Democratic Leaders Confer with View to Reaching Agreement as to Details of Measure.

WILL REVOLUTIONIZE THE BANKING SYSTEM

Government Will Have an Emphatic Share in Its Control. Say Men Drawing

the Bill.

By Associated Press Washington, June 19 .- Administration leaders today began an earnest effort to whip the currency bill into

every detail. With fundamentals and essentials agreed upon by President Wilson, Secretary McAdoo and Chairmen Owen and Glass of the senate and house banking and currency commit-tees, the leaders today and tomorrow will attempt to perfect it as an administration measure.

The measure would revolutionize the banking and currency system of the United States and it has been the aim of its framers to place the finan-cial system, especially the issue of currency, under the control of the

government. As now agreed upon the country its effects yesterday. He was 63 years the prince should always be the win-would be divided into not less than old and rapidly was losing his sight. her of any game. When he saw his and all national banks will be compelled to become members of the reserve association in their respective districts. State banks will be eligible to membership. The reserve associations will organize federal reserve banks in each district with a minimum capital of \$5,000,000 which will be supplied by the membership banks at rate of 20 per cent of their capi tal. These reserve banks will receive deposits of the federal government and thus provent the treasury department from locking up great quantities of money from circulation. The re-serve bank will be a bank of banks, with the privilege of re-discounting

commercial paper. In the place of the national bank notes, which will be retired, the government will issue to the federal re-serve banks a new kind of currency probably to be designated as "federal reserve treasury notes."

The limit of this issue will be \$500,-000,000 and it will be backed by commercial paper of prime quality other valuable security. Elasticity will be given the system in this manner. While these notes will not be secured by gold, they will be redeemable in gold by the treasury or the federal reserve banks.

Means are taken to protect the United States in two per cent bonds which now form the security for the national bank notes by permitting the graduated retirement of these notes bonds without the circulating privi-
