

Children Cry for Fletcher's

CASTORIA

The Kind You Have Always Bought, and which has been in use for over 30 years, has borne the signature of and has been made under his personal supervision since its infancy. All Counterfeits, Imitations and "Just-as-good" are but experiments that trifle with and endanger the health of Infants and Children—Experience against Experiment.

What is CASTORIA

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is pleasant. It contains neither Opium, Morphine nor other Narcotic substance. Its age is its guarantee. It destroys Worms and allays Feverishness. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic, all Teething Troubles and Diarrhoea. It regulates the Stomach and Bowels, assimilates the Food, giving healthy and natural sleep. The Children's Panacea—The Mother's Friend.

AMUSEMENTS

COMING ATTRACTIONS.

Wednesday, March 10, Matinee and Night, "Lady Luxury," with Florence Webber.

"Lady Luxury."

The following criticism of "Lady Luxury," which comes to the Auditorium on next Wednesday for a matinee and night performance was clipped from the Richmond News Leader of February 23:
"Lady Luxury," a musical comedy, with book and lyrics by Rida Johnson Young and music by William Schroeder, was received enthusiastically by an audience of moderate size at the Academy of Music last night. The engagement will conclude with a performance tonight and if there are people in town who think they might enjoy a rattling, good show they can find their way to the Academy without a great deal of trouble.
"It is full of life and some catchy tunes. The cast provided by Charles H. Wuerz comprises several singers who are possessed of voices far above

Bulgarian History One Difficulty After Another

Washington, March 4.—The history of the Bulgarian nation has been that of one difficulty after another until the Bulgars have become inured to trouble and at their best when confronted by such crises as that which now seems to lie before them. Their whole life as a people has been a continuous succession of struggles against overwhelming odds, struggles in which they have suffered bitter misery and hardship and in which they have never failed to show a sublime steadfastness and endurance, according to a study of this youngest of kingdoms prepared for the National Geographic society by James D. Bouchier.

Bulgaria, probably more than any other Balkan land, this writer says, has felt the weight of Turkish misrule and oppression. It lies in the central part of the Balkan peninsula, near to the reach of the great Turkish military centers of former days, Adrianople and Constantinople, and embraces a rich agricultural country from which the Ottoman overlords have drawn heavy returns. Due to this value of its soils and to its handy position, Bulgaria has been held more firmly under the yoke of the Turk than any other Christian nation in this ill-fated territory.

The Bulgarians were the last to recover from the Turkish oblivion into which they had been sunk for hundreds of years by their Asiatic conquerors, Mr. Bouchier continues, and in their efforts, to find political freedom and union for their race, they have found themselves not only confronted by the power of Islam, but with the hostility of all surrounding sister nations. During the years of their writings under the Turkish heel, the Greeks added religious oppression and economic oppressions to the efforts of the Turks. Russia has repeatedly loomed threatening on their horizon, while Rumania and Servia—both earlier free of the Islamic domination have added to the persistent little nation's troubles.

Out of their centuries of suffering and dogged efforts the Bulgarians have developed a fine determination, a heroic love of race and country which shows no limit of individual sacrifice in its behalf. They have tenacity, they have shrewdness, and they have a familiarity with desperate situations, which, if it has not bred contempt, at least has bred a courage for whatever trouble Fate may have in store.

THE MT. MITCHELL BILL AND FORESTRY IN N. C.

Reservation on Mitchell's Peak an Encouragement to the Foes—Conservation.

A well-known authority states that stomach trouble and indigestion is nearly always due to acidity—acid stomach—and not, as most folks believe, from a lack of digestive juices. He states that an excess of hydrochloric acid in the stomach retards digestion and starts food decay, then our meals sour like garbage in a can, forming acid fluids and gases which inflame the stomach like a toy balloon. We then get that heavy, lumpy feeling in the chest, we eructate sour food, belch gas, or have heartburn, flatulenc, water-brash, or nausea.

IREDELL TO ISSUE LARGE BONDS SOON

Special to The Gazette-News. Statesville, March 4.—The Iredell county commissioners in session yesterday afternoon, passed a resolution requesting that Iredell's senator and representatives in the legislature introduce and have passed a bill authorizing the board of commissioners to issue bonds to an amount not exceeding \$100,000 to secure funds to pay the county's present indebtedness for road work and other obligations incurred. The resolution also asks that the bill give the commissioners authority to levy a special tax not exceeding ten cents on the \$100 valuation and 30 cents on the poll to meet the interest and principal of the bonds. The bonds are to be issued in such denominations and for such period of time as the commissioners may decide and are to bear interest at a rate not to exceed 6 per cent.

been preaching for several years. In its last bulletin, issued February 27 the department discusses the need of demonstration forests for North Carolina. Regardless of the merits of scientific forestry, the way the subject appeals to the average farmer or lumberman is about as follows: Is this a proposition which a man with only a moderate amount of capital can afford to invest in? Can I and my family wait a generation for the returns on the investment? Or, if he is the manager of a lumber company whose stockholders are looking for the yearly dividends to arrive with the regularity of the laws of nature, how can he carry on forestry operations that are, in this state at least, still in the experimental stage?
