Come to headquarters when you want Bread,

Some new obituary verses have

Cakes, Pies, in fact anything that is good and ckeap. We intend that no one shall sell better or cheaper goods than we do. Come where everybody comes to get bargainsat the Rising Sun, opposite the Market. Nov. 9, 1874. C. S. HOLTON & CO.

THE CLEMMER MILLS,

Near Spencer's Mountain, GASTON COUNTY, Have recently been overhauled and thoroughly repaired, and the services of the old well-known liller (David H.d.

The Devil and the Lawyers.

And in a court house wended his way Just as an attorney, with a very grave face, Was rising to argue the points in a case. Now a lawyer his majesty never had seen, two weeks ago, when it was officially counted :

For to his dominions none ever had been ; And he felt very curious the reason to know Why none had been sent to the regions below.

'Twas the fault of his agent, his majesty thought

That none of these lawyers had ever been caught And for his own pleasure he had a desire To come to the earth and the reason inquire.

Alamance, Alexander, Well, the lawyer who rose with visage so Alleghany, grave Auson, Made out his opponent a consummate Ashe, knave; Beaufort, And the old devil was himself much amused Bertie, To hear the attorney so greatly abused. Bladen, As soon as the speaker had come to a close, Brunswick, The counsel opposing him quickly arose, Bancombe, And heaped such abuse on the head of the Burke, first, Cabarrus,

As made him apear of all villains the worst. Caldwell, Camden, Thus they quarreled, contended, and Carteret, argued so long Caswell, 'Twas hard to determine the one that was Catawba, wrong; Chatham, And concluding he had heard quite enough Cherokee,

of the fuss, Chowan, Old Nick turned away and soliliquized Clay, thing .

Official Vote of North Carolina.

Below we publish the official vote of the State, so that our readers may have it for future reference. It is rather late, but the official vote was not ascertained until the meeting of the Legislature

The stem ordinarily attains only ten or twelve feet in height, but is thirty- four feet in diameter; this immense founda- tion being required to support the foliage which grows upon it. The main branch rises perpendicularly sixty feet, and from it shoot other branches extending horizon- tally fifty or more feet on all sides, and which, being loaded with the most exuberant growth of leaves, forms a verdant crown of sometimes an hundred and sixty feet in diameter; a single tree giving thus the appearance of a forest. It is called by the natives by a name which signifies "a thousand years," which would seem to be in agreement with the calcula- tions of its age by all herbalists. A group of these baobab trees, crowning the sum- mit of its rocks, gives the name to the Cape Verde Isle, "green cape." By the city of Neustadt, in the kingdom of Wurtemberg, there stood a linden tree, which was antique in 1229; for it is writ- ten "that the city Neustadt, then called Helmbundt, was destroyed in 1226 and re- built in 1229, near the great linden." It	good egg is alive. The shell is porous, and the oxygen of the air goes through the shell and keeps up a kind of respiration. An egg soon becomes stale in bad air, or in dry air charged with carbonic acid. Eggs may be dried and made to retain their goodness for a long time, or the shell may be var- nished, which excludes the air, when, if kept in a moderate temperature, they may be kept for years. The French people pro- duce more eggs than any other, and ship millions of them to England annually. Fresh eggs are more transparent at the centre, old ones on the top. Very old ones are not transparent in either place. In water, in which one-tenth of salt has been dissolved, good eggs sink and indifferent ones swim. Bad eggs float in pure water. The best eggs are laid by young healthy hens. If they are properly fed, the eggs are better than if they are allowed to eat all sorts of food. Eggs are best when cooked four mieutes. This takes away the animal taste that is offensive to some, but does not harden the white or yolk as to make them hard to digest. An egg if cooked very hard is difficult of digestion, except by those with stort stomachs; such eggs should be eaten with bread and masticated very fincly. An excellent sandwich can be made with eggs and brown bread. An egg

