MALLEABLE IRON, SUCH as Carriage Makers use. A good assortment always on hand, and for sale at one cent per pound advance on the Manufacturers' prices by October 25, 1845.

IMPORTANT TO MILL OWNERS. HOTCHKISS'

THE Subscribers having witnessed the successof operation of these wheels, were induced to purchas; the right of using them in the state of North Carolina; and they now offer for sale individual rights, at FIFFY do lars, or rights for a whole

Vertical Water W hel.

County, on reas mable terms.

Pesid s being generally adopted in the Northern States, these wheels are coming into general use in the southern States. We have sold about 100 Rights, 30 of which are in successful operation in

Comberland county. These wheels are more durable, and more casily kept is order when properly put together than the flatter wheel. They will save one-third of the water, and run will in back water, when there is a head above. The speed of the saw is increased to more than double the strokes per minute.

We refer, am ng others, to the following gentlemen, some of whom have had the wheels in operation 12 months or more; and from many of them, and others, we have received certificates expressing their high approbation of the superior advantages of these over the flutter wheel, and stating that their saws will cut 2500, 3000, 35 0, and even as high as 5000 feet per day, and save one-third of the water.

ORNITHOLOGY .- Birds' eggs, incubation, nests, de Birds, like repilles, fishes, and most other animals having no vertebra (back bone or spine)

which their young are hatched. The egg is first formed in an organ fram ed overy, and descends from it through a long ling on the wants of her people, she wishes to tube called oxiduct. It consists at first of a membranous sack, filled with yellow matter, pelled twenty times to send out her maids of and is not surrounded with the white until it bonor to be those carpenters not to mall such a dreadful disturbance"! Who would solid envelope, which becomes encrusted be the Queen, now ! with a calcareous matter that constitutes the shell. Upon the membrane of the volk, or see what holes and corners they are thrust yellow matter we perceive a which point, into! which, in the course of its devel-pmeut, becomes the young animal, for the nourishment or protection of which all the other parts of present time be assigned to the nursery depart-

the egg are destined. The duration of incubation, (or the time the North wing; that these rooms are very required by the young bird to become devel- low; that in order to extend the accommoda-States, they feel no hesifation is saving, that nothing shall be wanting to make their Work equal to oped in the interior of the egg) varies in the oped in the interior of the egg) varies in the tion within this very limited space to meet oped in the interior of the egg) varies in the tion within this very limited space to meet oped in the interior of the egg) varies in the tion within this very limited space to meet oped in the interior of the egg) varies in the tion within this very limited space to meet oped in the interior of the egg) varies in the tion within this very limited space to meet oped in the interior of the egg) varies in the tion within this very limited space to meet oped in the interior of the egg) varies in the tion within this very limited space to meet oped in the interior of the egg) varies in the tion within this very limited space to meet oped in the interior of the egg) varies in the tion within this very limited space to meet oped in the interior of the egg) varies in the tion within this very limited space to meet oped in the interior of the egg) varies in the tion within this very limited space to meet oped in the interior of the egg) varies in the tion within this very limited space to meet oped in the interior of the egg) varies in the tion within this very limited space to meet oped in the interior of the egg) varies in the tion within this very limited space to meet oped in the interior of the egg) varies in the tion within this very limited space to meet oped in the interior of the egg) varies in the tion within this very limited space to meet oped in the interior of the egg) varies in the tion within this very limited space to meet oped in the interior of the egg) varies in the tion within this very limited space to meet oped in the interior of the egg) varies in the tion within this very limited space to meet oped in the interior of the egg) varies in the egg oped in the interior of the egg oped in the interior of the egg oped in the interior of the egg oped in the interior o for swans; 25 days for ducks, 21 days for possible expedient has been resorted to, rooms Cre the best materials the surrounding country at-Canary birds, and only 12 days for the hum- area, have been divided in their length and

and arrangement of which varies for almost attics intended for servants, it has been found overy species of bird. That which is constructed by the largest birds of prey rests upon a flat surface afforced by some part of a rock. or on the platform of some tall tower. Its darker and more uncomfortable rooms than extent is very considerable, and every year has been agreable to her majesty's wishes."

