Clove Anodyne Toothache Drops.

Those who have felt the painful throbbing and excrutating pangs of a raging toothacke shooting through out of all that have pleasure therein." heir jaws and head with the most tormenting perseverance, and as is often the case, have received but little sympathy from friends, will no doubt be much pleased to know of a remedy that will never fail to quiet the numerciful offender, and leave the teeth, where hey should remain, in the head. The numerous cures it has accomplished are well st-

tested, and it has only to become generally known to be as highly appreciated by the public as it has long been by Dentists.

Prepared and sold by A. B. & D. SANDS. Wholesale Druggists, No. 100 Fulton-st, corner of William, N Y. Roman Eye Balsam, for Inflamed

Eye-Lids.

The delicate structure of the eyelid renders it peculiarly liable to disease. When, from any cause, it becomes affected, the inner membrane rapidly inflames,

gives, upon high authority, a different account tributed to her enjoyment, in the same proportion draft; and races of eattle, replenished by importaluminary that so lately passed away from the sight ness of the beholder.

of the naked eye, though still subject to the obare now so numerous in our own and other lands :

THE COMET.

Now that the Comet has come and gone and may never come back, the Astronomers are telling us what they think of the mysterious stranger. Ladies Morocco Boots, first rate article, at 20 cents ; There is a very interesting article in the last numversity, giving some unexpected information about this Comet. It was seen first on the 2d of last Gents' Shawls, Raglans, Conforts. &c. the sun on the 30th of last September-being then furnace. The path it pursued was on a plane which made an angle of sixty-three degrees with self passed between that of Venus and the Sun. Many persons have supposed that this Comet appeared in the sky in 1264, and again in 1556, aspects of the earth as it lay beneath the mysterious visitor at his several inspections. But this was all poetry of the imagination only. If this Comet ever looked on man before, or ever was looked at by man, this nutual looking has not been within the last twenty-five hundred years, nor will it be until at least twenty-five hundred years more have passed away. As to the mag-

nificent tail of the Comet, not much more is known now of its nature and uses than were before .-tions made on its looks and size, during the last few months. The conclusion towards which they tend now is that, if it is made of matter, it has laws diverse from those that obtain around us, on this earth and our Solar system. Prof. Pierce, assuming that it is a self repellent matter instead of self attractive as ours is, concludes that the curve of the tail is a necessary consequence of this property, and that the curvature is that of one branch of a hyperbola, the sun being in the foc. s of the other branch. The nebulous appendage of this Comet seemed to lie around its head in several distinct layers, separated from each other by dark intervals, and it seems that it did not lie in the plane of the Comet's path. What then is a Comet? What is it for? Where does it come from? Where does it go to? What is it made of? No man knows. Nevertheless one thing we

"Well, Alick, how's your brother Ike getting on these times?" "Oh! first rate. Got a start in the world-married a widow with nine children." A pretty sizeable start that.

"You don't seem to know how to take me," the nose.

So says an orthodox old fogy.

His "estab.i-hment" was upon Pennsylvania rivals to the parent stock. servation of those "light houses of the sky," which avenue, between the National Hotel and the Capitol. Let us approach and look at it. You enter by a door of variegated stained glass,

which, by gas light, reflects all the colors of the rainbow. Ascending a flight of stairs you reach a and a double row of ivory, set in black, which nominally belong to Sambo, but which, in fact, are the property of the proprietor. A glance suffices. You have filled Sambo's eye and are deemed passable. The door is at once opened and you are ushered into the ante-room-the vestibule telescopes, until next January. It was nearest to of hell !--- This room is not large, but elegantly ap which is of solid marble and white as Diana's breast. Here are arranged in long and glistening columns decanters of cut glass, sparkling like brilliants, filled with the choicest nectar, and blushing to the very necks with the glowing vintage of the olden time. If you pass this rubicon without tasting its sparking but dangerous waters, it is not from any dearth of hospitality on the part of your persuasive host, spacious "Sporting hall" is now visible. The floor is covered with carpeting from the Orient, of immense cost and marvellous beauty. The walls are adorned with superb paintings of the old masters and the new, while pendent from the windows hang curtains of embroidered lace, covered with golden tapestry of Oriential magnificence; dark visaged men, who heed you not-their eyes soon make accessible. having another and stronger attraction. One would naturally suppose this to be a theatre for Virginia a spot called the Ice Mountain, from the contrary all is hushed, silent, sepulchral. "No real voice or sound,

Within these cheerless walls are found."

You are oppressed with the fearful stillness and awful silence which prevades the place. A laugh, a joke, or even a curse, would be a sensible relief. But you hear nothing of this. An occasional and life.

An hour's inspection satisfies your curiosity, and you are about taking your departure when a regularly, morning, noon and evening what they will soft hand taps you on the shoulder, and a low voice: entirely consume. Occasionally stir a teaspoonful "Please don't leave, sir, supper will be ready in a of capsieum into their food, and for a change, feed few minutes." At precisely half-past ten o'clock the them boiled potatoes or cooked rice. The course doors of the dining hall are thrown open and "sup-per's ready," proclaims an immediate armistic be-will fatten any fowl or turkey sufficiently for marktween the combatants, and invites to a more et. Persons living in the vicinity of our cities healthy and rational duty. "In a country where human labor is exhorbantly expensive, the greatest ingenuity is exerted in the improvement of tools and the invention of mechanical aids and substitutes, and in this respect the triumphs of American contrivance are door, pull the bell, and instantly a small aperture not only profitable at home, but are recognized and opens, and you are greeted with a pair of red eyes adopted by foreign nations. Much, gentlemen, has been accomplished, and the future will furnish still higher results.

A SINGULAR PRENOMENON .- In the recent

address of Hon. T. L. Clingman before the North Carolina State Fair, he mentions in connexion with the manufacture of wine, and the difficulty on the Atlantic slope of the United States of preventing its acetous fermentation, a remarkable fact concerning a locality of the western part of that State. In a district of a few miles in extent on the Tryon mountain, neither dew nor frost is ever known The same district is remarkable for the variety and excellence of its native grapes, and they are often found in fine condition in the open air as late as December. The dryness of the atmosphere in the locality mentioned, and its equability of temperature are most remarkable, and we should like to know more concerning it .- Washington Union.

It was only a week or two before Mr. Clingman

delivered his address that we heard, for the first with mirrors of mammoth size reflecting your form time, of this remarkable locality. We suppose and features from a score of gleaming embrasures. very few persons had ever heard of it, and fewer Along the hall at convenient distances, are still have visited it.
