ON THE WING.

On the 21st inst., you canvasser started out in the interest of THE RECORDER. We reached Chapel Hill about 11 A. M., and after meeting a large number of old friends and many subscribers, we accepted the kind invitation of Mr. Thos. Lledy to dine with him; feeling like the inner man should be cared for, we did justice to the fine repast set out by his amiable wife.

We found our clever friends, Messrs. Lindsey, Robertson and Foster busy at their stores waiting upon their customers.

We next left for Lindsey's, about six miles from the Hill, where we next spent the night with Mr. Manley Lindsey, the postmaster and merchant of that place. After obtaining several subscribers and getting old ones to renew, we left for Lambsville, in Chatham county. We passed through one of the finest sections of Chatham. In that section we secured several new subscribers, met many old friends. We were glad to see the wheat and oat crops looking so well and the farmers so far advanced with their preparations for another crop.

We next went to Gath, or as is familiarly known as White Cross, in Orange county. We were glad to meet Dr. Thompson, who is one of the most popular physicians in that section. Owing to bad health he was compelled to give up a large part of his practice and engage in mercantile business. He is doing a fine business. At Gath we shared the hospitality of your staunch friends, Mr. William Eubanks and Enoch Sykes. You do not often see a more beautiful farming country than this. It produces fine tobacco to perfection, yet several of the neighbors left here last week for Texas, where they will try their luck.

From Gath we went to Mr. W. J. Freeland's, who resides near Hillsboro, and spent the night. On arriving there we were surprised to see his son, Mr. Freeland, of Durham, the popular salesman of G. C. Frathing, and his lovely bride, Mr. Freeland is a life-long subscriber and friend of the RECORDER, having spent twenty-seven years of his life in the Recorder office.

At Hillsboro, Mr. John Laws, the popular Register of Deeds, informed us that the farmers of Orange were in a prosperous condition. Going down the northern side of Eno River we passed through a fine farming section and found the farms in a high state of cultivation. We added eighteen subscribers to your growing list.

COLUMBIA, S. C., Jan. 23.—The executive committee of the Farmers' Association of South Carolina, a political organization which has developed great strength within the past two years, has issued an address to the Democracy of the State charging that the element of the party now governing the State with gross mismanagement, extravagance and inefficiency and declaring that the State never has had a republican form of government, but has been dominated and ruled by an "aristocratic oligarchy." A call has been issued for a convention of Democratic farmers, to meet in convention in this city on May 27, to nominate a complete State ticket.

Mr. Samuel Jones is frightening some of the New Orleans women out of their wits by his predictions of calamity in the near future. If Mr. Jones can foretell calamities, it seems to us that nothing stands in his way to predict the cotton or the stock market. The world laughed when Wiggins made weather prophecies, yet when Jones makes prophecies of calamities, the women grow pale, and many men see nothing silly in the performance. If Sam will predict the cotton market for April, enough money would be raised here to build a temple for him. There is no harm in a temple.—Charlottesville Democrat.

When we claim to be independent, we do not mean that we are neutral. Please don't confuse the terms, in which there is a great difference.—Henderson Tomback.

The mails are now crowded with packages of seed which are being sent by Congressmen to their constituents in order to secure their re-election.—Chatham Record.

NATIONAL CONGRESS.

THE WAYS AND MEANS CLOSE TARIFF HEARING—THE DEMANDS OF THE FARMERS.

Tobacco Tax, The Great Tobacco Trust, the Whiskey Ring, Edmund's Bill on National University and Inebriate Asylums; Negroes, Mormons, Chinese, The Windom Silver Bill, Morgan and the Jesuits, Etc.

The Ways and Means committee have closed their hearings on the tariff, and are now engaged in formulating their Tariff Reform Bill. The difficulty will be to harmonize the various conflicting interests in the various sections. Probably Sugar will be the most difficult article to harmonize; though it is quite certain that a high protective tariff will be placed on that article as the planters demand. The farmers, for the first time in the history of this government, have appeared in strong force before the committee, and have urged their demands with great force. They have shown wisdom, tact and sagacity, and have certainly made a deep impression on the Committee of Ways and Means; and they will probably receive consideration from the committee. They have unanimously demanded the repeal of the tobacco tax out and out, and a high tariff of \$3 to \$5 a pound on the Dutch Trust Sumatra wrapper. The tobacco manufacturers have steadily demanded a retention of the tax, and its reduction to two cents a pound, upon the plea that it is necessary to protect their trade marks. This is stoutly denied by the farmers and as stoutly opposed by them. Various organizations have been started by the tobacco manufacturers to oppose the repeal of the tax when it comes up in the House. The formation of a great tobacco trust under the name of the American Tobacco Company will help the farmers in their fight in the house. It is probable the farmers and their allies will succeed in procuring on out and out repeal of the tobacco tax.