| Volume 7-Number 400

contributes to its increase, for it is rare for Hommorathy and Accorathy marrier con- these birds to abandon their first monument of maternal fondness. Their nest is frequently composed of such stout pieces of wood that one would scarcely believe that a bird could carry them. They are so arranged as not to yield readily to the force of the wind; and they support boughs which are bound to ment, forming a solid habitation, bearing the

name of evry. Those species that, in the construction of their nests, only employ rushes and reeds. accumulate them in such quantities, and fix them so firmly to the platform, that mins or

torms seldom cause their destruction. Some species of bilds have the babit of suspending their nest, which is wrought in a most artist-like manner, to the extremity of flexible twig, so that, in obedience to every moulse of the winds, this cradle and the sitring bird that inhabits it, experience an almost

continued tocking. Cettain nests present in their structure, a perfect masonry, thado of little sticks, gravel. or small leaves impregnated with mortar. formed of earth, softened with the salivary humor of the bird. How much toil, and how Frequent must be the comings and goings for the completion of this work! And, when we remember that the bird has for the execuall other remedies of the kind, and are so combi- beak of bill, we cannot withhold the admiraion which is so justly morited.

PUNCH AND THE QUEEN.

It is well known that Punch spares nobudy; espects nobody; he launches his jokes with reckless impartiality, and some of them are two Physicians in attendance at the old office, 375 bitter enough .- I he following is a specimen of Bowery, to visit and give advice. The Peor are the freedom with which he passes judgement attended gratis. Buy only as above, and be careful to avoid counterfeits and imitations of all kinds moreover, for the sort of light it throws on the roval manner of life. It must not be suppored that the whole story is a joke. The report cial document-and is reviewed or otherwise t eated of by most of the London papers. The Times makes fun of it, somewhat after the manuer of Punch; but some of the journote dicuss its revelation seberly and with a proper degree of reverential compassion for the inconveniences of royalty ! -

It is all very well for Dr. Sor thwood Smith and the Marquis of Normandy and others to write and talk about the dreadful accommoda-Embracing a large and general assortment, among tion of the poor. We ask them do they know the sufferings of our sovereign lady, the Queen -of the field warshal, her husband -of the little princesses, happily too young to know seys; Kentucky jeans; satin vestings; silk and the full value of their sonows? In the ignorance of our democracy we envied the luxurcashmere robes; muslin delains; alpacas; calicoes; lous conveniences of Buckingham palace. For hours and hours have we stood contemplatcarpetings; serges; fig'd and plain silks; silk ing its body and two wings, and saving every five minutes to confidence to ourselves; "That's a paradise of stone, that is. That's a garden of Eden, without a snake." And now-but our feelings are such that we must begin another paragra, 5 to give vent to them. Now we learn that the dwelling place appointed for our sovereign her prince and babies, is elastic suspenders; ladies' and gentlemen's merino a most comfortless abode; and a place of shirts; silk shirts; agree checks; dimity; plaid nooks and corners; a place of rocking noises and villainous odors. Her majesty is absolotely lodged -but we take from Mr Blore's printed report :-

"The portion of the palace occupied by her majesty and his royal highness Prince Albert as private apartments, is in the North wing; that they were not calculated originally for a married sovereign, the head of a family: that the basement of this wing is also deed by the chamberlain's department for store As the above goods were bought unusually low rooms, work shops, &c., there being no in the New York and Boston markets, principalty accommodation in any other part of the palace for these services; the consequence of this arrangement is, not only that the noise and smell from these workshops, in which cabinet makers, upholsterers, &c., are constantly at work, (independent of the obvious impropriety of such services being performed in a part of the building so contiguous to the royal apartments,) are at times positively offensive but that the arrangement is not altogether fice from the risk of fire, a quantity of off being used, and large fires kept for boilling glue, &c There! Who, now, will envy the Queen of England? Dear lady! while in their are oviparous, that is, they by eggs from ignorance people think she is breathing airs of Araby, she is offended, stifled by the fumes of a glue pot. And when, desirous of pouder-

And then the blessed royal babies. Only

"It is only necessary to state that the whole of the accommodation which can at the ment conisits of a few rooms in the attics of width to convert them into smaller rooms : Almost all birds construct a nest, the form and as the royal children could only occupy necessary to cut the height of the ground floor
