From the Concord Gazette, (Extra) May 16. To the People.

We received the following certificates, relative to the Small Pox at the Parker Mine, too late for insertion in this week's paper-but, in consequence of the interests of the mining company having people, and at the request of the Superintendent, we publish them in circular form, that every one of visiting the Mine.

To the Editor of the Concord Gazette :

Dear Sir :- For the last two weeks the community has been much excited, in regard to the existence of the Small Pox at the " Cabarrus Mine, -better known as the Parker Mone in this county -and as allusion was made to it in your last paper, I deemed it a matter of duty to state to you the plain facts in regard to the case, as I was called upon frequently in the first stages of the

The patient, Ira Ashley, was supposed to be exposed to Small Pox, on the route from New York to Greensborough, and at the first indications of the disease on Ashley, he was placed in a cabin, erected for the purpose, something more than half a mile from any road or buildings, and two men, who had previously had the Small Pox, selected from the Mining corps, to attend and nurse him, where he has contined, without being very sick at any time with the complaint, and is now

During the whole time every precaution has been taken by the Agents at the Mine, to prevent the spread of the disease, and it is now a matter of congratulation to all, that no more cases has occurred. And, in my opinion, such has been the precaution taken, that no person has been exposed to the disease, at the Mine or in the neighborhood, and people from abroad, may pass and repass, to and from the Mine, without any danger whatever.

JOHN L. HENDERSON, Mount Pleasant, N. C., May 16, 1854.

We, citizens of Cabarrus County, and residing in the vicinity of the Mine, having been familiar with the circumstances connected with the case of Small Pox at the " Cabarrus Mine," above alluded to, concur in the opinion of Dr. Hendersen, and can confidently assure our friends from abroad, that no danger whatever will be incurred by visting our neighborhood or the Mine.

The United States and Cuba.

Here is a brief synopsis of such outrages as this man, Cuba within the last four years:

"On the 22d of January, 1850, Charles Peter V. Esnard, an American citizen was arrested by prison of Havana; no charge having ever been advanced against him. In May of the same year, two American vessels, the Georgiana and the Susan Loud, were captured at Contoy by the Spanish General of Marines and brought as prizes into the port of Havana, their crews were imprisoned. On the 25th March, 1851, John Salinero. an American citizen, was arrested by the Spanish authorities, no accusation being made against him. On the 16 h August, 1851, the United States steamer Falcon were fired into and boarded by a Spanish man-of-war wishout any excuse or pretext. On the 16th February, 1852, the American schooner Larmartine was fired into by a Spanish vessel, also without assignable motive or pretext, On 3d October, 1852, the Crescent City was driven from Havana, and prohibited from landing her mails on the childish and frivolous pretext that the purser spoke and wrote ill of the Cuban authorities on his visits to New York. In the March following, the Onio was detained three days at Havana, under an unprecedented and ridiculous plea that she ought to perform quarantine. On the 14th of that month the schooner Manchester was boarded by a Spanish vessel of war, searched and detained twenty-four hours, without the shadow of any pretext whatever. In February, 1853, and subsequently, the United States mail bags were broken open by the Cuban authorities, many of the seals broken, and the privacy of American correspondence violated. On the 5th of May of the same year, three American seamen belonging to the American bark Jasper, were arrested on vague suspicions of being concerned in the slave trade, thrust into prison, and subjected to inconceivable Raices, a naturalized citizen of the United States, was arrested at Havana, no crime being charged against him, was tried and sentenced to a year's transportation. Shortly afterwards another naturalized citizen of the United States, Isidore Richoux, was forced to leave the Island of Cuba, no motive being assigned for his expulsion. The notorious case of the Black Warrior completes an imperfect catalogue of the affronts we have suffered at the hands of Spain during the last four years."

Domestic Bliss in New England.—The New Hampshire Superior Court, at its late term, held at Concord, heard arguments in eighty-three divorce suits. Thirty-three of the applicants were granted, seven denied, and the decision of fortythree reserved. The Superior Court of Rhode Island, at its last term had seventy-three similar Mass. cases before it, of which forty-two received judgment of divorce, four were denied, three settled, and the remainder continued for consideration.

MORE GOLDEN DISCOVERIES .- A late arrival at Boston from the Cape of Good Hope, states that the papers of Cape Town are filled with accounts of new discoveries of gold, which are said to extend over the whole of that country. It is also reported that gold has been found there in greater abundance than either in California or Australia. Valuable stones have also been found there in considerable quantities.

It is a Chinese maxim, that for every man who does not work, and for every woman that s idle somebody must suffer cold or hunger.

From the Mobile Morning News. How to be Healthy.

