### IMPORTANT TO MILL OWNERS. HOTCHKISS' Vertical Water Whel.

THE Subscribers having witnessed the successful operation of these wheels, were indeced to purblus the right of using them in the state of North Carolina; and they now offer for sale individual frights, at FIFFY do lars, or rights for a whole

county, on reasonable terms. Besides being generally adopted in the Northern States, these wheels are coming into general use In the southern States. We have sold about 100 Rights, 30 of which are in successful operation in Camberland county.

These wheels are more durable, and more easily applies order when properly put together than the Titter wheel. They will save one-third of the witer, and run will in back water, when there is a head above. The speed of the saw is increased to more than double the strokes per minute, We reler, as a ngothers, to the following gentle-

men, some of whom have had the wheels in operation 12 months or more; and from many of them, and others, we have received certificates expressing their high approbation of the superior advantages of these over the flatter wheel, and stating that Wheir saws will cut 2549, 3000, 35 0, and even as high as 5 100 feet per day, and save one-third of the water.