The Whiskey ring oppose free fruit brandy or free alcohol in medicine and the mechanic arts. Some are willing to see the tax reduced from 90 cents to 50 cents a gallon.

It is thought that the Ways and Means Committee will report their tariff Bill early in February, and will push it forward as rapidly as possible.

Senator Edmund's bill to celebrate the centennial and fourth from Columbus' discovery, by building a great National University at Washington, is attracting some attention, though it is not probable that it will pass. He has also introduced a bill to establish an Asylum for Inebriates.

Senator Butler's bill to colonize the negroes in the Congo Free State is one of those wild vagaries that only create a stir. The great exodus of the negroes to the cotton States shows that the whites there want them to make cotton and sugar, and that they do not want them colonized to Africa. On the same line, however, Senator Mitchell has introduced a stringent bill to send back the Chinese and prevent their ever coming to the United States; while Mr. Stewart has introduced a bill in the House to disfranchise Mormons in the Territories and prevent their being naturalized as citizens. The colonizing of citizens who may be objectionable to other citizens, at the expense of the Government is absurd to say the least. It may do harm, and certainly can do no good.

Mr. Butterworth of Ohio, will, in a few days, introduce a silver bill embodying the views of Secretary Windom on silver money. It will provoke sharp discussion, and as there are now no party lines on the silver question, the fate of the Windom silver bill will be very problematical.

The "gold" papers that have all along been predicting that the coinage of the silver dollar was going to send this country to the dogs, are now letting loose their batteries on the Windom bill. They say why should certificates be issued against silver any more than against corn or wheat deposited in a government warehouse? The answer is not hard. Silver is money. That is something the "Gold" men cannot understand. But they may as well learn to comprehend it. Silver is just as surely money as gold is.—Raleigh News and Observer.

Still, there is one grain of comfort in the world even for Froeber. He can congratulate himself that he was not elected Governor of Ohio. If he were occupying that exalted station, the depth of his humiliation would be lower, in proportion as his office would be higher. So, when Campbell fought a victorious fight he not only gave to his State the blessing of a Democratic Administration, but he also was obeying the injunction, Do good to your enemies.—Ch.lotte Chronicle.

WASHINGTON, Jan. 23.—Morrison R. Avery, of Raleigh, N. C., son Judge Avery and assistant photographer in the Geological Survey, by mistake took several saw-laws of carbolic acid in his dressing room, from a bottle plainly labelled "Pure Rye Whiskey," and died an hour afterwards, although physicians were promptly summoned, and exerted themselves to the utmost to save his life.

SALESBURY, N. C., Jan. 23.—Senator Ransom today sent a telegram to Judge A. C. Avery, announcing the death at Washington of his son Morrison Avery, who died this morning.

Mr. Avery was 21 years old. He graduated at Davidson College with the highest honors in the class of 1887.

Alex. Wilson, of Morganton, N. C., died tonight, coming to Washington after the remains of his daughter Judge Avery, to look upon the death of his sister, Mrs. Chambers, of Morganton, who was found dead in her bed Tuesday night. Her death is thought to be from apoplexy.

The discussion now going on in the newspapers of the State in regard to opening the University to women, is doing good. It is calling the attention of the people to the fact that, while the State does all she can to educate her boys, she utterly neglects the future mothers of North Carolina. The women have been discriminated against long enough.—Wilson Advocate.

According to the best recent estimates there are nearly 1,450,000,000 people in the world, about 60,000,000 of whom live in the United States. It is the contention of the protectionist philosophers that the trade of 65 persons who live in the United States is better worth contending for than the trade of 1,385 people who live elsewhere; and that a country of abundant natural resources, unrivaled facilities for commercial intercourse and inhabited by an intelligent, free and energetic population should be walled in order to protect itself against the rivalry of less favored lands.—Phil. Record.
