If you want to enjoy the nicest, gentlest liver and bowel cleansing you ever experienced just take a spoonful of harmless Dodson's Liver Tone tonight. Your druggist or dealer sells you a 50 cent bottle of Dodson's Liver Tone under my personal money-back guarantee that each spoonful will clean your sluggish liver better than a dose of nasty calomel and that it won't make you sick. You'll know it next morning because you will wake up feeling fine, your liver will be working; headache and dizziness gone; stomach will be sweet and bowels regular. TRY THIS FOR A COLD--IT'S FINE "Pape's Gold Compound" ends severe colds or gripe in few hours. You can end gripe and break up a severe cold either in head, chest, body or limbs, by taking a dose of "Pape's Gold Compound" every two hours until three doses are taken. It promptly opens clogged-up nostrils and air passages in the head, stops nasty discharge or nose running, relieves sick headache, dullness, feverishness, sore throat, sneezing, soreness and stiffness. Don't stay stuffed-up! Quit blowing and snuffing! Ease your throbbing head—nothing else in the world gives such prompt relief as "Pape's Gold Compound," which costs only 25 cents at any drug store. It acts without assistance, tastes nice, and causes no inconvenience. Be sure you get the genuine. The Planet Mars. Earth's astronomers know nothing of Mars beyond the fact that if the planet is of a formation more recent than the formation of the terrestrial globe its evolutions must have been more rapid, because it is so small. Mars is an older world than the earth—a world that represents the intermediate state between that of the earth and that of the moon. The phenomena on Mars now under the observation of earth's astronomers are the last manifestations of a dying life. Slowly, very slowly, time is doing its work. Mars is dying of cold, the anesthetic that benumbs the worlds and steepens them in the sleep in which they die.—Exchange. Flight of the Locust. Locusts in South Africa are very tiny creatures, at most two or three inches long, yet giant jawed and shelled in a grim brown mail so hard that as they strike it causes a sharp smart. They travel in such numbers that it takes them four or five days to pass over. The scouts alone, hovering in patches like red dust clouds, are numerous enough to destroy the vegetation of a district, while the main body, high up in the air, a host of little black specks, stretches out into an interminable screen between heaven and earth. The fanning of their wings brings a fresh coolness over the hot earth even in the depth of summer. There seems to be a fresh breath of ozone as of the sea. Everlasting Bricks. Once made a brick is practically indestructible. Nearly every brick that has ever been made by man from the beginning of time is still in existence on this earth. The men who made and laid them and who directed these operations have long since been gathered into dust. Some of them have doubtless contributed in their bodies to the making of more bricks. But the steadfast and enduring square of baked clay persists and will until the heavens and earth are shriveled like a scroll.—Exchange.
