

THE CONCORD REGISTER.

J. N. Hart

THE CONCORD REGISTER.

No They Don't.

The white men of North Carolina do not expect to elect Oliver Dockery, Brigadier General, &c., &c., and Radical, to Congress this year. The white men of North Carolina expect to elect all the Congressional delegation, and they ain't going to miss it far. If Boss Mott can drive either O'Hara or Hobbs off the track in the Second District, US—the Radicals—may carry that black District, but that will be all. Riden T Bennett will beat Holden's Brigadier General from 10,000 to 20,000. A Democratic Legislature will be elected. The white people of North Carolina will not have any more of your black and tan, brindle-tailed Legislatures, to spend a half million dollars a year to organize stealing and make it legal—the Radical Legislature of 1868 and '69 did do it, and the Sun, nor Boss Johnston, does not, nor dare not, deny it. Don't be uneasy. The State will never be surrendered by the people into the hands of Mott, Dockery, Ike Young, Jim Harris, colored, and O'Hara, colored, again.

We called the attention of the people, in our issue of week before last, to the scene in Salisbury before Judge Brooks, some years ago, when Kirk marched his prisoners through that town, and also to Dockery's appointment, by Gov Holden, Brigadier General, and at once the editor of the 'Sun' begins to whimper: 'The Boss Major is at it in the REGISTER again.' Boss Mott should send his baby editor a stick of taffy.

SILVER CREEK, N. Y., Feb. 6, 1880. GENTS—I have been very low, and have tried everything, to no advantage. I heard your Hop Bitters recommended by so many, I concluded to give them a trial, and now am around, and constantly improving, and am nearly as strong as ever. W. H. WELLER.

A circular has been issued by the various civil service reform associations in Boston and vicinity calling upon the citizens of Massachusetts not to vote for any candidate for Congress who does not sympathize with the cause of civil service reform. It is signed by President Eliot, of Harvard University, Charles Francis Adams, Jr., Edward Atkinson, and many other distinguished citizens of Massachusetts.

Nerves, brain, and muscles gain strength and the power of endurance by using Brown's Iron Bitters.

Drive in the Mail. Now that Leach is politically dead and his corpse put away on ice, would it not be well to leave him in his tomb and give more attention to Brigadier General Dockery, the mogul of Republicans, who is gobbling up the Liberal live and taking it into the Radical party. The Democratic Press and public speakers will do well to keep Holden's Brigadier General before the people. Every time you hold up his picture to the gaze of white men, you drive a nail in his political coffin.

Judge W. T. Filley, of Pittsfield, this State, was cured of severe rheumatism by St. Jacobs Oil.—Springfield (Mass.) Republican.

The smell of the egg from which the Liberal chicken was hatched, is conclusive proof that the hen that laid that egg wasn't healthy.

An Explanation. The delicate, flowery and lasting fragrance of Florentine Cologne explain why it is such a favorite with the ladies.

Maj. Montgomery's Farewell. Quite a scene took place in the Court House when the Court convened for the afternoon session yesterday. Solicitor Montgomery arose and bid adieu to the bar and Court. For eight years, he said, he had prosecuted the State's cases in Mecklenburg, and during that time no single episode had occurred to leave an unpleasant impression upon his memory. In taking leave he desired to make this impression of feelings, whose earnestness inspired their utterance. Messrs H C Jones and W H Bailey rose in reply, expressing their high regard for the retiring Solicitor, both as a man and as an officer of the court. The zeal he had displayed in bringing criminals to justice, and the ability which marked their prosecution, had evoked the highest admiration from the Charlotte bar. At the conclusion of these remarks, the grand jury, by a rising vote, thanked Maj Montgomery for his efficient conduct of the duties of his responsible office.

Maj Montgomery left the city yesterday evening for Concord, the criminal business of the term being concluded.—Charlotte Journal, 12th.

Skinny Men. 'Wells' Health Renewer restores health and vigor, cures Dyspepsia, Impotence, Sexual Debility. \$1.

The Prohibition Republicans have carried the election in Maine. This must be an exciting news for the North Carolina whiskey rings, and revenue smelters, and the Liberal Anti-Prohibition—late boss—Democrats who have deserted the Democratic party and marched into the arms of Radicalism.

