MORE ABOUT BROWN.

The New York Tribune has a long letter from a Charlestown correspondent, some paragraphs of parents in Arkansas, having come during the past which we extract:

The idea of CINES, selected with great care and without regard his seizing the Armory for the sake of the weapons it contained, he will not admit. He says he had far better weapons of his own. His occupying it at all was a variation from his original determination. He had decided to take Colonel Washington Churchill's Syrup of the Hypophosphites, Ammon and the other prisoners to Harper's Ferry bridge, and there to establish a commanding position, from which he would insist upon exchanges of slaves for prisoners. In case he should have been dislodged, he would have retreated in haste to the mountains, with the intricacies of which he had made himself so much more familiar than the inhabitants themselves, that he believed he could defy all attempts to apprehend him. He had supposed that, after a few days of successful evasion, he would be joined by hundreds of slaves anxious to escape, by whose aid he could have perfected arrangements for an enormous rescue.