The stem ordinarily attains only ten or twelve feet in height, but is thirty- four feet in diameter; this immense founda- tion being required to support the foliage which grows upon it. The main branch rises perpendicularly sixty feet, and from it shoot other branches extending horizon- tally fifty or more feet on all sides, and which, being loaded with the most exuberant growth of leaves, forms a verdant crown of sometimes an hundred and sixty feet in diameter; a single tree giving thus the appearance of a forest. It is called by the natives by a name which signifies "a thousand years," which would seem to be in agreement with the calcula- tions of its age by all herbalists. A group of these baobab trees, crowning the sum- mit of its rocks, gives the name to the Cape Verde Isle, "green cape." By the city of Neustadt, in the kingdom of Wurtemberg, there stood a linden tree, which was antique in 1229; for it is writ- ten "that the city Neustadt, then called Helmbundt, was destroyed in 1226 and re- built in 1229, near the great linden." It was so well known that, for centuries, Ger- mans spoke of Neustadt as "the city near the linden." A poem of 1408 describes it as standing near the gate, its branches propped by sixty-seven stone pillars. In 1664 these pillars were increased to eighty-	good egg is alive. The shell is porous, and the oxygen of the air goes through the shell and keeps up a kind of respiration. An egg soon becomes stale in bad air, or in dry air charged with carbonic acid. Eggs may be dried and made to retain their goodness for a long time, or the shell may be var- nished, which excludes the air, when, if kept in a moderate temperature, they may be kept for years. The French people pro- duce more eggs than any other, and ship millions of them to England - annually. Fresh eggs are more transparent at the centre, old ones on the top. Very old ones are not transparent in either place. In water, in which one-tenth of salt has been dissolved, good eggs sink and indifferent ones swim. Bad eggs float in pure water. The best eggs are laid by young healthy hens. If they are properly fed, the eggs are better than if they are allowed to eat all sorts of food. Eggs are best when cooked four mieutes. This takes away the animal taste that is offensive to some, but does not harden the white or yolk as to make them hard to digest. An egg if cooked very hard is difficult of digestion, except by those with stout stomachs; such eggs should be eaten with bread and masticat.d very fincly. An excellent sandwich can be made with eggs and brown bread. Aa egg spread on toast is food fit for a king, if kings deserve any better food than anybody else, which is donbtful. Fried eggs are less wholesome than boiled ones. An egg dropped into hot water is not only a clean and handsome but a delicious morsel. Most people spoil the taste of their eggs by

The best eggs are laid by young healthy hens. If they are properly fed, the eggs are better than if they are allowed to eat all sorts of food. Eggs are best when cooked four mientes. This takes away the animal taste that is offensive to some, but does not harden the white or yolk as to make them hard to digest. An eggifcooked very hard is difficult of digestion, except by those with stont stomachs; such eggs should be eaten with bread and masticated wery finely. An excellent sandwich can be made with eggs and brown bread. An egg spread on toast is food fit for a king, if kings deserve any better food than anybody else, which is donbtful. Fried eggs are less wholesome than boiled ones. An egg dropped into hot water is not only a clean and handsome but a delicions morsel. Most people spoil the taste of their eggs by adding peper and salt. A little sweet butter is the best dressing. Eggs contain much phosphorus, which is supposed to be useful to those who use their brains much.

