Every man who has clerks in his employ ought to know what their sleeping habits are. The young man who is up till two, three and four o'clock in the morning, and store at nine or ten o'clock, and work all by some delusive stimulus. It is in this way that many a young man begins his course to ruin. He need not necessarily have been in bad company. He has lost his sleep; and losing sleep is losing strength and grace. Here is the outline of the history of a suicide within my own knowledge: A young man, a stranger in New York, in a good situation, in a large boarding-house, has pleasant young companions; spends his evenings out; goes to midnight parties, from eleven to seven; if his nerves become disturbed, then a little drink; a little mistake in business-another drink; reproof from employer-more drink; more mistakes, loss of situation, no help from frivolous companions, money all gone, then turned out of the boarding-house, wandering in the street, mortification, desperation-Now, it does not always come to this; but all people who are losing sleep are somewhere along this line. They are somewhere in the rapids. We must begin a reform in this department.
