EARS OF A RABBIT. Different Positions in Which They Care; Them-Styles for Esting and Running. "Did you ever see a rabbit's sars stand up like that?" demanded Uncie fom, flipping the cars of a toy that Dolly held in her hand.

"Yes, indeed!" onswered Dolly promptly, pointing to the picture of rabbit in a book that lay at her side. The little girl had bought a pattern of a rabbit at the store and with a bit of white canton-flannel and-two red and white buttons for eyes she had fashioned a ribbit for little Ted that was as like as life. Everything wa finished now except the ears, and these, daintily lined with pink, Dolly was in the act of putting into their proper places. She had bestowed great care on placing these useful members correctly, and for that purpose she had hunted up the book, which she knew contained an admirable picture of s ribbit.

Imitating this picture as accurately as possible she find fastened one bar. setting it on the head in a perfectly upright position, and now she was holding the other to its place on the opposite side, and was eyeing it at arm's length to decide if the two wers "a pair." Upcle Tom took the book and exam

med the picture critically; then laugh ing, he said:

Why, Dolly, the rabbit in the plo tare is sitting still, nibbling at a cab-bage leaf; of course his cars stand straight up. But this one that yes just in the act of making a leap. A rabbit in that position should have his ears lying back from his head, almost paralel with his body."

"Does the wind blow them back as be runs?" asked Dolly, making the al teration without further question. "That," said her uncle, much smused, "is one explanation, perhaps, but there is another and I think a better one, which the naturalists suggest." Turning over the leaves of the ple

ture-book he pointed first to the pic ture of a fox, then to one of a wolf, and then to pictures of other beasts of prey of various kinds. These animals," he explained, indi-

cating the cars of each, "have the car: pointed forward as they proceed. Can you suggest any reason for the differ-Dolly shook her head, but listened

attentively. "Well, continued Uncle Tom, "you

know that the rabbit, or hare, is a very timid animal and never attacks or pursues another animal, and that it feeds only on vegetable dist. Whenever, therefore, it is found to be in a state of notion the chances are that is fleeing from some enemy in was to be taken out on her and the rear. It is to its inter the revenue cutter William F. ests, then, to keep its attention steadily fixed on sounds preceeding from that overter. For this purpos nature has taught it 40 adjust its cara or its ear trumpet, as the long outside part of the organ of hearing really is, so as to best collect all the sound waves, and to offer the least resistance to their passage to the inner organ

Your Sacred Duty. The time has come in the history of this country when every good man owes it to his kind and himself to come to the rescue, and if they do not, rampant anarchy will assume abso lute coi trol.

Many people have an instinctive dread of political pollution, and have kept aloof, leaving the country entirely in the hands of remorseless spoil grabbers. They owe it to themselves to enter the arena, and right now, and rescue this United States from the clutches of a gang to whom patriotism is a stranger, and honor an unknown quanti y, alegrabicaly, expressed by X-0.

Instead of talking about the corruption of politics, take off your ceat, roll up your sleeves, trash over the fence. If you don't, the political body is likeiy to have cholera, small pox, veilow fever, and the Lord

knows what, before the os. of next winter kills out the infic tion germs.

There is no party ism in this It is purely a matter of business-of self preservation, to which we conceive it our duty to call your serious attention ere it he too late. To the rescue, all good men.

OUGHT not the United States to take down the eagle as its emblem? Is it not great injustice to the eagle to keep him be-

fore the people playing the buzzard? Or would it be more appropriate to substitute the insignia of Great Britain-the lion and the unicorn fighting for the crown? These be strange times, in which governmental

evolutions are so rapid, all patriots should strive to save themseves from the beak and talons of hungry rultures.

THE fact that the Florida tate troops have been put

inder marching orders is indicative of trouble with the Span-iards in Cuba if the sentence of Of May