Cream N'S. E.	scription he was able to arrive at a cor- rect estimate, not only of the length of time which it tock the tree-stem to grow or increase in size, but the exact age of the tree itself, which he puts down at 5,150 years. The stem ordinarily attains only ten or twelve feet in height, but is thirty- four feet in diameter; this immense founda- tion being required to support the foliage which grows upon it. The main branch rises perpendicularly sixty feet, and from it shoot other branches extending horizon- tally fifty or more feet on all sides, and which, being loaded with the most exuberant growth of leaves, forms a vetdant crown of sometimes an hundred and sixty feet in diameter; a single tree giving thus the appearance of a forest. It is called by the natives by a name which signifies "a thousand years," which would seem to be in agreement with the calcula- tions of its age by all herbalists. A group of these baobab trees, crowning the sum- mit of its rocks, gives the name to the Cape Verde Isle, "green cape." By the city of Neustadt, in the kingdom of Wurtemberg, there stood a linden tree, which was antique in 1229; for it is writ- ten "that the city Neustadt, then called Helmbundt, was destroyed in 1226 and re- built in 1229, near the great linden." It was so well known that, for centuries, Ger- maps spoke of Neustadt as "the city near the linden." A poem of 1408 describes it as standing uear the gate, its branches propped by sixty-seven stone pillars. In 1864 these pillars were increased to eighty- two, and, in 1832, to an hundred and six. In 1832 the trank, at the height of six feet from the ground, measured thirty-seven feet, and it was estimated in that year, when a terribe storm rendered it well nigh a wreck, to be over eight hundred yearsold.	good egg is alive. The shell is porous, and the oxygen of the air goes through the shell and keeps up a kind of respiration. An egg soon becomes stale in bad air, or in dry air charged with carbonic acid. Eggs may be dried and made to retain their goodness for a long time, or the shell may be var- nished, which excludes the air, when, if kept in a moderate temperature, they may be kept for years. The French people pro- duce more eggs than any other, and ship millions of them to England . annually. Fresh eggs are more transparent at the centre, old ones on the top. Very old ones are not transparent in either place. In water, in which one-tenth of salt has been dissolved, good eggs sink and indifferent ones swim. Bad eggs float in pure water. The best eggs are laid by young healthy hens. If they are properly fed, the eggs are better than if they are allowed to eat all sorts of food. Eggs are best when cooked four mientes. This takes away the animal taste that is offensive to some, but does not harden the white or yolk as to make them hard to digest. An egg if cooked very hard is difficult of digestion, except by those with stont stomachs; such eggs should be eaten with bread and masticated very finely. An excellent sandwich can be made with eggs and brown bread. An egg appread on toast is food fit for a king, if kings deserve any better food than anybody else, which is doubtful. Fried eggs are less wholesome than bolled ones. An egg dropped into hot water is not only a clean and handsome but a delicions morsel. Most people spoil the taste of their eggs by adding pepper and salt. A little sweet butter is the best dressing. The stem ordinarily attains only ten or twelve feet in height, but is thirty-four feet in diameter; this immense foundation being required to support the foliage which grows upon it. The main branch rises perpendicularly sixty feet, and from it shoot other branches extending horizon-tally fifty or more feet on all sides, and which, being loaded with the most exuberant growth of leaves, forms a verdant crown of sometimes an hundred and sixty feet in diameter; a single tree giving thus the appearance of a forest. It is called by the natives by a name which signifies "a thousand years," which would seem to be in agreement with the calculations of its age by all herbalists. A group of these baobab trees, crowning the summit of its rocks, gives the name to the Cape Verde Isle, "green cape." By the city of Nenstadt, in the kingdom of Wurtemberg, there stood a linden tree, which was antique in 1229; for it is written "that the city Neustadt, then called Helmbundt, was destroyed in 1226 and rebuilt in 1229, near the great linden." It was so well known that, for centuries, Germans spoke of Neustadt as "the city near the linden." A poem of 1408 describes it as standing uear the gate, its branches propped by sixty-seven stone pillars. In 1832 the trank, at the height of six feet from the ground, measured thirty-seven feet, and it was estimated in that year, when a terribe storm rendered it well night a wreck, to be over eight hundred years old.