### Only One Way To Stomach Health

Eat Three Meals a Day and Let Stu-art's Dyspepsia Tablets Digest Them—The Stomach Soon Recovers After This Brief Rest

The very worst thing you can do la starve yourself to overcome stom ach misery. Make your meal as comprehensive as possible. Make your meals just Stuart's Dyspensia Tablets freely for awhile and all trace of stomach trouble will be gone. Dieting is a fallacy. The intensive farming and gar-dening of the present day forces such quick results that our dietary is lacking in the quantity of flesh-forming elements of former days. Thus we

often despoiled of much of their nutritive quality; the soil is depleted of the amount of vegetable salts it ought to have. We do not obtain the natural ripened fruits and vegetables, hence the stomach requires assistance to di-gest an overabundance of fibrous material and take care of fruit acids that Nature had no chance to convert into grape sugar. So we need more pepsin than the system can supply, more diastase, more of the natural tonic and preservative properties which ripened regetation should give us. This denciency is made up in Stuart's Dysto have stomach-health under modern

conditions. Try just one box and you will never want to be without this wonderful redy for stomach troubles. Stuart's Dyspepsia Tablets contain an ingredient, one grain of which will di-gest 3000 grains of food. They are entirely harmless because nave absolutely no effect on the system one way or another except to do just the one thing-digest food.

Every drug store sells and recommends Staurt's Dyspepsia Tablets. The price is 50 cents a box.

In Eighteen of Forty-Three States the Wage Is Less Than \$1 a Day.

### COAL MINERS GET \$600. **INSTRUCTORS \$485**

Russell Sage Foundation Division of Education Makes Public Results of Investigation.

Submitting that the average wage of teachers in the public schools of the United States is less than that of carpenters, coal miners, factory work-ers and common laborers; that this ountry has the shortest school year in the world; that schools burn down at the rate of one for every school day in the year and that the system of providing free text books is almost a century old, the Russel Sage Foun-dation Division of Education made its report on an interstate comparison of chool systems. The bulletin is entitled "A Comparative Study of State School Systems in the Forty-eight States" and sets forth that the annual wage of teachers in the public schools is less than \$1 a day and that one State rents its convicts by the year for more than it pays its teachers; that the amount for each child invested in school property ranges from \$4 in Mississippi to \$115 in Massachusetts, and that the providing of free text books in one State resulted in a ten per cent increase in high school attendance,

In eighteen of the forty-eight states, declares the report, the average annual wage of public school teachers amounts to less than \$1 a day. In only five States is it more than \$2 a day. The highest average salary paid in the United States is \$918, in Cali-fornia, and the lowest is \$200, in North Carolina, According to this, the average wage of carpenters in the United States is about \$802 of coal miners \$600, of factory workers \$550, of common laborers \$513 and of Throughout Southern States thousands of rural teachers earn less than \$150 a year In one New England State hundreds of teachers earn less than \$6 a week. In one county in a Central Atlantic

State the average for all teachers is \$129 a year. One Southern State nts its convicts to contractors at a little more than \$400 a year and pays school teachers slightly its public Rhode Island has the longest school year of any State-193 days-but if

these 193 days were divided equally among the children of school age in and compares the forty-sight States system, you can increase the revenue on that basis. In nearly a quarter of, largely by revising our income tax the States the effective school year is provision, less than three months. As a nation the United States has a shorter school day, a shorter school week, and shorter school year than any other civilized country in the world. American expenditures for public education have more than doubled in the last 42 ten years, according to the bulletin. Today the people of the United States spend nearly a half billion dollars a year on public schools. The expenditure for each child of school 40 age ranges all the way from \$2, in 20 South Carolina, to nearly eleven 10 times as much, or \$22, in Washing-

52 years. The percentage of attendance ache and neuralga.
74 ranges from about sixty in Maryland MUSTARINE won't soil; won't blissand Mississippi to more than eighty ter; and is always ready. It's the in Oregon and Washington. In real good oid-fashioned mustard plasture North Carolina, New Mexico, Arkan-ter brought up to date with 14 other sas and Alabama the attendance perfor jod is so short that the average pupil
ight would need about twenty-two years
to complete an elementary course of lameness, sore muscles, tumbago, sore

schoolhouse construction to insure the

Governor's Message Following is the text of Governor Kitchin's message: To the Honorable, The Generable As-

sembly of North Carolina: The state in all its departments and industries has had unexampled prosperity. The reports from the depart ments which are transmitted to you. will have your careful consideration. We must continue to go forward. A progressive age requires that we keep peneath the ever advancing forces of progress in our search for the loys and rewards of life. The legislature should

thought.

keep abreast with the best public

The Deficit. In my inaugural address, calling attention to the then existing deficit, I carnestly urged the general assembly to keep the appropriations within the limits of our probable rev enue. Two years ago I again made the same urgent recommendation to the general assembly. It appropriated \$300,000 more than our revenues. Let me again urge that the general assembly, "cut the garment to fit the cloth," and be careful not to appropriate money in excess of our probable

The Veto.

