Anderson Ratliff, the vict, who killed guard and who n committing of McFarlan (the party who Dr. Parker has been harboring,) has at last got his gruel. He got it last Sunday afternoon, about an hour before sunset, under the following circumstances:

He was lurking around und about

the premises of Henry Haney, who lives near Bethel Church, about six When he "jumpped" Ratliff the lat-ter tried a bluff game on the constable, which, failing, the hunted one prepared to flee. Mr. Ingram called upon him to surrender, which he re-fused to do. The constable warned him not to run, telling him that he would certainly shoot. Ratliff, however, realizing that it was a dead sure thing against him, if taken pris-oner decided to risk his heels at all hazards, and "lit out." Mr. Ingram fired once, hoping that he would stop, but the fugitive quickened his pace. The con-table seeing that his man was about to escape, "pulled down" on him in earnest, when about forty yards away, and Ratliff tumbled, the ball taking effect in his back.

Ratliff then surrendered, of course, wound, and pronounced it fatal.

Farmers POBACCO: TOBACCO

USE "NATIONAL" FOR TOBACCO High Grade, quick, Reliable.

RICHMOND, VA., January 1, 1885.

In offering our NATIONAL Tobacco Fertilizer again to the farmers, we do so upon evidence abundant and conclusive that it will give entire satisfaction. It has been tested by the best brands used in Virginia and North Garolius for years on every variety of soil and quantities from fifty to five hundred pounds per acre and we are warranted in saying, from testimonials coming in from every section of our territory where it has been used that it has no superior and few equals as a Tobacco Fertilizer.

The advantage of the NATIONAL are these:

First, It contains just the substances necessary to the perfect development of the plant, as shown by analysis. Second, It is as quick as Peruvian Guano and far superior as a permanent enricher of the soil, producing heavy crops of Wheat and Clover following the Tobacco. Third. It gives more uniformly good result than any fertilizer on the market. Why? Because it is uniformly mixed by the celebrated Pratt Acid Grinding and Mixing Machine, on which there is a patent, and of which the manufacturers of the National have the exclusive right of use.

The guano is very dry, and in fine condition of guaranteed analysis, and put up in goo strong bags of 200 pounds each. If planters call our goods high priced, we beg them to remember that the best is the cheapest. Those who use it one; want it again.

Send for our book of testimonials from farmers who have used National, and who say:—

IT REATS THEM ALL.

Farmersuse Orchilla Guano.

The Great Soil Enricher.

The best and cheapest for Corn, Cotton, Oats and Grass,

The advantages resulting from its use a most only an increased veield but the permanent improvement of the soil from the abundant growth of grass which is sure to follow.

It is low pricen, because we have none of the expense of Manufacturers. It always keeps Corn and Cotton green. It contains neither Vitrol, Ammonia or anything to burn in dry weather. One application will show for years—as long as raw animal bone Give it to the soil early for big results, upon the first crop. Use it broad-cast, 300 to 400 pounds per acre pays best. Send for our book of testimonials from farmers who have used Orchilla Guano for years, and who say not only has it made big crops, but it has made our lands rich.

Respectfully, TRAVERS, SNEAD & CO.

ALL TOBACCO GROWERS

BAUGH'S Gelebrated Special Fertilizer FOR TOBACCO.

In some sections we have found that the Tobacco Fertilizer branded "Baugh's Special Fertilizer for Tobacco" did not ripen the plant sufficiently quick. We have hitherto given the Ammonia in this high grade article in the form of AA Nitrogen exclusively, which we have always held, and which have been amply proved by long experience, to be the safest and best in dry seasons. A larger experience, however, his led us to take a middle course, which we have already seen is the better one. Our Tonacco Fearitizers will be reafter derive its 6 p. 3. of Ammonia in part from AA Nitrogen and in part from Salphate of Aramonia and Fearitime and the same and a prompter the same required in this article, which would otherwise take place in seasons of drouth, The standard of both Ammonia and Phosphoric Acid is slightly raised by this important change. The price remains the same as the recent reduction to \$30 per 2,000 lbs. on board in Taltimore or Norfolk.

WE GUARANTEE THE FOLLOWING ANALYSIS:

Ammonia 5 to 6 per cent. Available Bone Phosphate, 10 to 12 per cent. Sulphate of Potash, 4 to 5 per cent. Or Actual Potash, K. O. 2 to 3 per cent. We would refer farmers who have never used this high grade article to Wm. M. Blackwell, S. H. Caunady, A. M. Venzy and other leading farmers of Granville county. Address all orders or inquiries to—
