AGRICULTURAL.

From the New York Cultivator. ANALOGY BETWEEN MEDICAL AND AGRICULTURAL EDUCATION.

The physician and surgeon, to qualify them for their profession of preserving life, are required to study the anatomy of the human frame, the functions of every part of the system, the nature and quality of whatever is requisite to administer to its wants, or to remove the ills that flesh is heir to .--Without this knowledge he can but guess at the cause or seat of the disease, and of course his prescription must be questionable and often a knowledge of these matters cannot be acquired by bare practice. It must be obtained from the teaching of ages-in schools of medical science-in the dissecting room. Hence the laws of every civilized people require in the pupil this preliminary study before he is permitted to practice the art professionally. And no intelligent man, who justly appreciates the necessity of the science to perfect the art, likes to trust his health and his life in the hands of a pretender, who knows nothing of the great principles of the business which he professes to practice.

So with husbandry. It embraces principles of science, upon which good modes of practice must necessarily be based: and without a knowledge of these principles, the labors of the farmer, like the prescriptions of the quack, must be either guess work or confined to the routine in which he has been instructed. His soil and his animals are liable to sterility which he is ill qualified to cure. Unless he knows something of the compositions of the one, the anatomy of the other, as branches of natural science, he is not likely to discover the true cause of an evil, nor to apply to it the right remedy .--We will give to it a single illustration of farm crops. It is now universally admitted, that the alternation of crops is highly conducive to good husbandry. But why is it so? Science, which expounds the laws of the Creator, in regard to inanimate matter, not only furnishes a satisfactory answer to the question, but suggests the classes of farm crops, and the order of succession, that ought to alternate and follow each other .---Again,-gypsum, lime, marl, and ashes, are beneficially applied to some soils, to some crops; and in some seasons, while they are not beneficial upon other soils, to other crops, and in other seasons. Science can only explain these seeming contradictions .--In schools of scientific and practical agriculture, in which a series of experiments should be continually going on, these problems would ere long be solved; rules of practice would be laid down; the results and the natural causes of these results would be explained and the community, and every member thereof, who had a latent spark of improvement, or the ambition to improve his condition, would seek for practice and profit, from the discovery. In this, agriculture differs from most other professions, the bone- and loss of one night's sleep, from Fayetteville (via fits of improvements may be monopolized by an individual, or a small number; improvements in husbandry are accessible to all, who are not too conceited to learn, or too indolent to practice, from the examples of around them. The results of the analogy which we have drawn, between medical and agricultural knowledge is this,-that science is equally beneficial to both; that while the one is destined to preserve and prolong life, the other is charged with nourishing it, and of multiplying its comforts and enjoyments; and that both are consequently entitled to the protecting care of an enlightened community.

'Besides the more obvious remains of testacea and of larger animals, minute examination discloses, occasionally, prodigious accumulations of microscopic shells that surprise us no less by their abundance than their extreme minuteness; the mode in which they are sometimes crowded together may be estimated from the fact that Soldani collected from less than an ounce and an half of stone, found in the hills of Casciana, in Tuscany, 10,054 microscopic chambered shells. * Of several species of these shells, four or five hundred weigh but a single grain; of one

species he calculates that a thousand individuals would scarcely weigh one grain.'

"Extraordinary as these phenomena must appear, the recent discoveries of Ehrenberg, made, since the publication of Dr. Buckland's work, are still more marvellous and instructive. This eminent naturalist, whose discoveries respecting the existing infusorial ani-mals we have already noticed, has discovered fossil animalcules, or infusorial organic remains; and not only has he discovered their existence by the microscope, but he has found that they form extensive strata of tripoli, or poleschiefer (polishing slate,) at Franzenbad, in Bohemin; a substance supposed to have been formed from sediments of fine volcanic ashes in quiet waters. These animals belong to the genius Bacillaria, and inhabit silicious shells, the accumulation of which, form the strata of polishing slate. The size of a single individual of these animalcules is about 1,288th of a line, or the 3,400th part of an inch .-In the polishing slate from Bilin, in which there seems no extrancous matter, and no vacuities, a cubic line contains in round numbers, 23,000,000 of these animals, and a cubic inch 41,000,000,000 of them. The weight of a cubic inch which contains them is 270 grains. Hence there are 187,000,000 of these animalcules in a single grain; or the silicious coat of one of these animals is the 18,000,000th part of a grain!

