IMPORTANT TO MILL OWNERS.

HOTCHKISS' Vertical Water Wheel.

THE Subscribers having witnessed the successful operation of these wheels, were induced to purchase the right of using them in the State of North Carolina; and they now offer for sale individual rights, at FIFTY dollars, or rights for a whole county, on reasonable terms.

Residing being generally adopted in the Northern States, these wheels are coming into general use in the Southern States. We have sold about 100 Rights, 30 of which are in successful operation in Cumberland county.

These wheels are more durable, and more easily kept in order when properly put together than the flatter wheel. They will save one-third of the water, and run well in back water, when there is a head above. The speed of the saw is increased more than double the strokes per minute.

We refer, among others, to the following gentlemen, some of whom have had the wheels in operation 12 months or more; and from many of them, their high appreciation of the superior advantages of these over the flatter wheel, and stating that their saws will cut 2500, 3000, 3500, and even as high as 5000 feet per day, and save one-third of the water.
