, and so the only thing that will have to be imported for the plant in the way of lumber will be the mahogany.

**Will Specialize.** The factory will also specialize in the variety of furniture to be manufactured, and special attention will be paid only to bedroom and dining room sets. My following this policy, the working force of the plant can be rendered much more efficient in the production, and by turning out the best in these lines a much stronger trade may be built up by creating a demand for the products of the factory.

Mr. Kennett has secured a very efficient executive force for running the plant, which is admittedly one of the strong points in making it a success from the beginning. The head of this force will be R. F. Chaffee of Pomona, Pa., who is well acquainted with the furniture manufacturing business as he has had wide experience in this line. He held a position for four years as floor manager of the plant at Morganton, which has been in operation now for a number of years, and is said to be one of the most successful in the country, and besides this valuable experience, he was for a time superintendent in one of the big plants in Atlanta. His brother is at present superintendent of the Morganton plant.

**Effect on Business.** The operation of this factory will certainly do great things in the way of advancing the manufacturing business in Asheville, according to the opinion of the men here who are familiar with the situation, specially, if it is made a success itself. Of this latter fact there seems to be little if any doubt in the minds of those familiar with conditions. This is true, because the plant will be right in the heart of the section where the best raw materials are found and transportation charges will not eat up the profits in getting these to the factory.

Further, the same transportation rates can be secured for the shipment of the finished product out of the state as can be secured from any other point where factories are located at present. The one here, then, will have a big advantage over its competitors throughout the state. When these points are demonstrated by the successful working of Mr. Kennett's factory, then it is believed that other woodworking plants will not be slow in coming here to enjoy the same advantages.

### CAUSES MUCH DISEASE

**Advice About Stomach Trouble and How to Relieve Them.** Do not neglect indigestion which may lead to all sorts of ills and complications. An eminent physician writes that ninety-five per cent of all the ills of the human body have their origin in a disordered stomach. Our experience with Rexall Dyspepsia Tablets leads us to believe them to be among the most dependable remedies known for the relief of indigestion and chronic dyspepsia. Their ingredients are not of stomach disorders. Rexall Dyspepsia Tablets help to insure healthy appetite, aid digestion, and thus promote nutrition. As evidence of our sincere faith in Rexall Dyspepsia Tablets, we ask you to try them at our risk. If they do not give you entire satisfaction, we will return you the money you paid us for them, without question or formality. They come in three sizes, prices 25 cents, 50 cents, and \$1.00. Remember you can obtain them only at our store—the Rexall store, Smith's drug store, Paek square and South Main St.

### Duckpin Scores.

The following scores were made in the duckpin tournament of the Y. M. C. A. last night:

Trantham	95	91	84-270
E. B. Brown	95	85	85-262
Terry	94	87	93-269
Ashby	84	73	241
White	114	95	124-215
Green	88	89	88-263
Honess	79	91	73-243
Brandt	83	94	102-279
Maxwell	85	67	83-235
Graham	86	84	75-239

The quicker a cold is gotten rid of the less danger from pneumonia and other serious diseases. Mr. H. W. L. Hall of Waverly, Va., says: "I firmly believe Chamberlain's Cough Remedy to be absolutely the best preparation on the market for colds. I have recommended it to my friends and they all agree with me." For sale by all dealers.

**Do you consider the airship a success?** "Not yet. It has not become necessary to equip it with straps for the use of those who have to stand."—Judge.

Oh, justice claims some large amounts of money as its due. Bill running up expense accounts while raising down a cheer!—Washington Star.
