

POETRY.

From the Episcopal Recorder.
THE LOVED AND LOST.
Time hath not power to bear away,
Thine image from the heart;
No scenes that mark life's onward way
Can bid it hence depart.
Yet, while our souls with anguish rivers,
Mourn, loved and lost, for thee,
We raise our tearful eyes to Heaven,
And joy that thou art free.

We miss thee from the band so dear
That gathers round our hearth,
We listen still thy voice to hear
Amid our household mirth:
We gaze upon thy vacant chair,
Thy form we seem to see,
We start to find thou art not there,
Yet joy that thou art free.

A thousand old familiar things,
Within our childhood's home,
Speak of the cherished, absent one,
Who never more shall come.
They wake with mingled bliss and pain,
Fond memories of thee:
But would we call thee back again?
We joy that thou art free.

Amid earth's conflict, we and care,
When our dark path appears,
Thou sweet to know thee cannot share,
Our anguish and our tears;
That on thy head no more shall fall
The storms we may not flee,
Yes safely sheltered from them all,
We joy that thou art free.

For thou hast gained a brighter land,
And death's cold stream is past—
Thine are the joys, at God's right hand,
That shall forever last:
A crown is on thy angel brow,
Thine eye the King doth see,
Thy home is with the seraph now—
We joy that thou art free!

MISCELLANY.

PROGENY OF MEN OF GENIUS.

A writer in the London Quarterly gives the following remarkable array of facts in relation to the family history of men eminently distinguished for intellectual attainments. The remarks occur in an extension of the right of property of authors in their productions—a bill for that purpose having been under discussion in the British Parliament: "We are not going to speculate," he says, "about the causes of the fact—but a fact it is, that men distinguished for extraordinary intellectual power of any sort, very rarely leave more than a very brief line of progeny behind them. Men of genius have scarcely ever done so, men of imaginative genius, we might say, almost never. With the one exception of the noble Surrey, we cannot at this moment point out a representative in the male line, even so far down as in the third generation of any English Poet, and we believe the case is the same in France. The blood of beings of that order can seldom be traced far down even in the female line.—With the exception of Surrey and Spencer, we are not aware of any great English author of all remote date, from whose body any living person claims to be descended. There is no other real English Poet prior to the middle of the eighteenth century, and we believe no great author of any sort, except Clarendon and Shaftsbury, of whose blood we have any inheritance amongst us. Chaucer's only son died childless. Shakespeare's line expired in his daughter's only daughter. None of the other dramatists of that age left any progeny—nor Raleigh, nor Bacon, nor Cowley, nor Butler. The grand-daughter of Milton was the last of his blood. Newton, Locke, Pope, Swift, Arbuthnot, Hume, Gibbon, Cowper, Gray, Walpole, Cavendish,—and we might greatly extend the list—never married. Neither Bolingbroke, nor Addison, nor Warburton, nor Johnson, nor Burke, transmitted their blood.—M. Renouard's last argument against a perpetuity in literary property is, that it would be founding another noblesse. Neither jealous aristocracy nor envious jacobinism need be under much alarm. When a human race has produced its "bright consummate flower" in this kind, it "seems commonly to be near its end." Poor Goldsmith happily has been mentioned in the above list. The theory is illustrated in our own day. The two greatest names in science and literature of our time were Davy and Sir Walter Scott. The first died childless. Sir Walter left four children, of whom three are dead, only one of them. (Mrs. Lockhart) leaving issue, and the fourth (his eldest son) though living, and long married, has no issue. These are curious facts.

To the man from whom death has torn every green tie which bound him to existence as to a blessing; who passes through life with the corroding knowledge, that in the peopled earth there is not one to care for him, and the blighted affections of whose heart form nothing but a sacred tomb for the memory of the departed—to such a man, the artificial though bright smiles—the heartless, though glittering courtesies of the world are but what the bag of pearls was to the famishing wanderer of the desert; and as the one would have willingly given his beautiful treasure for a morsel of bread, so would the other exchange all those flattering attentions for a single smile, whose sunny being would be drawn from the fountain of love.

A paddy who had just set foot in America was travelling in the western country and met a ragged boy, who stammered most prodigiously. The latter stammered out an inquiry respecting the right road to town, which took ten minutes to get through with; Paddy standing with his mouth wide open—"Now," says he, "what the d—l are ye, a rattle-snake or a nugar."