In this connection I recommen that you submit a constitution constitutional amendment giving the governor the vete power, and in the case of all approprlation bills give him the power to approve them with amendments reducing but not increasing the appropriations. This state is the only one in the union that has not placed the responsibility of approving or disap-proving acts of the legislature upon the governor. A governor with no power to forbid bad legislation can have little power to promote good legislation. I can not too strongly urge that the governor be given the veto power. I have conferred with many governors of other states and have found no difference of opinion as to its wisdom and usefulness, and in my judgment it is a practical necessity in the present age to properly safe guard and promote the public inter-ests. Reverting to the deficit, my opinion is that we are not spending too much but collecting too little revenue I am now satisfied that the property in this state, real and personal, includ-ing corporate property, is worth over we billion dellars, and for taxation it is listed at about one-third of its You should provide for traveling auditors to visit every county in the state for the purpose of assisting the State the result would be 116 in equalizing assessing listing and redays of schooling each. The report porting taxables. If you can not raise terms this the "effective school year," sufficient revenue under the present

To the two preceding legislatures ecommended legalized primaries. I re commend the passage of an act estab lishing a complete primary system fo

In each school system there is a BEGY'S MUSTARINE.

eries of leaks through which the nomination of all candidates for hildren escape before completing the all offices, including United States ourse. Thirty-six out of the forty-genators. You should also pass a corright States have Statewide computors attendance laws. Ohio alone comprehensive character, including as complete legal regulation of publicity of contributions and expenses the character of the contributions and expenses the contributions and expenses the contribution of all candidates for all candidates for all candidates for all candidates for some contributions and candidates for all c before and after election, prohibiting the use of money or other things of value to influence votes, to secure edi-torial support, or to in any way mistorial support, or to in any way mis-lead the people. The publication of any false charge against any applicant for office concerning his political con-duct, or reflecting upon his character for the purpose of injuring him in the primaries or in the election should be

Prohibition. For the better enforcement of the eral search and seizure act to super-code all local acts. For the better detection of criminals of all classes, I ugain recommend that authority given the governor to employ agent or detectives, and to retain special counsel to assist the solicitors when

ecessary. Public Schools. Remarkable progress has been made n our public schools. I urge you to continue your liberal policy towards them, having special regard to the ele-mentary schools in which the great majority of our people receive their only education. It is better to give

all the opportunity of a good common school education than to give the opportunity of higher education. State Prisons and Prisoners.

The success of the state's prison as been remarkable, owing largely to be judgment, diligence, and executive

ability of its directors and officials Profits have been large, health few escapes have occurred and a large The number of prisoners in the state's prison has increased over 20 per cent in the last four years. The superior courts dispose of about 10,less than 20 per cent are acquitted.
Doubtless the recorders, and police justice courts dispose of fully as many.
These courts should also be required to report their cases to the attorney general. We must either congratulate ourselves upon the better enforcement of the law or lament the serious in crease of crime. While we have no statistics compiled to show it, my in formation is that we have several probably four hundred more convict on the roads than four years ago, We believe there is a mere pronounce law-abiding sentiment than heretoother mob violence in this state in the last four years, though in three in stances I deemed it necessary to call out the military to prevent it. During that time we have had fifteen capita

executions, three by hanging and twelve by electrocution. Every able worked on the public roads should be worked. M my convicts cannot be so worked and the farm is the best place for them. I recommend that the pres-ent penitentiary be vacated by the state's prison and that the entire state's prison headquarters, offices, electrocution plant, etc., be moved to the state farm. Sultable quarters car be prepared at the farm for such purses for \$20,000 or less, and the pres ent penitentiary worth perhaps 600 can with proper alterations be n to better use, perhaps for the blind as that institution needs more lan-

and ought to be stoved. I recommend that the same commu ation be allowed for good behavio o all convicts on the county roads

Pardon Board. I recommend the indeterminat lishment of a pardon beard, to meant stated intervals to hear all applica tions for elemency and make recom-mentations to the governor. In the last four years 1123 applications for ardens have reached me. The numper is steadily increasing with the ed caughs of position. It grows and in state's prison. It grows and pellow box of yellow MUSTARINE and Smith's Drug store will tell you that if it isn't better than any plaster, and specially where the newspapers give the matter so perch advertising that if it isn't better than any plaster, States, through lack of compulsory liniment or poultice you ever used. Whether applications have merit of attendance laws, or through their non-money back. not they require time. We should have a parole system. New York paroles annually between ten as I fifteen per cent of her average prison populaper cent of her average prison population. She pardons practically none,
only two or three a rear out of an
average of near five thousand prisoners, and then only when it is thought
the conviction was erroneous. North
Carelina shows etch-ency annually to
about four ser cent of our average
number of convicts. I have adopted
the conditional pardon as the usual
clemency. This is in its essence simiing to the parole, but is not as safe
for the state or as beneficial to the
prisoner as the legal parole.

