Hot Weather Will Soon Be Here

But you need not dread that fact if you have a GAS RANGE installed in your kitchen. When you COOK WITH GAS your fire is burning only when needed, you do not heat up the whole house and a lot of work and worry is done away with.

Roy M. Young.

Your time is valuable, and COOKING WITH GAS saves you considerable time and unnecessary steps in performing your culinary duties. You can cook three meals daily on a GAS RANGE with less effort, less trouble, less time and at less expense than with a coal range or wood stove.

BUILDING A FIRE WITH A GAS RANGE, MEANS SIMPLY STRIKING A MATCH

Think how CONVENIENT it is to have a fire at a moments' notice at any hour of the day or night without all the trouble of fire building and the dirt, ashes and overheated kitchen. It's well worth consideration. Phone 69 and have our representative call. Let us explain the merits of GAS FOR COOKING purposes, also our divided payment plan, that makes owning a gas range easy.

GAS RANGES \$15.50 UP TO \$25.00.
