plaintiffs had no case at all. Their suit

was shown to be unfounded and frivolous,

and Johnson grass conquered with great

carnage. And truly, considering the mat-

ter seriously, it would have been a very

unwholesome spectacle if the case had

COTTON SEED OIL IN COOKERY .-- We

have tested the refined cotton seed oil, as

a substitute for hog's lard, and we pro-

nounce it a complete success. On the

morning of the election we ate as nice bis-

cuits, in which the cotton seed oil was

now declare we take no more lard in ours.

The oil is clearer and cheaper than lard

and has a better flavor. Housewives and

cooks will understand what we mean by

cheaper when we tell them that a gallon

of oil can be bought for \$1.00 and that a

tablespoonful is enough to put in a pint of

flour for making biscuit. For frying fish

or steak the cotton seed oil is superior to

anything we have ever seen used in this

country. The discovery of the utility of

the oil is destined to prove a bonanza to

the South. The seed will, in time, become

as valuable as the lint, and if we can only

establish manufactories in our own section,

which will work up the fleecy staple, the

seed and even the fiber on the stalk, it will

not be many years before the cotton section

	Be thou their angel in a paradise !
	Such mother-love divine-divine its price !
	AN EVIDENCE OF CIVILIZATIONGood
	roads are evidences of civilization.
	Judged by the standard of the roads in
	the South we give faint evidences of a
rs	high order of civilization. While the
	South has made progress in many direc-
their	tions, in the matter of roads, she is far
	back in the ages. The road laws as they
	exist upon our Statute books, and are ex-
	ecuted, are a farce and an imposition.
	Little practical good is accomplished by
	the working of our roads. The people are
	taxed indirectly in the difficulty of trans
	portation, and the damage to vehicles
	over bad roads as well as by taking from
	the farm the force at inopportune times, and without material benefit. Better
ecialty.	and without material benefit. Better
	levy a direct tax and have the roads con
	structed under the direction of a skilled
	engineer in a thorough manner. The con
	vict force should be utilized in this way
	in each county. In this way we can se
	cure good roads at actually a lesser rate
en.	of taxation.
	Adjutant-major Gaumet, of the
	Adjutant-major Gaumet, of the
	twenty-seventh Regiment of France, has patented an instrument, which he calls

It is a wonderful looking object in the telescope, and every increase of magnifying power brings to view spots A STRANGE PHENOMENON .- The Ralnot seen before, and complicated details eigh Observer says: In a private letter of structure. Besides the large group from Judge Gilliam dated at Waynesville, there is a belt of smaller spots extending completely across the central portion of the sun.-N. Y. Sun.

> A REMARKABLE DEATH SCENE.-William Hall, writing to the Wilkesboro Index, from Hall's Mill, makes this remarkable statement concerning the death of Mrs. William Rose, near the Horse Gap:

"While many friends were standing round her bed watching the approach of death, there came a light and went under her bed and up on the opposite side and over the bed and she became as bright as the sunshine, and as the breath left her the light went upwards."

This super-natural occurrence seems to be vouched by Mr. Hall, as a verity, and his report of it is entitled to credence, for the occasion was too solemn for levity and a sensational story.-Statesville American.

The Government method prescribed for cleaning brass, and in use at all the United States arsenals, is claimed to be the best in the world. The plan is to make a mixture of one part common 3. Keep your lands well up to a good nitric acid and one-half part sulphuric acid in a stone jar, having also ready a pail of fresh water and a box of sawdust. The articles to be treated are dipped into finally rubbed with saw-dust. This immediately changes them to a brilliant color. If the brass has become greasy, it is first dipped in a strong solution of potash and soda in warm water; this cuts the grease, so that the acid has free power to