Aid to Dependents.

I recommend that in all cases
where able-bodied convicts are workted by the county or state that inquiry
the enjoined upon the courts to ascertain whether there is a wife of childrn dependent upon such prisoner unit

tain whether there is a wife of childry dependent upon such prisoner to it in such cases that the county or state be required to pay one-third of the value of such convict's work to the support of such dependents. In many instances the suffering of the innocent for the accessifies of life are terrible. In homicide cases another one-third should go to the dependents of the deceased. The state is making money through her convicts. Money making by the state should never be a purpose of punishment.

Convict Aid Roads.

I urge you forthwith to appoint a

Johnston, Hon. J. A. Long of Person, Hon. J. S. Carr of Durham, Hon. W. E. Springer of New Hanover, Hon. J. Elwood Cox of Guilford, Hon. Aaron S. Rascre of Fertle, and Hon. W. L. Parsons of Richmond. The adminis-tration building is now nearing completion, facing the capitol on Morgan street, between Fayetteville and Salisbury is the commendable production of their judgment and diligence, and

of their judgment and diligence, and is suitable to the present necessities of the riate. You should forthwith provide for its equipment and care.

Light and Power Plants.

I recommend that all water power plants selling power and light to others and all power and light plants serving the public be placed under the juris liction and made subject to the certifol of the corporation comthe control of the corporation comon in all respects as are railroad companies

Mileage Books. manics be required to draw mile nge from mileage backs on the train in accordance with the plan outlined in my last general message. Judicial Districts,

I recommend an increase in the

Beaf and Dumb Directors. number of directors on the board of the School for the Deaf and Dumb, at Morganton, and that at least one director be a deaf man, charitable institutions have met the reasonable expectations of the people. There is pressing need for enlargement

ne at Goldsboro. I recommend increased pensions for Confederate veterans and their whit-

of our asylums and particularly of the

Factory Labor.
Factory inspection is absolutely esential to the enforcement of our child labor laws, not that all manufacturers fall to obey them but that some violate them. You should pro-vice ample inspection. You should prohibit boys under 16 years of age and all girls and women from night

work in factories. Corporations. All foreign corporations should be required to obtain license before doing business in this state, and provision should be made to revoke such license for violation of our taw, or for failure to submit to the jurisdiction of our courts in all cases of corpora-tions which maintain any established office in this state for the receipt of money or the transaction of business, whether of manufacture, transportation, or commerce.

Roads and Drainage. In the last four years more miles f good roads have been constructed and more acres of swamp lands re laimed than in the preceding 3 years. I recommend the creation of a tate highway and drainage commission, and that the state be authorized to take at par the bonds of countles issued at 5 per cent for good roads and issue state 4 per cent bonds to obtain the money to pay for them, to run for 40 years on the plan recommended by me two years ago.

Freight Rates. I recommend that you authorize the employment of counsel and specommission in its efforts to obtain jus-tice for our cities and towns in interstate commerce freight rates, to the end that all unjust discrimina-tion be abstished. Suitable appro-praition should be made for this purpose. I made recommendation for continuance of such appropria-tion four years ago, but the legisla-ture failed to grant it.

Public Health.

The usefulness of the public plied in the last few years. I recommend that the appropriation for hat department be increased, and that provision be made for gathering vital statistics throughout the state. recommend that you authorize the ties in their discretion to establish county hospitals

Library Commission. The North Carolina library com nission was created by the general seembly of 1909, and was granted an annual appropriation of for the promotion of library exten-sion. Through it a general public library law has been enacted, ed, library institutes have been held helps for public school libraries have been issued, a library magazine has been published, the need of a legislative reference library has been em phasized, and a campaten now gener-ally endorsed by civic, educational agricultural associations of the state for a system of traveling libraries has been waged. Since the work of the commission clearly furthers public edpeation and in view of the fact tha traveling libraries are operated in 25 states to the great advantage of the

raveing literates are optimized to the rural population especially. I recommend that the commission's appropriation be increased to \$7500 annually in order that it may extend its advisory work and begin the operation of traveling libraries.

Valuation of Railroad Property, Railroad property should be physically valued by an expert or experts under the corporation commission.

Divorce statistics should be kept and compiled showing race and nativity of carties, and reported to the attorney general.

Challenges.