It was well said, by one who had thoroughly studied the subject, that the highest ambition of an ancient Greek was to be healthy, beautiful and rich. We cannot help thinking, says the Philadelsuffered from the fear of the disease among the phia Bulletin, that the old Athenians, in this respect, were wiser than ourselves. Much as we boast of our wonderful intelligence, we have not may judge, from the facts stated, as to the danger yet practically attained to a method of life so comprehensive as that pursued, not only by the philosophers, but by the men of fashion about town in Africa and the Peloponesus, They placed health first, and money making last, while we invert this order. Yet they were Pagans, and we Christians, Surely we should cry "shame" to

In reality, the two principal objects sought by he ancient Greek, health and beauty, were but one and the same, For beauty cannot exist without health. The man who is constantly confined at the counting desk, soon acquires and habitual stoop; the one who devotes his whole soul to money-making becomes wrinkled before his time, On the contrary, he who indulges in proper exercise and recreation, as, for example, a well-to-do farmer in healthy districts carries an erect frame to the verge of seventy, and has a ruddy cheek even when an octogenarian. The first by neglecting the laws of nature, not only destroys his own manly bearing, but transmits a puny form and weakly constitution to his children. The last perpetuates a race of hardy sons and majestic daughters.

There is but one way to preserve his health, and that is to live moderately, take proper exerise, and be in the fresh air as much as possible. The man who is always shut up in a close room, whether the apartment be a minister's study, a lawyer's office, a professor's laboratory, or a merchant's gas light store, is defying nature, and must sooner or later, pay the penalty. If his avocation renders such confinement necessary during a portion of the year, he can avoid a premature breaking down of the constitution only by taking due exercise during the long vacations of the summer and winter months. She waste of stamina must be restored by frequent and full draughts of mountain and sea beach air, by the pursuits of the spotsman, by travel, or other similar means .-Every man who has felt the recuperative effects of a month or two of relaxation, knows from his own experience how general its influence is; how it sends him back to business with a new flow of spirits; how it almost re-creates him, so to speak. Between the lad brought up to physical exercises in the invigorating open air, and one kept continually at school, or in the factory, there is an abyss of difference, which becomes more perceptible every year, as manhood approahed, the one expanding into stalwart, full chested health, while

government has suffered from the authorities of | The advantages of exercise are as great to females also. All that we have said about preserving health in the man, is as true of the opposite sex. But this is not the whole. The true foundation of beauty in women is exercise in fresh air. the Cuban authorities, and incarcerated in the No cosmeticts are equal to these. The famous Diana of Poicteers, who maintained her loveliness until she was near sixty, owed this extraordinary | A result, in her own opinion, to her daily bath, early B rising, and her exercise in the saddle. English | B ladies of rank are celebrated, the world over, for B their splendid persons and brilliant complexions; B and they are proverbial for their attention to walk- B ing and riding, and the hours spent daily out of Be doors. The sallow cheecks, stooping figures sus. C ceptibility to cold, and almost constant ill-health, C which prevail among the American wives and C daughters generally, are to be attributed almost C entirely to their excessive sedentary life, and to the infirmity caused by the same life on the part of their parent. A woman can no more become beautiful, in the true sense of the term, or remain | so, without healthful exercise in the open air, than a plant can thrive without light. If we put the latter into a cellar, it either dies out right, or refuses to bloom. Shall we wilt our sisters, wives or daughters, by a similar deprivation of what is as necessary to their harmonious development?

In another aspect, the care of health is a more important thing than is usually supposed. There is no doubt that, as between city and country, the D population of the former suffers most from want of | E exercise and fresh air, and that consequently the F stamina, so to speak, of a city population, is infe- | F rior to that of a rural one. It is even said that in Ga some cities; Paris for instance, few strictly town. | Ga bred families last over a century, and that, if the Gu population was not continually recruited from the Gi country, it would die out. It is an equally striking G fact and one that lies within the observation of all H indignities and cruelties. In November, Pedro In New York, Boston and Philadelphia, have been He of us, that the most energetic merchants generally, H originally lads from the rural towns or counties. He whose well-balanced health has not only produced H well balanced, vigorous, enterprising minds, but Ire enabled them to endure an amount of fatigue which | Ja the average of their city-bred competitors could Jo

The public weal, therefore, as well as the happi- Le ness of the individual, is concerned in this question | Li of health. Yet, we Americans almost ignore it, Ma and practically neglect it entirely. The old Greeks had their gymnasiums for physical exercise, which were as much state institutions as common schools | M are now. Were not the Greeks wiser, after all, that we are, at least in this particular?

SPECIAL NOTICES.

Worms! Worms! - A great many learned treatises have been written, explaining the origin of, and classifying the worms generated in the human system. Scarcely any topic of medical science has elicited more acute observation and profound research; and yet physicians are very much divided in opinion on the subject. It must be admitted, however, that, Johnston's Cheap Boot and Shoe Store, after all, a mode of expelling these worms, and purifying the body from their presence, is of more value than the wisest disquisitions as to the origin. The expelling agent has at length been found-Dr. M'Lane's Verifuge is the much sought after specific, and has already superceded all other worm medicines, its efficacy being universally acknowledged by medical practitioners.

Purchasers will please be careful to ask for Dr. Mc-Lane's Celebrated Vermitage, and take none else. All other Vermitages, in comparison, are worthless. Dr. McLane's genume Virmitage, also his Celerated Liver Pill, can now be had at all respectable Drug Stores in the United States and Canada. Corn Starch.

THIS incomparably pure and beautiful article is exceedingly healthy, delicious, and economical, and when desired may be used as a substitute for and in the same manner as Arrowroot. The universal estimation in which it is held, and the increasing demand for it has induced others to flood the country with an inferior article of the same name. Corn Starch refined, and prepared expressly for food, can be had only at the FISHER & HEINITSH.
