1837,	417,429 13	749,895 42	332,466 24
1838,	306,114 18	900,486 63	594,372 45

\$1,978,588 02 3,939,845 70 1,961,257 65

The State tax was discontinued in 1826, and since that time the annual revenues of the general fund have not been equal in a single year to the expenditures for the support of the government. Until the general fund was exhausted, these deficiencies were annually made up from the capital of that fund; and the deficiencies which have arisen since the extinguishment of the general fund have been supplied by borrowing; and this operation has created a debt against the Treasury, distinct from the debts for canals, of \$1,948,032 43, being about equal to the total amount of the deficits in the last seven years, as given in the preceding table.

In the following statement all the ordinary receipts and expenditures on account of al the finished canals, as well as the receipts and payments for the support of the government, are brought together, and the surplus remaining after paying all demands, is shown in a separate column. This table exhibits at one view the total amount of all the receipts and expenditures of the State Treasury:

	Revenue.	Expenditures.	Surplus
1833,	\$1,665,785	81,155,973	\$5 39,819
1=34,	1,641,234	1,234,663	406,571
1835.	1,680,050	1,210,919	469,131

The average nett surplus for each year is \$458,437. This is equal to the interest at 5 per cent. on a debt of something more than nine millions of dollars. The surplus of 1838 is only sufficient to pay the interest on a debt of a little more than six millions of dollars, beyond the existing canal debt.

To bring this matter into a still narrower compass, and to show the total amount of debt for internal improvements which the surplus revenues of the state would have sustained for the last six years, without taxation, we have taken the total sum paid for interest on all the canal debts in each year, and added this sum

Study makes the eyes weak and the brain