Best ever made, Emory's Little Cathartic Pills, pleasant to take, sugar-coated, no griping; only 15 cents a box, of Druggists or by mail, Standard Cure Co., 114 Nassau Street, New York.

An Entertaining Journal.

The New South, published at Wilmington by Mr. Edward A. Oldham, is a most excellent industrial journal and is doing good work to bring North Carolina interests to the front and to foster them. Besides it has great claims as a literary weekly. In the issue of October 2nd a biographical sketch and portrait of the Rt. Rev. Thos. Atkinson, late Bishop of North Carolina, will appear. Newsdealers, bookstores and others desiring any number of copies should order at once. Price, in quantities, 3 cents each, cash with order. Single, postpaid, 5 cents. As there is every reason for believing that there will be a great demand for this issue, newsdealers will do well to secure a good supply at once, and all others who revere the name of the great and good divine should not fail to secure a copy of this sketch, which comes from the pen of Col Jas G Barr.

A Loss Prevented. Many lose their beauty from the hair falling or fading. Parker's Hair Balsam supplies necessary nourishment, prevents falling and grayness and is an elegant dressing.

A Big Success.

"My wife was in bed two years with a complication of disorders her physicians could not cure, when I was led to try Parker's Tonic. It was a big success. Three bottles cured her, at a cost of a dollar and fifty cents, and she is now as strong as any woman."—R. D. Buffalo.

Accident Banking and Insurance Company of Richmond, Va, failed on Tuesday. Their liabilities are over a half million of dollars.

Tragedy in Danville, Va.

Last Saturday Hatcher Johnston, Mayor of Danville, Va., shot Capt. J. E. Hatcher, late Chief of Police, with a pistol. Hatcher died on Monday. It was a fight caused by Johnston accusing Hatcher of collecting twenty dollars taxes, and failed to account for them. Hatcher denounced Johnston in the paper. Johnston was arrested, but will be released on bail.

Dockery at Reidsville.

A special from Reidsville says: Dockery refused to speak here today on account of the smallness of the crowd. There were only two people present when he arose to speak.—Patriot, of the 12th.

Star Route Verdicts.

The Star route jury returns a verdict of guilty as to Roreddell and Miner, not guilty as to Peck and Turner and disagree as to Brady and Dorsey. It has been evident since the 9th that there would be a disagreement of the jury as to Brady and Dorsey. A disagreement of a 'tampered' jury is equivalent to a verdict of guilty.

Yellow Fever.

Brownsville, Tex, Sept. 9.—Fifty-seven new cases of yellow fever and three deaths from the disease have occurred since yesterday.

Corpus Christi, Sep. 8.—We have passed the Brownsville mail, but the postmaster at Pena refuses to receive it. Will go out to Pena tonight and pass it through if possible.

Pensacola, Sep. 6, 10 45 P. M.—Twelve new cases today, and two deaths—one colored. The weather for the week up to today, very warm. It is now cool, with a rain storm threatening.

The Earthquake on the Isthmus.

New York, Sept. 8.—The Central and South American Telegraph company furnish to the press the following particulars of an earthquake which occurred yesterday on the Isthmus of Panama: A cable dispatch from the superintendent of the company at Panama, dated to-

day, says the damage done by the earthquake turns out to be greater than was first thought. The cathedral, and many of the largest buildings in Panama, are badly injured. The loss in this city is estimated at several hundred thousand dollars. Several lives have been lost in Aspinwall. There is no communication with Aspinwall, either by rail or by telegraph, and many bridges on the line of road are broken.

Cyclone in Florida.

Jacksonville, September 12.—Much damage to the cotton crop is reported from middle and East Florida by the storm on Sunday. At Quincy, houses, trees, &c, were blown down and five negroes killed. Sam White, an employe of the Florida Central, was blown 300 yards through the air at Darbyville, frightfully mangled and instantly killed. Many cattle were killed, and at Tallahassee houses were unroofed, and the old oaks of the capitol yard uprooted. The cyclone was general throughout the State, and was the severest since 1872.

Storms and Floods.

Lynchburg, Va., September 11.—The rains yesterday and last night caused a great rise in the James river and its tributary streams, overflowing lowlands and damaging crops and destroying property.

Five hundred feet of the trestle used in extending the dam across the river at this place was washed away, carrying five workmen with it, who, after riding six miles on the timbers, managed to swim to the shore.