</td> <td>good egg is alive. The shell is porous, and the oxygen of the air goes through the shell and keeps up a kind of respiration. An egg soon becomes stale in bad air, or in dry air charged with carbonic acid. Eggs may be dried and made to retain their goodness for a long time, or the shell may be var- nished, which excludes the air, when, if kept in a moderate temperature, they may be kept for years. The French people pro- duce more eggs than any other, and ship millions of them to England . annually. Fresh eggs are more transparent at the centre, old ones on the top. Very old ones are not transparent in either place. In water, in which one-tenth of salt has been dissolved, good eggs sink and indifferent ones swim. Bad eggs float in pure water. The best eggs are laid by young healthy hens. If they are properly fed, the eggs are better than if they are allowed to eat all sorts of food. Eggs are best when cooked four mieutes. This takes away the animal taste that is offensive to some, but does not harden the white or yolk as to make them hard to digest. An eggifcooked very hard is difficult of digestion, except by those with stont stomachs; such eggs should be eaten with bread and masticated which is donbtful. Fried eggs are less wholesome than bolled ones. An egg dropped into hot water is not only a clean and handsome but a delicions morsel. Most people spoil the taste of their eggs by adding pepper and salt. A little sweet butter is the best dressing. Eggs contain much phosphorns, which is supposed to be useful to those who use their brains much.</td>	1434 336 830 838 22 206 347 631 3843 2380 947 353 1949 1294 1319 866 372 98648 Pool ncludes th ich were ng official, otes in C y of 14,08 d Chee lot of e AUGHLI K S' PHIF FIONER CLES, M AL INST ICTURE d to the o nacs. E.</td> <td>scription he was able to arrive at a correct estimate, not only of the length of time which it tock the tree-stem to grow or increase in size, but the exact age of the tree itself, which he puts down at 5,150 years. The stem ordinarily attains only ten or twelve feet in height, but is thirty-four feet in diameter; this immense foundation being required to support the foliage which grows upon it. The main branch rises perpendicularly sixty feet, and from it shoot other branches extending horizon-tally fifty or more feet on all sides, and which, being loaded with the most exuberant growth of leaves, forms a verdant crown of sometimes an hundred and sixty feet in diameter; a single tree giving thus the appearance of a forest. It is called by the natives by a name which signifies "a thousand years," which would seem to be in agreement with the calculations of its age by all herbalists. A group of these baobab trees, crowning the summit of its rocks, gives the name to the Cape Verde Isle, "green cape." By the city of Nenstadt, in the kingdom of Wurtemberg, there stood a linden tree, which was antique in 1229; for it is written "that the city Neustadt, then called Helmbundt, was destroyed in 1226 and rebuilt in 1229, near the great linden." It was so well known that, for centuries, Germans spoke of Neustadt as "the city near the linden." A poem of 1408 describes it as standing uear the gate, its branches propped by sixty-seven stone pillars. In 1832 the trank, at the height of six feet from the ground, measured thirty-seven feet, and it was estimated in that year, when a terribe storm rendered it well night a wreck, to be over eight hundred years old.</td> <td>good egg is alive. The shell is porous, and the oxygen of the air goes through the shell and keeps up a kind of respiration. An egg soon becomes stale in bad air, or in dry air charged with carbonic acid. Eggs may be dried and made to retain their goodness for a long time, or the shell may be var- nished, which excludes the air, when, if kept in a moderate temperature, they may be kept for years. The French people pro- duce more eggs than any other, and ship millions of them to England . annually. Fresh eggs are more transparent at the centre, old ones on the top. Very old ones are not transparent in either place. In water, in which one-tenth of salt has been dissolved, good eggs sink and indifferent ones swim. Bad eggs float in pure water. The best eggs are laid by young healthy hens. If they are properly fed, the eggs are better than if they are allowed to eat all sorts of food. Eggs are best when cooked four mieutes. This takes away the animal taste that is offensive to some, but does not harden the white or yolk as to make them hard to digest. An eggifcooked very hard is difficult of digestion, except by those with stont stomachs; such eggs should be eaten with bread and masticated which is donbtful. Fried eggs are less wholesome than bolled ones. An egg dropped into hot water is not only a clean and handsome but a delicions morsel. Most people spoil the taste of their eggs by adding pepper and salt. A little sweet butter is the best dressing. Eggs contain much phosphorns, which is supposed to be useful to those who use their brains much.</td>	1434 336 830 838 22 206 347 631 3843 2380 947 353 1949 1294 1319 866 372 98648 Pool ncludes th ich were ng official, otes in C y of 14,08 d Chee lot of e AUGHLI K S' PHIF FIONER CLES, M AL INST ICTURE d to the o nacs.
