☞ THE CHEST. ☜

SIR ASTLEY COOPER, BART., M. D.,
THE EMINENT MEDICAL PRACTITIONER,

HAS left a valuable legacy to the world in his great PREVENTIVE of CONSUMPTION, and UNFAILING CURE for PULMONARY DISEASES, without the use of medicine. Sir A. Cooper, during his life, invented and advised the use of the

MEDICATED
FUR CHEST PROTECTOR!

To all persons of all ages and conditions, as a certain and sure shield against those fearful diseases, Consumption, Bronchitis, Asthma, Coughs, Colds and other affections of the Lungs, which arise from the exposed state of the chest, according to fashion, and the continual changes of our climate.

"The Protector" is simply a flannel, by means of fur, lined with silk and quilted, which, suspended from the neck, covers the chest in so agreeable a manner that, once worn, it becomes as necessary and a comfort.

"The Protector," although but recently introduced into America, is making rapid progress through the United States, the Canadas, South America, and the West Indies. It has for a long time been a staple article in England and on the continent of Europe, while it was grown in many countries to the position of an article of dress.

To demonstrate these facts, inquire of any English resident in your vicinity of the knowledge of the beneficial effects of wearing the Protector, without recourse to doctoring of any kind. The cost of wearing these articles is a mere trifle, and one will last some years. No one who values the health of himself or his family will be without them. The hospitals in this country are not alone recommending them, but repeals intervening them. Harcourt & Co., of London and Manchester, England, were originally interested with the manufacture of these articles, by the inventor Dr. Cooper, and continue to manufacture according to his original instructions, and the orders received from those who would wear "the Protectors" to see to their being genuine. Remember this is a staple article, and no patent medicine.

THE Hydrolcon is a valuable discovery for protecting the feet from damp or cold, and thereby a preventative of many fatal diseases, without any defacing substance. The Hydrolcon is in the form of a sole, and when inside the boot or shoe, its medicated character is a powerful antidote to disease.

For Gentlemen it will be found agreeable, warm, and healthy, to wear in the cold or inclement weather, as the feet cannot become wet if the Hydrolcon is inserted. Ladies may wear the lightest satin boots or shoes in the most inclement weather with impunity; while Consumption, so prevalent among the young of our country, may be thwarted by their general adoption. They are truly inexpensive ever shoe, as the latter cause the feet to perspire in a very unhealthy manner; and, besides, are not dangerous to wear to pedestrians in any weather, like India rubbers. While the latter cause the feet to appear extremely large, the Hydrolcon, being a mere thin sheet of cork prepared, specially placed inside, does not increase the size of the boot, or cause the feet to appear unlike — The Children they are extremely valuable, as they keep engaged in exercise with comfort and healthy effects. Their expense is so slight as to render need mention; hence, those who patronize them will find their purely economic bills much diminished thereby.

As the Hydrolcon is becoming more known, its sale is increasing to an almost incredible extent. Last year in London, Manchester, Birmingham, Liverpool, Glasgow, Leeds, Dublin, Paris, Antwerp, Hamburgh and Berlin, our sales reached to 1,752,300 pairs of Cork Soles. This speaks the manner with the surprise is rife.

Ask the Faculty their opinion of their value as a preventative for Colons, Colds, Bronchitis, Asthma and Consumption.