Columbus, Ga., September 11.—A heavy rain and wind storm visited this section Saturday night and continued more or less throughout Sunday. Shade trees in the city were blown down by hundreds.

Reports are received of much damage to cotton and corn, fences and forest timbers.

A special dispatch from Tuskegee, Ala., says that about 1,000 trees were blown down in that city, and the damage to crops in the surrounding country is estimated at \$50,000. No loss of life is reported.

A special from Talbotton, Ga., says the most destructive wind and rain storm passed over that section Saturday night, that has visited the county since 1856. Great damage was done to crops and timber, its tracks resembling the path of a cyclone.

Macon, Ga., September 11.—Reports from all points in this section show that great damage was done the cotton crop by the wind and rainstorm Saturday night. In South western Georgia, where cotton is open, the injury is also great.

Educational Column.

REV. T. W. SMITH, County Superintendent of Public Instruction, Editor.

Popular education is one of the two great questions of interest to the public of this country, which are gaining general attention at this time, and which in all probability, will still push to the front until they have attained their legitimate places. Especially in the South, for a few years past, common education has been gaining ground. The people are becoming more interested, and are demanding, and receiving better facilities, and doubtless they will not cease to call, until the best system has been perfected.

In our country the people are sovereign, and upon these matters of general education, must demand what will meet the wants of the case. These are the things we can afford to do without, but we can't afford to do without educational advantages for the children. We must have schools, and they must be efficient schools. To have these, the legislators must be instructed by the people to vote adequate means. Schools cannot be made efficient without money sufficient. Let the money be voted, and let it be properly used, and there will be but few to object.

There are twenty districts in the county which have not yet made their census reports. It is a matter of importance, and I would be glad if all who have not done so would attend to it, and give all that is called for in the blanks. Plenty of blanks at the Register's office.

THE WORLD'S NEED OF TRAINED TEACHERS.

[Extract from an address by Dr John M Gregory, at the eighth an-

nual Commencement of the Washington Normal School.]

But we turn at last to our practical conclusion, to the lesson of the scene and the hour. Out of this, perhaps too long, review of education and its modern uses, the need of trained teachers rises by a logic as iron-like as it is impressive. Will you gather signs of this? Will you manufacture iron-clad monitors in country blacksmith shops? Will you pipe thunder with a penny whistle, and steer lightning with a penknife? Can the blind lead the blind, and the dumb teach the dumb to speak? Can the hand that trundles the wheelbarrow be trusted to guide the steamship? Thus absurd to me seem all the questionings as to whether our teachers need a special training for their work.

Teaching is an art made up of distinct processes, employing definite agencies and instruments, heeding determinate conditions, and that he or she will practice the art most successfully and usefully who has mastered these processes, agencies and conditions. It is the common sense that some teachers teach better than others because they understand their work better, and that experienced teachers do better work than inexperienced, because they have learned by their experience.

But dropping argument and losing sight of all special cases,—of good teachers who have become such without training, and of poor teachers who have remained so in spite of normal training,—the broad fact remains (a fact to which the mass of the civilized world bears testimony) that educated teachers, educated by experience or by training, are the best teachers, and can do more work in a given time than the uneducated.

But even if teaching in the older time could have been performed well without training, certainly in the present day with its demands for knowledge, with every science grown more scientific, and every art become a science, the untrained teacher can never meet our wants. We must learn faster and farther than the fathers learned. We have both more to learn and infinite more need of learning. As Dr Wayland said: "one takes two years to teach what might be learned in one, he not only robs me of my year of time, but of all the additional progress which that would have enabled me to make throughout life."

Abundant experience proves, that with true teaching, acquisitions of knowledge may be both hastened and increased. All branches can be taught now quicker and better than they were taught fifty years ago. Our needs require they shall be thus taught.

