HIGH FINANCE CAUSED WRECK OF THE 'FRISCO SYSTEM, SAYS REPORT

Sale of Securities When Insolvency Was Apparent Is Condemned.

Washington, Jan. 27.—Financial operations—not ordinary railroad difficulties—caused the receivership of the St. Louis and San Francisco railroad system, according to the Interstate commerce commission's investigation just reported at the direction of the senate.

The report declares, referring to the sale just before the receivership of \$3,000,000 of five per cent bonds, French series, at 78 to Speyer and company of New York, "that the sale of securities to the investing public through bankers at a time when every appearance indicated the insolvency of the issuing company, invited and warranted the condemnation of all who assisted or participated in such sale."

"Speyer and company should have been aware of the poverty of the Frisco and of its difficulties in obtaining funds."

The insolvency of the Frisco, the report says may be attributed to various causes, among them:

"Disproportionate capitalization."
 "The acquisition of new lines."
 "The financing by the Frisco of the New Orleans, Texas and Mexico railroad and other south Texas lines."

"The desire for an entrance into Chicago, Ill., resulting in the assumption of heavy fixed charges in the acquisition of the stock of the Chicago and Eastern Illinois railroad."

"The sale of its securities at prices so low as to indicate a deplorable weakened credit, or an extravagant arrangement with bankers to whom large profits accrued in the purchase of the bonds and the subsequent sale of same to the public."

SAYS RY ORDERS ARE TAKEN OVER TELEPHONE

President of O. R. T. Charges 40 Per Cent of Roads Permit Practice.

Washington, Jan. 27.—Forty per cent of the railroads are permitting trainmen to take orders by telephone when they should not do so, H. B. Perham, president of the Order of Railway Telegraphers yesterday told a house commerce committee at a hearing on bills to limit trainmen to sixteen continuous hours a day and that of telegraph and telephone operators to eight. He added that he knew of stretches of railroad 200 miles long where trainmen had displaced operators for transmission of orders and added that on some interurban railroads trainmen copied orders from the train dispatchers on their cuffs. He explained that his organization did not oppose the telephone but declared its use should be safeguarded.

WORKING TO SECURE VISITS OF SHRINERS

Asheville Board of Trade and Oasis Temple Sends Out Invitations.

Following a meeting yesterday of several members of the Asheville board of trade, a telegraphic invitation was extended to Osman temple of Ancient Arabic Nobles of the Mystical Shrine, St. Paul, to visit Asheville en route to or returning from the annual convention of the order, which is to be held in Atlanta May 10-13 of this year. The invitation was extended today because the itinerary of the temple is being fully arranged for the trip.

The St. Paul Shriners will travel to Atlanta in a special train and it is understood that the party will comprise about 150. This party will be joined at Cincinnati by another special train carrying an equal number of Rochester Shriners to Atlanta for the convention, and if the St. Paul temple is induced to stop over for a short visit in Asheville, the Rochester wearers of the Fez will be here at the same time.

It is the aim of the board of trade and the local officers of Oasis temple to have as many as possible of the Shriners of the country to stop over here for a few hours' stay since it is believed that if they could get one glimpse of Asheville and the mountains of western North Carolina they would be sure to return for an extended visit.

With this idea in view, Secretary W. F. Randolph, on behalf of Dr. Chase P. Ambler, potentate of Oasis temple, has written to every Shrine in the country, over 150 in all, to pay a short visit to this city in connection with the visit to the national convention and similar invitations have been extended by the board of trade. Answers have already been received from a few of the Shriners. The Almas temple of Washington will go to Atlanta in company with the temples of Baltimore and Bridgeport and a letter from the secretary states that an effort will be made to take advantage of this invitation to see Asheville.

COLD IN NORTHERN ITALY; SPRING WEATHER IN ROME

Fatalities Among Alpinists.

In view of the fact that every man or woman who walks up a mountain with alpenstock in hand is a climber in the eyes of the public, it is not at all strange that the appalling annual fatalities in the Swiss Alps are laid at the door of one of the noblest of sports. The truth is that these fatalities—there were 165 last year—are relatively few and far between in the ranks of genuine alpinists, the amateur and professional mountaineers. They who climb with ice ax instead of alpenstock are cautious—first, last and always. Considering the risk taken, few of them lose their lives. Most who meet this frightful death in the Swiss mountains have always been either unthinking or downright reckless tempters of fate. With a complete disregard of common sense, these unfortunates go where they have no business to go save in charge of an experienced guide, and sometimes the mere reaching out for a coveted wild flower sends them to their doom.—Spur.

London's First Bank.

Banking, seeing that it flourished in the ancient world—in Greece, at Rome and at Babylon—must, so far as England is concerned, be regarded as a comparatively modern business.

During the so called renaissance banking reappeared in Italy.

From Italy the business of banking spread to France, then to Holland, and it was introduced into England by one Francis Child, who established the first bank in London in 1693.

Hitherto London merchants had deposited their cash in the mint of the tower of London. But when Charles II. took it into his head to borrow traders began to lodge their superfluous cash with the goldsmiths in Lombard street.

Francis Child was one of these, and in a few years Lombard street became full of banks. The Bank of England was founded in 1694.—London Globe.

A SPIRITED YOUNG LADY WRITES OF HER HAIR AND HERPICIDE

Few ladies realize how much an untidy head of hair detracts from their personal appearance. It also indicates an undesirable trait. Unkempt hair simply shows that while they may be scrupulously neat in every other way, they are careless about their hair.

Thin, scraggy, wispy hair generally indicates dandruff and dandruff is caused by a germ. Newbro's Herpicide will eradicate the scale-like accumulation and keep the scalp as clean and healthy as can be. This permits the hair to grow naturally and luxuriantly. That terrible itching which goes with dandruff stops with almost the first application.

Substitutes or remedies said to be "just as good" are sometimes offered, but it is better to buy "the genuine original germ killer, Newbro's Herpicide." There is no guesswork about that preparation. A trial isn't necessary, just buy a bottle and use it. The results are sure to be better than you expect.

Newbro's Herpicide in 50c and \$1.00 sizes is sold by all dealers who guarantee it to do all that is claimed. If you are not satisfied your money will be refunded. Applications obtained at the better barber shops send 10c in postage for sample and booklet to The Herpicide Co., Dept. R., Detroit, Mich.

Moyer declared that two appeals had been made to the federation executive council for aid and that so far no action had been taken.