"Since this strange discovery was made, Mr. Ehrenberg has detected the same fossil animals in the semiopal, which is found along with the polishing slate in the tertiary strata of Bilin, in the chalk flints, and even in the semiopal or noble opal of the porphyritic rocks. What a singular application does this fact exhibit of the remains of the ancient world! While our habitations are sometimes built of the solid aggregate of millions of microscopic shells-while, as we have seen, our apartments are heated and lighted with the wreck of mighty forests that covered the primeval valleys-the chaplet of beauty shines with the very sephulchres in which millions of animals are entombed! Thus hath death become the handmaid and the ornament of life. Would that it were also its instructor and guide!"

THE cheapest and most expeditious and com-for able route North and South from Fayette-ville, is THE NEW STAGE LINE the subscribers established in January last, from Fayetteville, inters

THE NORTH-CAROLINIAN. SPRING & SUMMER LOTTERIES,

Under the Management of D. S. GREGORY, & Co. FOR OCTOBER. Land Ho! Land Ho!

Amidst the severe pressure that has lately existed, the exertions and active measures pursued by S. J. SYLVESTER, 130 Broadway, to relieve the com-munity have had the most ben ficial effect, and at a period when the overwhelming torrent was at its height, threatening to engulph all, S. J. Sylvester stretched forth his hand, and by his timely aid rescued tirely new. April, 20, 1839. many who, without his assistance, must have been carried away in the vortex, distributing with an unsparing hand, fortune's favors to those who relied upon him in the hour of peril, having actually sold during the single month of August, Capital prizes to the amount of **258,000 Dollars.** Thus by his enterprize and perseverance, removing the gen-eral gloom which prevailed, and enabling his friends to discover and give the cheering cry of Land Ho! S. J. Sylvester determined to follow up this course and to convince all, that land ahead is Fortune's land, and he the skillful Pilot for those who trust in him. him. He now presents for the month of October, another brilliant series, which have never been sur-passed for brilliant capitals and well diversified chances. Remember all prizes paid in CASH.---Early application is recommended, and great care in addressing all commended and great care in addressing all communications to

LOOK AT THIS.

THE Printing establishment of the Milton Spectator is offered for sale on accommodating terms. To a practical printer with a small family, the situation is a very desirable one. Professional and other engagements, demanding at present, the whole of my time, alone prevent me from again assuming the editorial chair, which, with some exceptions, has been to me a source of pleasure and profit. There is, perhaps, no village in the State that holds out better inducements for an establishment of this kind.

TEditors of papers exchanging with the Spec tator, will confer a favor by giving thus notice one or two insertions.

N. J. PALMER. Milton, N. C. January 21, 1839.

COOL SPRING MILLS.

THE Subscriber has made arrangements to run these Mills. They are being thoro ighly repaired-and will be ready for the reception of grain by the 1st April next.

GEO. McNEILL. > Wanted to hire, a good MILLER;also proposals for 500 FLOUR BARRELS. mar 16 3-[y. G. Mc G. McN.

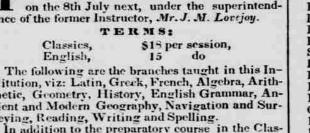

Timber and Lumber Agency. THE subscriber will attend to the sale of TIMBER, LUMBER, &c. in the Town of Wilmington, North Carolina, for all persons who may favor him with their commission. He pledges himself to procure for them at all times the highest prices for such articles as they may trust to his management. He is in ro way connected with the Steam Mills, or their Agent; and will give the best security for the faithful discharge of his duties as gent. MILES COSTIN. Wilmington, N. C. Feb. 23, 1839. 1-tf Agent.

MILL STONES.

HE Subscriber having recently opened a new quarry of superior grit, is prepared to furnish any number of Stones, either at the quarry or at the store of C. J. Orrell, Fayetteville. The quality of the Moore county Stones is so well known as not the Moore county Stones is so well known as not to need description, and the Subscriber will war-rant all stones sold by him. If they should not prove to be good, another pair will be furnished without charge. The price is lower than hereto-

Persons wishing to purchase, can apply in per-son, or by letter addressed to Carthage, Mooro county, N. C. with description of the size wanted. JESSE SOWELL. Moore County, April 20, 1839.

WM. L. COFER.

The following are the branches taught in this In-stitution, viz: Latin, Greek, French, Algebra, Arith-metic, Geometry, History, English Grammar, An-cient and Modern Geography, Navigation and Sur-veying, Reading, Writing and Spelling. In addition to the preparatory course in the Clas-sics, Mr. Lovejoy will give unremitted attention to young gentlemen in Algebra, Geometry, History, Ancient and Modern Geography, and will permit no Scholar to pass out of his hands without a compe-tent knowledge of the above branches.

