CLOTHING and Furnishing Goods,

AT NEW YORK COST. It is entirely unnecessary to tell you what we have, but would request you to come and see for yourselves.

Perhaps it will be asked why we are selling off at cost? We don't do it because it is fashionable, but because we have connected ourselves with a large Manufacturing House at the North, to take effect the 1st Jan., 1858; and we don't want any of our present stock on hand. So come, one and all, buy our goods at COST, pay the CASH, and help us on in our honest designs.

WESTERN DEMOCRAT.

JUST AS WE SAID.

We perceive in an able letter from the Hon. W. H. Sneed of Tennessee that Mr. Edward Everett, the extremely be-praised lecturer, did make the ungenerous and unmanly remarks on the chivalrous and lamented Brooks that we accused him of.

Here they are, taken from Littell's Living Age, second series, No. 637, p. 376, in an article copied from the London Examiner, of June 21st.

"Being desirous of expressing to Honorable Charles Sumner, in some permanent and appropriate form, our admiration of his spotless public and private character, our lively gratitude for his dauntless courage in the defence of freedom on the floor of Congress, and especially our unqualified approbation of his speech in behalf of free Kansas, delivered in the Senate on the 20th of May last-a speech characterized by comprehensive knowledge of the subject, by logical acuteness and Spartan intrepidity in its chastisement of iniquity, for which he has well nigh lost his life, at the brutal and cowardly hands of a creature for which, thanks to the rarity of the appearance, the English tongue has as yet no appropriate name, we deem it alike a privilege and an honor to participate in offering him some suitable token of our sentiments; for this purpose we subscribe the several sums set opposite our names."

This document was signed by the Hon. Edward Everett and many others; published in the papers of the day; and never to this day denied by Mr. Everett.

We are glad that Mr. Sneed so fearlessly brings this subject to light, as we have long since tired of the Southern adulation given to Edward Everett.

On another occasion, preliminary to his Lecture on Washington, to repeat which he was invited to the South, he expressed sentiments equally as obnoxious, an extract of which may be found at 375, of the same work, in an article taken from the London Economist, of June 21st.

Southern milk-and-water editors may be pleased to sustain this Hon. Edward Everett but we are far from joining-in with them. We know no such yielding .- Columbia

RAISE MORE FOOD .- The New York Post gives some "advice to the tillers of the soil." from which we take the following sen-

sible and timely remarks: The revolt in India is the harbinger of famine; one hundred and eighty millions of human creatures will need large supplies of food from the produce of other regions .-The army of India, the transport fleet for that army and its supplies, the necessities growing out of the disturbed state of that great English dependency, will call for much of our surplus beef, pork and flour .-The two last named articles are the product of every year, but beef requires years of nourishment before it is ready for use. The wicked, wanton waste of breeding power, which is the besetting sin of American farmers, ought to be checked. Every farmer ought to be required to give an account ought to preserve every "cow-calf" for five years to come. By this method we might soon have a supply of beef, not only for our-

selves, but for any emergency abroad. CONCENTRATED MILK. The Winsted (Connecticut) Herald con-

tains the following description of Mr. Gail Borden, jr.'s, process of concentrating and preserving milk. unpleasant taste, in no way resembling milk, and its smell is slightly offensive. It is considered that the concentrated article is rendered purer by the process, to say nothing of its other advantages.

A COUNTESS TURNED PLEBEIAN. An elegantly dressed lady was pointed out to us a day or two since on Sycamore, with whose life many romantic circumstances are connected, the matrimonial catastrophe excelling in intensity and diversity nella of the great city of N. Y. She was accompanied by a thick-set, unprepossessing individual, wearing a heavy brogue upon his lingual as well as his pedal appendage, and a most terrific moustache hiding the beet red thick lip. As they walked on, our companion informed us that the lady was a native of Norfolk. Her father had settled there at an early day, and by industry and frugality, accumulated a large fortune. The society of his daughters was of course much sought after, and the one who was now dashing on before us, was considered a leading star among the belles of the day.

"Money makes the mare go," says the adage, but there is nothing like blue coats and brass-buttons for woman killing purposes-they possess a species of magnetic, sympathetic influence, which draws the 'soul's sweet solace" of the "tender gender" completely over to the designing heart disguised beneath their folds of cerulean, and deep. metallic sunshine. So, to be short, she married a naval officer. And, to be short, again, he shortly afterwards, died. Grand Opening of Fall Millinery. For several weeks great excitement has prevailed in the vicinity of the fashionable millinery establishments, preparatory to the grand opening of Fall and Winter Fashthe famous exploit of the romantic Petro- ions, which has just taken place. The preparations are always conducted with the utmost secrecy; the lady proprietors being in a constant state of nervous agitation for fear their stray visitors should be unfortunate milliners, in search of a "pattern" or an idea. When, therefore, new goods arrive, or as soon as the tasteful creations are completed in the workroom, they are packed away in close boxes and guarded by Arguseyes until the eventful morning arrives when they can be exhibited in all their glory. In spite, however, of this excessive care and watchfulness, the most remarkable coincidence occur in material and design, especially where the idea presents any claim to originality.

MARRIED 'ON THE WING." A capital story is told by a Texas paper of a runaway match that come off in that State. It seems that a couple had resolved to get married, notwithstanding the opposition of parents and relatives of every degree, and, securing the co-operation of a friendly clergyman, they all three mounted their horses, and set out for a friend's mansion, several miles distant, where the rites could be solemnized without interference. They had not gone far, however, before their flight was discovered; and then there was as much mounting, and racing, and chasing, as occurred on the occasion of "Young Lochinvar's" celebrated elopement with the Netherby maiden. The lovers and their faithful pastor soon heard the noise of approaching pursuers, and gave their horses the spur. But, alas! their enemies were better mounted, and gained fast upon them. It was evident they would soon be captured, when a felicitious inspiration of the maiden came to their aid. "Can't you marry us as we run!" she shouted to the clergyman. The idea 'took,' and the pastor at once commenced the ritual. All parties "covered themselves

> THE NORTH CAROLINA COAL FIELDS .-The question has sometimes been asked. "Is there really coal on the Deep River?" In answer to this question, it is only necessary to state that over \$500,000 have been invested, not in lands for speculation, but in labor and machinery to lay the coal upon the surface. Expectation, based upon the report of Engineers, was, that an outlet by the Cape Fear would be made practicable by the time the Company could be
