In Use For Over 30 Years

THE GENTLEMAN COMPANY, NEW YORK CITY.

ENGLISH FACTORIES GETTING GOOD ORDERS

Correspondence of The Associated Press. Birmingham, England, Sept. 25.—The principal item of interest in this market is the publication of very large orders for the spinners for the admiralty and minister of war.

Limited supplies of wire fencing, barbed wire, galvanized sheets and road axles also are in demand. Demand in other quarters are for great quantities of soldiers-bottles and block plates and many thousands of mess tins to be produced from tin plates.

Another favorable feature is that merchants were called upon to place orders for French and Russian governments for immediate execution. These circumstances put the manufacturers in a cheerful mood as they can go on full time for at least a part of the next quarter.

Merchants trading with the South American markets are getting orders for supplies from firms that hitherto favored Germany.

CHARTING OF ALASKAN NORTH COAST FINISHED

San Francisco, Oct. 6.—Charting of the north Alaskan coast has been completed by Ernest Dekoven Lettingwell, of Pasadena, Cal., after a year alone in the northern wastes, it was learned here today.

Lettingwell journeyed north on the Mary Satche, one of the vessels of Stefansson, the arctic explorer and returned with word that two ships of the Canadian expedition which were frozen in last winter in Flaxen, within 25 miles of Lettingwell's headquarters, were released in July and are now on their way to Dominion ports.

Lettingwell says he believes that land to the north of Canada, for which the Stefansson party is hunting, exists and will be found.

Hypothetical Question.

Lady to lawyer—Can I sue her for slander whether she proves what she said I said she said or not?—Judge.

FAIR PRICE PAID FOR TOBACCO AT KINSTON

More Than Five Million Lbs. Has Been Marketed Since the Season Opened.

Special to The Gazette-News: Kinston, Oct. 6.—In September 4, 236,796 pounds of tobacco were sold on the Kinston market, and to date the sales have totalled nearly five million pounds. At this rate, well-posted tobaccoists say, between 12,000,000 and 14,000,000 pounds will be handled here during the entire season. Prices during the past week were better than at any time since the opening on September 1. The grades continue fair, and are now beginning to average up well with last season's offerings. About two-thirds, possibly more, of the product sold in Kinston warehouses this season will be exported.

A conference of business men and farmers of Kinston, Pink Hill and Duplin county towns will be held here in a few days under the auspices of the chamber of commerce, to discuss the proposed extension of the Carolina railroad from Pink Hill into the Beulaville and Maple Hill sections. Committees of business leaders have been appointed to represent every community along the route, and all have assured the chamber of their intense interest in the project. The continuation of the Carolina to a terminus some 45 or 50 miles from here would open up probably the richest country in this region, now absolutely without rail facilities, to intercourse with the outside world, through Kinston.

Prominent farmers here are discussing the starting of a live stock association for Lenoir county. A meeting will be held in the courthouse Thursday to formulate the plans for such an organization. The proposed association will have as its purpose the promotion of the live stock industry in the county by means of better and more extensive breeding. Agents of the United States department of agriculture here are expected to lend their aid as long as they are in the vicinity. The production of better beef and dairy cattle has been made easy by the work of tick eradication, which has been going on for the past few months, and when the quarantine is lifted early in 1915 a fresh start in the industry may be had without danger from tick infection, which has long been a bane to the stock raisers.

TURKEY CARRYING OUT PLANS OF ABOGATION

Washington, Oct. 6.—Notwithstanding the protest of the nations including the United States, the Turkish government, continuing its plan of abrogating extra territorial rights, has already put into effect new rates to replace the low arbitrary rates fixed for capitulations.

Ambassador Morgenthau has advised the state that October 1, the day the abrogation of capitulations went into effect, he and the minister of war went to Robert college, an American institution, and there arranged for the entrance of a special class including the minister's brother and his two sons.

WIRELESS STATION ON ISTHMUS COMPLETED

Washington, Oct. 6.—The navy department has completed at Darien, Isthmus of Panama, the second station of a chain of wireless towers, expected to maintain communication between the Arlington station, Central America, California, Hawaii, Samoa, Guam and the Philippines. The new tower is composed of three 600-foot structures forming a triangle on a 900 foot base. The other links of the chain will rapidly be completed as the necessary fortifications be constructed to defend them against attack. The new station cost \$250,000.

Much Hinges on Coming Battle In East Prussia

Petrodrag, Sunday, Oct. 4.—Via London, Oct. 6.—In Russian military circles it is felt that the Russian general staff is able to analyze and forestall the intended German invasion of Russia. In spite of the great importance of the great eight-day battle that has just come to an end and in which the Germans were not only not successful in crossing the river Niemen, according to reports here, but were driven back with heavy losses to the frontier, losing the entire province of Suwalki, excepting the town of that name, it is the opinion of the Russian observers that the Germans made a costly and unsuccessful attempt to draw the Russians on, in east Prussia as a preliminary to their main object.

This, as revealed by the present situation near Warsaw, was the prelude to an attack on Warsaw and an outflanking movement of the Russian army which, having occupied Galicia, is now moving through Bukovina, Hungary.

It is declared here that this intent has been made impossible by the bad roads. The heavy German artillery sank into the roadway and could not go; nor has the German attempt to take the offensive at Cracow been thus far successful.

The reported presence of Emperor William in east Prussia and the departure of Emperor Nicholas for the front, is taken here to emphasize the importance of the impending battle which may be the biggest conflict of the war up to the present time.

The Russians believe that if the German-Austrian army is defeated at Cracow, the war will be virtually over. Granted this defeat they declare there will then be insufficient forces left to stem the Russian invasion of Silesia and thence to Breslau and Berlin as well as the Russian advances through Cracow to Vienna and through Transylvania to Budapest.

golden ball. One was inscribed Alsace and the other Lorraine. On the eagle's perch were the words: "You hold them, but by a hair."—Washington Star.

FRENCH INGENUITY.

Some thirty years ago General Von Manteuffel was the military governor of Alsace. The German, who apparently hated all that was French, once engaged in a dispute with a French diplomatist at a public dinner. The Frenchman vauntingly claimed the superiority of the French workmen over the artisans of all other nations. "There does not exist," he exclaimed, "a thing so ugly but that the skill and genius of a Frenchman cannot make it a thing of beauty."

Angered by the contradiction, the old soldier pulled a hair from his bristly gray mustache and handing it to the Frenchman, said curtly: "Let them make a thing of beauty of that and I'll concede your claim."

A week later the mail from Paris brought a neat little box for the general, in it was a handsome scarfpin, made like a Prussian eagle, that held in its talons a stiff gray bristle, from each end of which dangled a tiny
