present terrors if every regiment could add North Carolina Whig. to its commissatist as its making engine. What effect this discovery may have up on the rapidly growing ice trade is worthy of consideration by those who are interest of consideration by those who are interest-ed in it. The ice shipping trade from New England, indeed from Bostor alows, sugares the capital of numerous companies, and a very large amount of fonnage. It is con-ducted with such skill and concomy that N Origons and Havana get their ice for a cent per pound, (nover these than half a cent), and Calcutz for wheat two and a half conts and Unicetta for missil two-and a haif doubles. Hat judging from its present success alone, they is considing machine will furnish lise at those forchities for loss than a quarter of that prior. Since that, the trade has in-creased with error tradity, and most of the pends in the visionity of Roston are used for the purpose. So long as cleven years ago, as downess from Roston sectivities for one the shipments from Batton constance for on the supports from Katta entering one of our parts, 22,501. The export of ice during the year 1850, from Beston, was 125,814 tans ; for the year 1854, 115,315 tons. The supert of the from the United States for the year ending June 30, 1855, was over 41,-500 tons, valued at nearly \$200,000. This is a small sum sensitive year (with he is a smail sum comparatively, but it will be without doubt one of the main stays which preserved the Calcutta trade to Boston-Near Pork Post.