An old bachelor says, "If you see a man or woman, with little or no occasion, often finding fault and correcting one another in company, you may be sure they are man and wife."

A READY REPORT.—A drunken lawyer going into a church, was observed by the minister, who addressing himself to him, said, "I will bear witness against that sinner at the day of judgment." The lawyer shaking his head with drunken gravity, replied—"I have practised twenty years at the bar, and always found that the greatest rascal is the first to turn State's evidence."

VALUABLE LAND AT PRIVATE SALE.

THE Subscriber wishing to sell a part of his lands, now offers for sale a valuable Tract of Land, with good improvements,
CONTAINING 425 ACRES,
of which there is 150 acres in cultivation, of which there is 50 acres in Cotton, and the balance timbered land. Also, is on the lands a new Grist MILL and COTTON GIN propelled by water power. The above land is situated in Mecklenburg County, on Mallard Creek 7 miles Northeast of Charlotte, and inferior to none in this section of the country, for the production of Cotton, grain, &c. As to the location of the above described lands, as respects the abundance of good water, health, and fertility of soil combined, it cannot be exceeded in the country. As I am determined to sell, I would respectfully invite those who wish to make a purchase of such as is above described, to call and view the land and judge for themselves. Terms of payment made easy.

NEW STEAM-BOAT LINE

A Steam Boat-Line has been formed in connection with the new Steam Boat "Utility," and a set of new Boats at present three in number, others will be added as the business may require. The Utility was built in Wilmington in 1841, and draws when empty but 19 inches water. She carries 500 Bales of Cotton and draws then but little over three feet.
Country merchants who may wish to get their Goods up in the Summer and early in the Fall when the River is generally low, will find it to their advantage to patronize this. Several forwarding Merchants and other residents of Cheraw and other places are interested, and feel confident that they can hold out such inducements to the back country as will be beneficial to all concerned. The business will be done principally by towing lighters which will insure a passage while there is two feet water in the channel.
B. BRYAN & BRO., Agents.

From the Transcript, (Charlotte) of March 31, Charleston, S. C., Feb. 28, 1842.

This is to all whom it may concern—we, the undersigned, William Bird, Joseph Addison, and James Marsh, junior, shipwrights of the above named city, by the request of John Kirkpatrick, repaired on board of the Steamer Utility, commanded and owned by the said Kirkpatrick, and after a full examination of the hull and construction of the said Steamer Boat Utility, are of unanimous opinion that the said Steamer Boat Utility is in every respect suitable and strong enough to navigate any River or Rivers, and capable of carrying five hundred or more bales of cotton.

To which we have fixed our names and seals this 25th February, 1842.

JAS. MARSH, Jr. [Seal.]
Charlotte, Feb. 28, 1842.

I do hereby certify that I was Pilot on board the Steamer Boat Utility, and that the said boat was exposed to a heavy sea during the passage between Wilmington and Charleston without receiving any damage. I do also certify that she did not work or show any signs of weakness, and that she was not pumped out during the time I was on board of her.

IMPOTANT WORK.
Now in Press, and will shortly be published, a Dictionary of

ARTS, MANUFACTURES, AND MINES.
BY ANDREW URE, M. D., F. R. S., &c.
Illustrated with 1,241 Engravings!

THIS is, unquestionably, the most popular work of the kind ever published, and a book most admirably adapted to the wants of all classes of the community. The following are the important objects which the learned author endeavors to accomplish—

- 1st. To instruct the Manufacturer, Metallurgist, and Tradesman, in the principles of their respective processes, so as to render them, in reality, the masters of their business; and to emancipate them from a state of bondage to such as are too commonly governed by blind prejudice and vicious routine.
- 2dly. To afford Merchants, Brokers, Drysalers, Druggists, and Officers of the Revenue characteristic descriptions of the commodities which pass through their hands.
- 3dly. By exhibiting some of the finest developments of Chemistry and Physics, to lay open an excellent practical school for students of these kindred sciences.
- 4thly. To teach Capitalists, who may be desirous of placing their funds in some productive branch of industry, to select judiciously, among plausible claimants.
- 5thly. To enable gentlemen of the Law to become well acquainted with the nature of those patent schemes which are so apt to give rise to litigation.
- 6thly. To present to Legislators such a clear exposition of the staple manufactures, as may dissuade them from enacting laws, which obstruct industry, or cherish one branch of it, to the injury of many others.