I turn, in conclusion, to this graduating class, this group of teachers trained and ready for their work. I know not whether it is by happy accident or by wise design that they are all young ladies, but I hail it as welcome. There is no fact of our times more significant or important than the position that woman has come to occupy in the world's progress. You too, young ladies, have an equal share with men in the grand movements and responsibilities of this century. You are among the forces which make history. Your deeds will help to make it. Your influence will give it shape. It is fortunate that at length both sexes stand side by side in recognized equality of right and power and duties. It is as teachers indeed, but it is also as women, that we welcome you to your field, and bid you God-speed in your work. You are of the thousands who are graduating from normal schools and high schools and colleges, and who will stand with you in the ranks of our country's teachers. Never was your work grander, never more needful, than now. Never was humanity confronted by more trying or more terrible problems. Never did the people—and our own people above all others—need the light and power of sound learning more than now. The people, and the people only, can save the people. And now, as in all times, their salvation must be wrought by their brain power, by knowledge, by intelligence, by wisdom. You have come to the kingdom in a good time. Your work will tell for mankind and for womankind. God speed it and bless it.

When you lay before the school authorities that with charts, blackboards, a globe and magnet, you can teach a whole class of twenty or

thirty more and better than you can teach a single pupil without these helps, it will be an easy matter to take the next step and convince them that true economy demands that the school shall be furnished with these things without delay. You can do ten or twenty times as much work within a given time with these helps as you can do without them.

Knowledge through the eye, is conveyed a thousand fold faster, especially among children, than by any other organ or faculty.—N. C. Journal of Education.

What is needed in North Carolina is a more general appreciation of the merits and needs of our public school system. Let it be fully understood that 'knowledge is the source of all freedom,' and advocates will be found numerous enough and intelligent enough to secure all that may be required to place any system of public schools which promises such a result, upon a basis as broad and deep and strong as the foundations of the government itself. To secure such aid will necessitate unflinching zeal, accompanied by substantial evidences of the value of the work already in hand.—Supt John Duckett, of Wake.

"Buchupalpa." Quick, complete cure, all annoying Kidney, Bladder and Urinary Diseases. \$1.00 druggists.

COTTON GINNING.

I desire to inform my customers, and the public, that I am now prepared to receive seed cotton at my gin. I have put up PLATFORM SCALES at the gin house, to weigh the cotton before it is unloaded, thus saving time and the waste that occurs by weighing in small draughts in a basket. All those persons who bring their cotton, and wish to hold it for their convenience, or for a rise in price, &c, I will store it, and advance them a liberal per cent on it, until they are ready to sell. I also offer a good lot of rust proof seed wheat for sale. JACOB DOVE, 23 3rd.

STILL ALIVE.

WHAT?

WHY, THE FARMERS' CO-OPERATIVE STORE.

Notwithstanding the hard times, and the prediction, on the part of many, that ours would be failure, we are

"STILL ALIVE,"

on the increase, and come forward, in person, to tell the good people of Cabarrus and surrounding counties that we are opening out a line of

NEW GOODS

sufficient to fill our house more than full, and which will supply the trade at prices to please all. Indeed, our stock will be increased in many things four fold, and what, with our past experience, ever increasing capital, and good crops, we will do the handsome thing for the trade.

Men's Ready-Made Clothing

is complete, ranging in prices from the lowest to the highest.

SHOES, DRY GOODS, GROCERIES, TIN WARE.

in fact, a full line of all arriving daily. Have also to say that we have employed our popular young friend,

Mr. W. L. Bell,

as salesman, who will make his bow to our customers, and show them our goods. Come and see us, and we will do you good.

Farmer's Co-Operative Store.

J. A. CLINE, AGENT.

NEW FALL GOODS

Allison's Corner.

Just received a complete line of Calicoes, Mohairs, Alpacaes, Ginghams, Bleached Domestic, Tickings, &c.

I have also a very select line of

Clothing, Hats, Boots and Shoes

of all grades and styles. Everything will be sold at prices to suit the time.

Don't fail to see my stock before purchasing elsewhere.

Joe. H. Young,

Allison's Corner.

Dr. W. H. Lilly

OFFERS his professional services to the citizens of Concord and vicinity. OFFICE and RESIDENCE opposite the Presbyterian Church.

BUY THE Celebrated Tennessee WAGON.