Scholar to pass out of his hands without a compe-tent knowledge of the above branches. The Trustees of this Institution, under a deep sense of the great evil flowing from imperfect teach-ing in some of our Academies, besitate not in recom-mending this School to the public, having had am-ple testimony, during a twelve months' residence among us, of the ability, propriety and general in telligence of Mr. Loweiov in all matters connected

THE exercises of this Institution will commence non the 8th July next, under the superintend-ence of the former Instructor, Mr. J. M. Lorrjoy.

From the Mining Journal. ASTONISHING FACTS RELATIVE TO A FORMER ORGANIC WORLD.

"Dr. Buckland now proceeds to the most important and popular branch of his subject; to give a description of the most interesting fossil organic remains, and to show that the extinct species of plants and animals which formerly occupied our planet, display, even in their fragments and relics, the same marks of wisdom and design which have been universally recognized in the existing species of organized beings.

"After giving some account of the supposed cases of fossil human bones, and establishing the remarkable fact of the 'total absence of any vestiges of the human species throughout the entire series of geological formations,' our author passes to the general history of fossil organic remains:-

"It is marvellous that mankind should have gone on for so many centuries in ignorance of the fact, which is now so fully demonstrated, that no small part of the present surface of the earth is derived from the remains of animals that constituted the population of ancient seas. Many extensive plains and massive mountains, form, as it extinct races of animals and vegetables are piled into stupendous monumets of the operations of life and death, during almost immeasureable periods of past time. "At the sight of a spectacle," says Cuvier, "so imposing, as that of the wreck of animal life, forming almost the entire soil on which we tread, it is difficult to restrain the imagination from hazarding some conjectures as to the cause by which such great effects have been produced." The deeper we descend into the strata of the earth, the higher do we ascend into the aschaological history of past ages of creation. We find successive stages marked by varying forms of animal and vegetable life, and these generally differ more and more widely from existing species as we go further downwards into the receptacles of the wreck of more ancient creations.

the Wilmington and Raleigh Rail Road at Warsaw Depot, arriving in time for the Cars both North and South This line has one day's advantage over any other line between Fayetteville and Augusta, Ga. Pas sengers only have the fatigue of 49 miles staging, Wilmington and Charleston) to Augusta, in forty hours.

Going North by this line, passengers will find less staging than on any other Route now in operation; and in a few months, the Wilmington and Raleigh Rail Road will be completed, and there will improvements which are every day making only be 49 miles staging from Fayetteville to New York.

Passengers by this line can have their choice at Weldon, N. C. to go by Washington City, or to Portsmouth and take the Bay Boats for Baltimore. On this line the stages leave Fayetteville Sundays, Tusdays and Thursdays, for Warsaw Depot, Leave Warsaw Depot for Fayetteville, on Mondays, Wednesdays and Fridays.

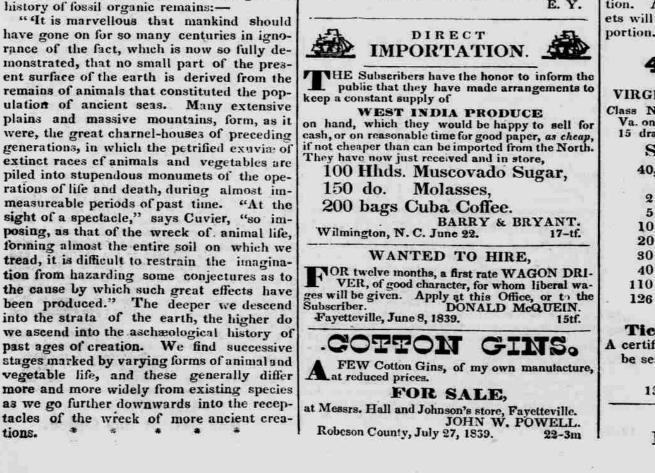

The subscribers having prepared themselves, passengers will find on the regular stage days, two stages, if necessary; and will run an EXTRA STAGE at all times when necessary. No pains will be spared on this line to give the public satisfaction.

BAKER & BLOCKER. Fayetteville, Sept. 14, 1839 .- 21f Proprietors.

THIS ESTABLISHMENT will be open after the 1st of August, under the management and direction of the Subsrciber. The House has been thoroughly repaired, and will, in a few days, be well furnished; and every effort will be made to render it worthy of patronage. EDWARD YARBROUGH.
