

North Carolina Whig.

CHARLOTTE:

WEDNESDAY, June 1, 1853.

EDWARD THOMPSON, Esq., is our agent in Baltimore, authorized to obtain advertising and subscriptions, and to grant receipts.

EDWARD CARR, Esq., is our agent in Philadelphia, authorized to obtain advertisements and procure subscriptions.

EDWARD V. PALMER, Esq., is our authorized agent to receive advertisements and subscriptions at his offices in Boston, New York and Philadelphia.

FOR CONGRESS,
JAMES W. OSBORNE,
MECKLENBURG COUNTY.

CANDIDATE FOR CLERK.

The friends of WM. K. REED, take great pleasure in announcing his name to the People of the County of Mecklenburg, as a candidate for the Office of County Court Clerk, at the ensuing August Election.

Land for Sale.

Will our readers have the kindness to examine an advertisement in this paper for the sale of a cotton farm, by the junior Editor of this paper?

EDWARD See advertisement relative to Plank Road Contracts.

EDWARD The following notice reached us too late for last week's paper, we therefore give it a prominent place this week. The Fayetteville Observer and Chester Standard and Yorkville papers are also requested to publish it.

A Friend in need is a Friend indeed.

We thank our friend William Johnston, Esq., of this town for a nice little sack of superfine flour, manufactured at his mill near Morristown, Tenn. in the lower part of this country. The mill understand his recently undergone a thorough state of repairs, and now turns off as fine flour as the best mills in the country. Whether our little town has still to offer, we shall expect to live high at our house. But after that, oh!

The Celebrated Hobbs Lock.

Mr. J. W. Newell of New York, is now in our town exhibiting the celebrated Hobbs Lock, which received the prize Medal at the World's Fair, in London, is now making so much noise in Europe, and secures the million visits of the Bank of England, Mr. Robert Newell of Broadway, New York, is the original inventor and patentee of this wonderful invention, which is now exhibited under the name of Newell's Parastrophic Bank Lock. It would take a volume to describe its mechanism, but a wonderful combination is such as to defy the moral power of its ever being picked—Mr. Newell, the genial, is visiting the country for the purpose of supplying the Banks with this great money barrier, and we thank the Bank of Charlotte would do well to patronize the invention.

Examination at Providence.

An examination of the Providence Academy, Mr. Kykendall's, will take place on the 6th and 10th of June next. Parents and guardians and all others friendly to education, are invited to attend. The next session will commence on the 27th of June.

Carolina Female College.

We have received a catalog of the Trustees, Faculty and Students of the above institution. It is located near Wedowee, in Union county, and the present number of students this session is 105. Rev. Tracy R. Welsh is the President.

EDWARD McRae has been appointed by the President General to Paris. The Wilmington Herald makes the following remarks relative to this appointment:

CAUSE AND EFFECT.

Suppose Mr. McRae had not come out for Congress as a competitor with Mr. Ashe; and stated the reason were the *Local Question*, do you suppose he would have been chosen?—as was the Ad. resolution. Hence this eager desire to silence the press, and to prohibit the circulation of the *Advertiser* in the District to the enemies of France. For suppose no one would oppose. But the Administration are very much in favor of the *Advertiser* and *Journal*. That they would have been chosen, and Mr. Ashe plainly manifested his own mortification at his unfortunate situation.

The apprehension of dangers from extended territory, unpopulated States, accumulated wealth and augmented population, has proved to be unfounded.

With an experience thus suggestive and cheering, the policy of my administration will not be contradicted by any kind of forebodings of evil from experience. Indeed, it is not to be disguised that our state, as it is, is in a position to sustain the *Advertiser* in the acquisition of *new possessions*, and *not* *with our jurisdiction*, eminently important for our protection; if not, in the future, essential to the preservation of the rights of commerce and the peace of the world.

Mr. Ashe had placed himself on the *Advertiser* as his platform, and he was now fully committed to go for all that it demanded. The phrase "certain possessions, not within our jurisdiction," was insufficient to cover all cases.

Ordered that the proceedings of this Anniversary be published in the newspaper of Charlotte.

The meeting was closed with prayer by the Rev. Prof. J. R. Gilliland.

self with now, in order to carry on, on a larger scale. Miller and James were practicing law, and printing the "Rowan Whig."

The town itself is evidently on rising ground, and if our citizens don't look out William Murphy will knock the "stems" off of "Granite Row" and Springs and Williams too. He is building a large three story brick building, presenting a splendidly finished granite front, of superb material, of more than one hundred feet, by seventy feet of brick.

If all be true that we hear, the merchants there are selling large quantities of goods. We hear of one who sold to one man sixteen hundred dollars worth in one day. Of another who sold to the amount of five thousand dollars worth in one day. But our informant may have been "romancing." Allowing this to be so, we nevertheless saw the usual indications of a prosperous business.

Here laden ears with thundering wagons meet. Wheels clash with wheels, and for the narrow street!

Judge Caldwell presided in the Court, and cast off a great amount of business from the dockets, but with the exception of the case of Hall against Martin from Davis, which was to have been tried Friday after we left, the case of any great magnitude occupied the deliberations of the Court.

The people of the county of Rowan constitute the most healthy, sturdy, looking set of farmers, the citizens of the town are not over enterprising, but polite and courteous in the genuine acceptation of these terms.

Not concluding this hasty sketch, we wish to make a few remarks of a lower order of being, which we saw and heard of there. We saw in Dr. James' stable yard a tremendous ox; so large indeed, that we will not attempt to describe him, except to say that we seemed to be to him "As huge as high Olympus."

The sheet was sixteen inches old, in common growing order, and weighed six hundred pounds, or eight hundred.¹ Dr. James expects by Fall to make him weigh eight hundred.² He is a cross of the White Grazier, the Berkshire, and the Kennelbees.

The Dr. had just sold a horse, which was said to possess as fine a pair of manes as ever we saw, and heard of there. We saw in Dr. James' stable yard a tremendous ox; so large indeed, that we will not attempt to describe him, except to say that we seemed to be to him "As huge as high Olympus."
