Americans have been accused of a fondness for making speeches on all occasions, but we do not remember that any one has ever made a speech at a marriage ceremony, as Hon. Wm. E. Gladstone, Premier of England, did at the late wedding of his eldest daughter, when he addressed his guests as follows :

"One might almost suppose it was presumptuous to enter into a vow which, depend upon it, no human power can dissolve or weaken, but it is not presumptuous if it is done in the right spirit. If it be done in humble trust and reliance upon the guidance of Him who alone can direct our steps in the greater transactions of life as in the smaller, it is not presumptuous. But while you consult your parents and seek direction from God, you must also ex- ercise your own judgment, as well as your affections, on deciding as to a man's qualifi- cations for making a good husband. Please allow me here to advise you never to marry an idle or slothful man, though he may be as rich as Solomon. The man who has noth- ing to do, and does nothing, is no account. And his riches will probably soon take wings and fly away, as an eagle towards heaven. The condition and prospects of the wife and children of such a man I will not attempt to describe. Again. Do not marry a young man who is unkind to his mother and sisters. Such a man will be unkind to his wife. And the young man who is kind to his mother and sisters will make a kind husband. Don't marry a man who is fond of a social glass. True piety is of the first importance in a good husband. But it is not all. Good sense, a good education, congeniality of	gone through; so that the man who can accustom himself to take things coolly, which is quite as much a matter of dis- cipline as of nature, and who by keeping well beforehand with what he has to do avoids undue hurry and nervous excite- ment, has a great advantage over one who follows a different practice. Next, I would warn you that those students who think they have not time for bodily exercise will sooner or later have to find time for illness. Thirdly, where an opportunity of choice is given, morning work is generally better than night work; and lastly—a matter which I should not stop to allude to but that I know the dangers of an overdriven existence in a crowded town—if a man cannot get through his day's labor, of whatever kind it may be, without artificial support, it should be a serious considera- tion for him whether that kind of labor is fit for him at all.