And, lastly, to give the general reader, intent, chiefly, on Intellectual Cultivation, views of many of the noblest achievements of science, in effecting those grand transformations of matter to which Great Britain and the United States owe their paramount wealth, rank and power among the nations of the earth.

The latest Statistics of every important object of Manufactures are given from the best, and usually from the Official authority, at the end of each article.

The Work will be printed from the second London Edition, which sells for \$12 a copy. It will be put on good paper, in new brevity type, and will make about 1400 pages. It will be issued in twenty-one semi-monthly numbers, (in covers) at twenty-five cents each, on delivery.

To any person sending us five dollars, at one time in advance, we will forward the numbers by mail, post paid, as soon as they come from the press.

To suitable agents this affords a rare opportunity, as we can put the work to them on terms extraordinarily favorable. In every manufacturing town, and every village, throughout the United States and Canada, subscribers can be obtained with the greatest facility.—Address, post paid, Le Roy Sunderland, 125 Fulton street, New York.

To every editor who gives this advertisement twelve insertions, we will forward to order, one copy of the whole work, provided the papers containing this notice be sent to the New York Watchman, New York.

THE CHICORA, OR MESSENGER OF THE SOUTH.

UNDER this title, the Subscribers propose publishing in the City of Charleston a WEEKLY PAPER to be devoted to LITERATURE, SCIENCE, THE ARTS, MECHANICS, AGRICULTURE, EDUCATION, and GENERAL INTELLIGENCE—in a word, to whatever may impart instruction or afford amusement to each class, profession or calling of our people. In politics and religion, the *Chicora* will occupy strictly neutral ground; yet sufficient attention will be paid to both, to enable the reader to learn how prospers the religious and political condition of the country.

A paper devoted to the purposes above stated, has long been a desideratum at the South; and it is to meet this, that *The Chicora* is now proposed to be issued. The Subscribers are aware their promises may appear too confident, after the repeated failure of Southern periodicals; but they beg leave to say, that so complete are the arrangements they have made—so extensive the correspondence they have secured—so valuable the aid, both of Northern and Southern talent they have enlisted—that with the kindly feelings and liberal patronage of the South, they have no fears for the result.

The Literary Department of the *Chicora* will be supplied with articles of rare and substantial merit, with reviews and critiques of all the new works of the day, and with original tales, sketches, works of fiction, biographies and poetry from the pens of several of the most gifted authors, both of the North and South.

The Scientific and Mechanical Department will be enriched with essays and illustrations from individuals high in public estimation, as thoroughly practical men, which, together with the Agricultural communications already secured to the paper from various portions of the country, will form a compendium of useful instruction invaluable to the artisan and the planter.

In this Department of *General Intelligence*, the subscribers believe the *Chicora* will take a stand which will not be surpassed by any Journal of the Union. As one of the subscribers will make it his constant business to visit every section of our country; and through means of an extensive acquaintance already possessed in the cities of our seaboard and the West, a weekly correspondence will be established with Boston, New-York, Philadelphia, Baltimore, Washington, Cincinnati and New-Orleans, through which will be obtained, not only the earliest information in regard to all foreign and domestic matters of importance, Prices current of Southern products and monetary affairs of moment in the different States, but also the opinions of judicious men in regard to Commercial prospects, and matters of an economical, civil, and political character. Nor, since

Alittle folly now and then, Is relished by the wisest men,
do they intend to exclude those lighter articles of information, familiarly designated the chit chat of the day, which, while they may serve to amuse a weary or listless hour, have at the same time the higher effect of acquainting us with the character and customs of our Northern and Western neighbors, and connecting more closely the bonds of unity between us.

Feeling assured then, of their ability to meet the wishes of the Southern community, and to establish a paper on the most approved, useful and popular plan, and hereby pledging themselves that no exertion shall be wanting on their part, not only fully to redeem, but even to exceed the promises they make, they respectfully solicit the patronage of the good people of South Carolina and her sister States.

The *Chicora* will be printed on an imperial sheet, of the very best paper and type, and shall be embellished with portraits of our distinguished men, and views illustrative of our scenery. The price will be \$5 per annum, payable upon the delivery of the first number.