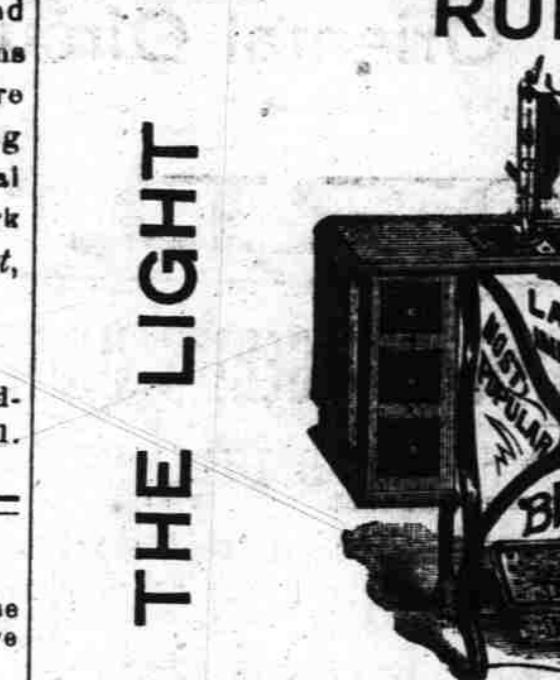

SOLD AND WARRANTED BY N. F. YORKE, Agent

GINGINATI BUGGIES, HACKS, PHETONS, CARRIAGES, & C. Molasses Mills and Evaporators, McCormick & Remington Mowers and Horse Rakes, All at Bottom Prices. Call to see me before making purchases. Office at Cannons & Fitzer's. N. F. YORKE, Agent.

THE LIGHT

NEW HOME

SEWING MACHINE.

On examination you will find the New Home Sewing Machine to have less machinery than any other make; because of its wonderful

SIMPLICITY OF CONSTRUCTION.

The Machine runs on SOLID POWER—has no spring power like other machines so easy to get out of order—therefore cannot fail to perform at all times. Has SELF SETTING NEEDLE, cannot be set wrong, has large bobbin, and

ALL THE LATEST IMPROVEMENTS,

Loose Fly Wheel, filling bobbin without running machine. It is said to be the best Sewing Machine on the market; will give the operator less trouble than any other.

G. C. BLUME, Gen'l Ag't,

Office at Heater & Lore's Store. CONCORD, N. C.

NOTICE.

On the 4th of October, the undersigned will offer, at public sale, the land of the late John A Overcash, lying on Irish Buffalo creek, on the road that leads from Enochville to Concord. This land contains 70 acres, with a good well, two good dwelling houses, a good double barn, and other necessary buildings, about 5 acres of bottom land, and a valuable orchard.

Also, at the same time and place, we will sell about 80 bushels of wheat, and a lot of oats, and a quantity of straw.

G. M. OVERCASH, JAS A. OVERCASH.

September 8th.

IT STANDS AT THE HEAD.

THE LIGHT RUNNING

DOMESTIC

FOR SALE BY

N. F. YORKE, Agent,

CONCORD, N. C.

Notice.

House for Sale or Rent.

I offer for sale my house and lot on East Depot street. WM. PROPST, aug 25-1f

CONCORD Iron Works.

FREEMAN'S MANUFACTURING CO., Founders & Machinists

Manufacturers of Circular Saw Mills, Freeman's Improved Cotton Press and Double Turban Water Wheels, Mill Gearing, Shafting, Pulleys, and Hangers

Agents for the sale of Patent Hot Polished Shafting.

The public are invited to examine our goods, and see for themselves that we offer nothing but first class material and workmanship, at fair prices.

Our Improved Cotton Press

is a perfect success, and contains more points of superiority than any other Press offered to the trade. For rapidity of work and hard pressing it has no equal in a screw press.

Our Double Turban Centrifugal Water Wheel

is a marvel of ingenuity and mechanical skill; is very economical in the use of water, and gives a good percentage of power of the water consumed.

What we claim for

Hot Polished Shafting is, that it is round and straight, and accurately rolled to any gauge. Its surface being composed of magnetic oxide of iron, obviates any undue tendency to rust or tarnish, and gives one of the best bearing surfaces ever discovered, and is made of the very best refined stock. For prices and further particulars address FREEMAN'S M'FG CO., Concord, N. C.

Dr. Chas. A. Misenheimer

Offers his

PROFESSIONAL SERVICES

to the surrounding community of Pioneer Mills. Office at Mr. John A. Barnhardt's residence. 7 3rd

Dr. John W. Moose

OFFERS his Professional Services to the citizens of Mt Pleasant and vicinity. Office at H. C. McAllister & Co's Drug Store.

A WEEK, \$12 a day at home easily made. Costly outfit free. Address Tarr & Co Augusta, Maine. 2
