Berlin, July 24.-Grave possibilities connected with the strong Austrian to Servia which virtually took the form of an ultimatum demanding suppression of the pan-Servian movenent and punishment of those conerned in the assassination of the late Archduke Francis Ferdinand, are recgnized in official circles here. It is realized that further serious developnents in Austro-Servian relations are nevitable unless Servia complies with he Austrian demands. It is believed in authoritative quarters that the struction Servians will yield unless assured of ton, told support from outside. For this reason official eyes are turned to St. Peters-burg, where a council of ministers is xpected to settle the question of

eace or war. It was stated today that Germany was not consulted regarding the note o Servia, but that she thoroughly aproves and is prepared for any con-equences that may ensue. Should ssia take part against Austria Germany is fully prepared to draw the sword on behalf of her ally, in ordance with the terms of the triple alliance between Germany Austria and Italy.

Comment in the German press to day strongly supports Austria. Radical organs in close touch with the financial world and usually strongly pacific, find the terms of the Austrian amply justified. Newspapers quickly responsive to the popular sentiment are also pro-Austrian.

A. P. Thom, general counsel for the aney, an independent coal operator of Bristol, Virginia-Tennessee, author of the charges. Dulancy insisted that the railroads prevented operators from seeking a market at Charleston.

Mr. Thom said the Southern was anxious to arrange for coal trans-shipment there, and had purchased property and made other arrangements for onstruction of a pier. "When will this improvement be fin

The attorney added that an effort by the late President Finley of the Southern to enlist the Clinchfield road in a movement to build a pier at Charles ton had failed because officials of the latter line objected to the Southern's stipulation that the pier must be open o all shippers of coal.
