OF
VALUABLE FARMING LANDS!
By virtue of a decree of the Superior Court in the case of Elizabeth Wilson et al., against Lena May Morton et al., heirs-at-law of McWilliam Miller, deceased, I will sell for partition on Monday, 3d of March, 1884, at the Court House door in the city of Charlotte, at 12 o'clock, M., all the real estate of the late McWilliam Miller, embracing six Tracts of LAND in Graham Township, in Mecklenburg county, on the waters of Reedy Creek, between 500 and 900 Acres.

GOING AWAY.
Do not be angry with me,
For an idle word I say;
Do not be angry, father,
Because I am going away.
Have patience with me, my mother,
Though I may have none with you;
But I love you, I love you, mother,
Whatever I may do.
Look kindly upon me, sister,
You are beautiful and gay;
Your days will be long and happy,
But I am going away.
With me, if you could but read it,
Clear written on check and brow.
There is no past, no future—
Only a brief calm now;
A little space to be glad in,
A lesser space to grieve;
And life's whole scene fades from me,
As the landscape fades at eve.
Except—that ere I shall see not,
My day is ended at noon;
And the saddest bit of the story
Is—It does not end too soon.
I am so weary, weary!
I could turn my face to the wall;
Like a sick child, long before bedtime,
Drop asleep among you all;
So glad that lessons are over,
Still gladder that play is done;
And a dusky curtain stretches
Between me and the sun.
Good-by, my father and mother!
Two of you—and but one of me!
And, sister, you'll find some stranger
Much closer than I could be;
One more—but his wife's quite teaching
Is making me lowly die;
My heart, too poor for his keeping—
Thou, God, thou wilt not despise;
My soul, too weak for earth's battle,
Thou wilt guard up above;
And the angels shall see me doing
The work I was meant to do;
The work that I ever failed in,
And wept o'er and tried again,
Till brain and body and spirit
Snapped under the cruel strain.

RESPECT DUE TO WIVES.
Do not jest with your wife upon a subject in which there is danger of wounding her feelings. Remember that she treasures every word you utter. Do not speak of great virtues in another man's wife, to remind your own of a fault. Do not reproach your wife with personal defects, for if she has sensibility, you inflict a wound difficult to heal. Do not treat your wife with inattention in company; it touches her pride, and she will not respect you more or love you better for it. Do not upbraid your wife in the presence of a third party; the sense of your disregard for her feelings will prevent her from acknowledging her fault. Do not attempt to entertain your wife by praising the beauty and accomplishments of other women. If you would have a pleasant home and a cheerful wife, pass your evenings under your own roof. Do not be stern and silent in your own house, and remarkable for sociability elsewhere.

THE SWINE WEATHER THEORY.
Saturday, Feb. 2d, was Candlemas day, and the ground hog, in accordance with time-honored tradition, says the Baltimore Sun, came out of his winter quarters to inspect the weather and see if he should retire again for six weeks to avoid the rigors of winter or stay out and enjoy the salubrious air and gentle breezes of a moderated season. There is a universal superstition throughout Christendom that good weather on this day indicates a long continuance of winter and a bad crop, and that its being foul is, on the contrary, a good omen. The ground hog has been credited since pagan times with the ability to discern by an observation on Candlemas day the quality of the weather for the balance of the winter. If when he comes out to make his meteorological examination he sees his shadow he returns to his hole for six weeks. If he does not see his shadow he stays out, thus proclaiming to all men that the winter is nearly over. Saturday he was drawn out and hastily retreated, thus demonstrating to many people the continuance of winter weather for six more weeks.

CHARLOTTE LAND FOR SALE.
On 15th of February, at Court House, 60 Acres, where Joe Or now lives, only 2 miles from the city, on Lawyer's Road.
Terms cash, or good bankable paper.

THE HIGH SHOALS LANDS
IN MARKET.
The High Shoals Lands, about 12,000 Acres, have just been surveyed and laid out into some SIXTY-ODD FARMS of convenient size, a Map which, with the location and boundaries of each lot, may be seen by calling on Mr. Thomas Grier, Charlotte, N. C., who will inform buyers of the price of each lot and terms of Sale. A like Map will soon be hung up in the Court House in Dallas, for public inspection.

Special Bargains
IN
REAL ESTATE.
One Hundred and Eighty Acres, in a mile and a quarter from the Court House, with good Dwelling House of eight rooms, and other fixtures of a well appointed farm. Uplands and lowlands both of good quality.

THE SPRING TERM
OF THE
Charlotte Female Institute
Begins January 28th and continues 20 weeks. This Institute is not surpassed in any respect by any first-class Institute in the South. Its Professor of Music and the Instructors in Fine Arts, are of unequalled ability and success in their several departments. The graduates in music of this Institute attain to a standard of taste and culture rarely reached in any school. It is an Art, with no more time devoted to it than in other schools, have given in both North and South Carolina such exhibits of their work as have never been equaled elsewhere in the South.

OUR FALL AND WINTER STOCK
Boots, Shoes, Hats, Trunks, and Valises.
In now complete, and was manufactured to our order for retail trade.

EXECUTOR'S NOTICE.
Having qualified as Executor of the late Hampton B. Hammond, I hereby notify all persons having claims against the estate of the said deceased, to present the same, properly authenticated, on or before the 28th day of January, 1885, or this notice will be pleaded in bar of their recovery; and those indebted to said deceased are requested to make immediate payment.

THE NOISE OF THE FINGERS.
When you poke the end of your finger in your ear, the roaring noise you hear is the sound of the circulation in your finger, which is the fact, as any one can demonstrate for himself by first putting his fingers in his ears, and then stopping them up with other substance. Try it, and you will find that the points of your fingers are such busy workshops that they roar like a small Niagara. The roaring is probably more than the noise of the circulation of the blood. It is the voice of all the vital processes together—the tearing down and building up processes that are always going forward in the living body, from conception down to death.

It is the voice of all the vital processes together—the tearing down and building up processes that are always going forward in the living body, from conception down to death.

THE NOISE OF THE FINGERS.
When you poke the end of your finger in your ear, the roaring noise you hear is the sound of the circulation in your finger, which is the fact, as any one can demonstrate for himself by first putting his fingers in his ears, and then stopping them up with other substance. Try it, and you will find that the points of your fingers are such busy workshops that they roar like a small Niagara. The roaring is probably more than the noise of the circulation of the blood. It is the voice of all the vital processes together—the tearing down and building up processes that are always going forward in the living body, from conception down to death.
