W. L. CALLIAS, Jailor. Fayetteville, April 27th 1841.

### PROSPECTUS.

The publishers of the Globe have recently given to the country an exposition of the motives which prompted the attempt by the federal party to prostrate their establishment, by printers to the Senate. They showed that there were already six federal newspapers to which a seventh is about to be added -- pubished at Washington-all devoted to the dissemination of Federal principles, and the defence of Federal measures. And to make this overwhelming battery of Federal presses the Globe was to be tarnished, its means im- tween too and three millions of dollars. poverished, and its political influence destroyed, by a sweeping dennuciation of infamy on the part of the federal leaders in the Senateby throwing the dead weight of an expenditure of \$40,000 in preparation to do the Congressional work, on the hands of its publishers, (the printers whose contract was violated) and by having this whole work of defamation and ruin accomplished by the judgment of the Senate of the Union to give it the sanction of the highest tribunal known to our country. The work was done by a caucus packed majority of Federalists, and the editors of the Globe are left to sustain their establishment by the patronage they may receive from political friends for the papers they publish. Sooner than ask or receive the sort of lumping contributions by which the banks and federal politicians sustain their presses, we will abanof the paper. If such of our Democratic ed. friends whose circumstances do not justify a subscription to a daily paper, will patronize the cheaper publications issued by us-the enabled to maintain, as heretofore, our corps of Congressional Reporters at the cost of mated. er for three months, notifying said defendant to ap- \$3,000 per annum, and to draw to our aid over at the Fall Term, 1841, of this court, to answer some of the ablest pens in our country. before they would fall due, on the 4th of March These works being printed in a suitable those advances have been made; and an amount of notes under the new act has consequently been issued, equal to about \$500,amount for any purpose, and probably not so great as that difference, is likely to be called for before the 4th instant. Hence it appears that the other available means in the Tressury have, as yet, proved more than enough, in the aggregate, for the discharge of all engagements of every kind sanctioned by Congress, whether old or new, in arrear, or otherwise, which were due, and have been present

ed for payment. It may be proper to state further, that the receipts, since the year commenced, have fully sustained the computation for the whole of the 50 cents. first quarter made by the department, in January last. The accruing revenue from duties payable three or six months hence, has been much larger in January than would be required monthly to make all the receipts fro that source in 1841 equal to the amount esta-

mated in the annual report. The revenue received in February not yet fully ascertained, has probably been nearly the same as the preceding month, but the accruing duties are believed to have been considerably less. It is computed, however, that these duties, taking both months together, have been quite as large as would be their proportion in order to make the receipts for the whole year, from this source, equal to the annual estimate. Nor have the expenditures since the year began varied materially from the amount expected. It is gratifying to be able to add, that, after all the payments above described, the balance of available money now in the Treasury is more than a million of dollars, including what stands surer of the mints, and with collectors and receivers. Deducting trust funds of every kind, which have seldom been so small in amount,

During the last three months also, as well condition till the close of his connection with Administration commenced, that balance has never been less than from half a million to a So far as yet ascertained, the ordinary ex- million of dollars, however much the Treasury in the performance of such large, distant, un-The revenue has turned out, also, to be certain and sometimes unexpected operations. the last quarter of a century.
