DEAFNESS—DR MCNAIR'S ACUSTIC OIL.

The deaf from infancy, often receive in a most remarkable manner their hearing when they least expect it, by the use of this Oil, which shows them how easily they might much sooner have had their hearing and saved themselves and their friends the pain of conversing in a loud tone, without pleasure, or of being neglected and blamed, to avoid that distress which is felt constantly by the deaf person and his hearers. (How sacred a duty therefore it is, that we use all necessary means to remove such an ailment, and enjoy the social qualities implanted in our nature! This Ear Oil has the effect so natural a tone, as to restore the hearing when lost or impaired. It is proved by so many well known cases, that where known, it needs no praise. The great wish of the proprietor is, that each may speak to others of its uncommon virtues, till sufferers may know and be relieved and restored by its use.)
Known by my signature on the flask. Price, \$1 per flask.
DONALD MCNAIR, M.D., Comstock & Co, New York, are the wholesalers of this Oil.

HOWE'S UNITED STATES Patent Water Wheel.

THE subscribers having purchased of the United States Water Wheel Company, the exclusive right of making, vending and using S. B. Howe's Patent Cast Iron Direct-acting Water Wheel, in that portion of Virginia lying south of the James River, and east of the Blue Ridge, with North Carolina. This territory is now under the management of that territory, that they hold themselves in readiness to accommodate all persons that would wish to advance their water power, under the most liberal terms. Our pattern has been so improved, that a competent Mill Wright could soon put the wheels in operation. The Spout and Gate, for the small Wheels, are all of Iron and fitted at the shop; in the shaft and Gate, are also of suitable strength to answer the purpose designed.
As regards the utility of the Wheel, we refer to the certificates attached. There are hundreds of them running at the north, and a few in Virginia. Some of the Virginia certificates are here attached. The certificates will be sent to any one who wishes to see them. These Wheels have displaced all other wheels known to the subscribers.
IRA STANBROGH, who has been engaged for the last seven years in putting them up, feels himself at liberty to state the most important facts. The price of the above named Water Wheel has been reduced about one-third since the purchase by the subscribers, and we feel confident that we shall be able to give satisfaction to all that order our wheels.
For further particulars, address either of the subscribers, at Petersburg, Va., or A. P. HURT, our Agent, Fayetteville, N. C., who will attend to all orders with despatch.
URIAH WELLS, IRA STANBROGH, June 19, 1847. 335-3m.

CERTIFICATES.

Mrs Ira Stanbrogh, of the State of New York, has put in operation for the Bartersea Manufacturing Company in this place, one of Howe's Patent Water Wheels, 7 feet in diameter, with 18 inch buckets, under the following circumstances: The mills contain 2,700 Thrustle and Danforth Spindles, 90 Lewis and Clarke Spindles, and the machinery which have been driven by two Breast Wheels, each 12 feet long by 13 diameter, under a head and fall of about 11 feet, but the location being subject to back water, these wheels did not work to advantage. Mr Stanbrogh having got confidence in his Wheel, not only that it would obviate the difficulty with back water, but he was willing to guarantee that it would drive all the machinery and save one-third the water then used; and having executed to the company a bond in \$2,000 for that purpose, it was determined to let him make the trial, which I am happy to say has resulted very satisfactorily, and that he has fairly and fully fulfilled his contract, and I would recommend his wheel to public notice.
J. B. VARNUM, Agent for the company. Petersburg, November 17, 1845.
This certifies that the How Wheel put in my mill eighteen months since, that ground, upon trial, 20 bushels of corn per hour, has worked so well and convinced me so fully that it is the best wheel driven by the force of water, that I have determined to put up another the present season.
WILLIAM MURRAY, Seadwell Mills, Albemarle co., Va., March 15, 1847.
This is to certify that I have had put in at my cotton mill, at the place aforesaid, containing 2,040 spindles, 3 doz Looms and one section of woolen Machinery, one of S B Howe's Patent Water Wheel, 5 feet diameter, 18 inch deep bucket under a head of 20 feet; that the said wheel has been in operation about six months, and from the improvement so far made, I regard it a valuable acquisition to the establishment.
JOHN TIMBERLAKE. The subscribers has also a very large Machine Shop and Iron Foundry, employing daily sixty hands and is well prepared to execute, to order, all kinds of Mill Gearing, Tobacco Presses, Flouring Mills, Steam Engines, Farming Implements &c.

Asthma Cured by Jayne's Expectorant.

Lambert's Lib. N. J. April 27, 1844.
Dr Jayne, Dear Sir—By the blessing of God, your Expectorant has effected a cure in me of my most distressing complaint. In December last, I was seized with great severity by a paroxysm of Asthma, a disease with which I had been afflicted for many years past. I was attended with a hoarseness and soreness of the lungs and throat, together with a laborious cough, and complete prostration of strength, and worn out with suffering, when a bottle of your Expectorant was sent to my house. At first I thought it was nothing but quackery, but seeing it was so highly recommended by Dr Going, with whom I was well acquainted, I was induced to try it, and in a few days it completely cured me, nor have I ever had any return of the disease since. Yours, most respectfully,
JOHN SEGER, Pastor of the Baptist Church at Lambertville, N. J. Prepared only by Dr. D. C. Jayne, Philadelphia, and sold on agency by S. J. Hinsdale.

I'll tell you a story of these same hills, and this river, that may be worth listening to. It is a legend I heard from an old Indian, long ago, who has since gone to the distant hunting grounds of his fathers. I like to preserve these tales of the past, which may or may not have their foundations in fact, for they must in time be the material for our national poetry, when our nation finds time to write or read poetry. You must let me tell the story in my own way.
About a mile above here, on the opposite side of the river, is a precipice, two hundred feet high, over-hanging the stream. The ascent from the land side is gradual and comparatively easy, but from the river there is no reaching it. About forty feet from the top is a ledge of the rock, or a shelf, some six feet wide, on which grow a few cedar bushes, sending their roots into the thin soil which has collected from decaying leaves, and clinging with wonderful tenacity to the rock. Thus much by way of premise, and now to my story.
