The Inclined Water Wheel.

now existing on account of its scarcity. This wheel will perform the same labor with less than half the water required to drive the tub-wheel, and if ap-plied in place of the flutter-wheel the saving must be still greater. The number of Mills (now in op-cration by these wheels, the tub-wheel is a supply of fine and common German Pipes. eration by these wheels) that become scarce of wa- MASON'S CHALLENGE BLACKING. ter in the summer, is supposed to average 50 or 30 per cent. If these Mills can be successfully operated with even half the water now required, it is ob-vious that the supply of water will be abundant. The Inchaed Water Wheel in its construction can be placed at any elevation to suit the condition of the pland, thereby scenring a sufficient head above the wheel, which is important to all mills where the water is at any time hable to become segree. In Nov. 9. 1813.-246-y.

this particular the luclined water wheel has a detid-

ed advantage above the Overshot, which requires a

expensive in its construction : Whereas, the In-clined Water Wheel cas be built at much less ex-

pense--can be successfully applied to any mill or

machinery that is propelled by water, and will run well in back water. This Wheel is said to rank in

power with a high breast wheel, an tean he grand

with either cors or bands, but the latter being con-

sidered the per and more durable, I have adopted

I have abstained from giving publicity to the inven-tion, or offering to sell any Rights, until others, as

well as myself, should become satisfied of its advan-

tages. I am now ready to dispose of the right to

use said invention by counties, districts and States ----as also single rights. Millurights, Mill owners,

and the public generally are invited to cell and ex-

amine the invention. The machinery, as represented in the plate

above, can be made more simple, by which one half of the expense of construction will be di-

minished, but the amount of water saved will be less. I shall have both modes of construction with a statement of muterials for each, printed in hand-

hills, which I design for those who wish further in-formation on the subject — JOHN T. GILMORE.
