THE FALLEN LEAVES. We stand among the fallen leaves, Young children at our play, And laugh to see the yellow things Go rustling on their way; Right merrily we hunt them down, The autumn winds and ave, Nor pause to gaze where snow-drifts lie, Or sunbeams gild-the tree. With dancing feet we leap along Where withered boughs are strewn, The past nor future checks our song-

The present is our own. We stand among the fallen leaves, In youth's enchanted spring-When hope (who wearies at the last) First spreads her eagle wing. We tread with steps of conscious strength Beneath the leafless trees, And the color kindles on our cheek As blows the winter breese; While gazing toward the cold, gray sky, Cloud d with snow and rain, We wish the old year all past by, And the young spring again.

We stand among the fallen leaves, In manhood's haughty prime-When first our pausing hearts begin To love "the olden time;" And, as we gaze, we sign to think How many a year bath passed, Since 'neath these cold and faded trees Our footsteps wandered last; And old companious -- now, perchance, Estranged, forgot or dead-Come round us, as those autumn leaves Are crushed beneath our tread.

We stand among the fallen leaves. In our own autumn day-And tottering on with feeble steps, Pursue our cheerless way. We look not back-too long ago Hath all we loved been lest; Nor forward-for we may not live To see our new hope crossed; But on we go-the sun's faint beam A feeble warmth imparts-Childhood without its joy returns ---The present fills our heart!
