COLONIZATION.

LETTERS FROM COLONISTS.—Extracts of a letter from Mr. E. J. Roy, dated New York, May 25, 1847.

Mr. TRACY.—Sir: You request me, though Capt. Barker, "to make some statements about business in Liberia generally."

As briefly as possible, I will delineate.

Business of every description is remarkably good in that country, better than in this.

If those engaged in them will persevere to make them so, prudent men engaged in agricultural and mechanical pursuits, may hope very soon to grow rich; both of which have been too much neglected, because it was so easy to make a handsome living at something else.

Our honorable Governor and some other gentlemen have gone extensively into agriculture. The late successes of some of our citizens in the producing and exporting to advantage some coffee, ginger, arrow-root and Guinea pepper, together with a horde of other things, have induced and are inducing many to engage in farming.

Mechanics of various orders were wanted last fall in Monrovia at \$2 50 and \$3 per day, and could not be found to answer the demand.

Our currency is camwood, worth \$60 per ton on the coast, the basis of our paper money. Palm oil and ivory, too, are staple products, and will bring the cash when we get hold of them, either to export or to sell on the coast. Which products are abundant particularly the former of the last two mentioned. It is doubtless known that every man gets a farm, with an addition to it if he have a family.

Sir, I have been opposed to Colonization most of my life, (not having considered the merits of so many good men, too intelligent to be duped, and too noble and rich in money and virtues to engage in an artifice, or be deceitful.) because I believed evil men selfishly concocted the plan that the slaves might be more contented, and the future possession more secure to the masters, by sending away a surplus free population to Africa under the guise of philanthropy.

I have steadily had my mind fixed upon a foreign land, since my early youth; a land of African government; for there I believed our elevation would take place. But you would ask, how did it happen that I went to Liberia, when so great an aversion and objection towards the Colonization scheme existed? I answer: after losing my wife, and selling property on note and mortgage, &c., I went to acquire a knowledge of the French language, preparatory to going to St. Domingo. During my stay, I became acquainted with a fellow boarder, who by some means learned that I had some money. He said if he were I, he would go to Liberia, for he could make so much and so much by an investment in such and such things which he told me. I informed him that I would never turn traitor to my people for gain; having reiterated what I have already told you as to my objections. But further, I told him I could not live there.

But he said he had lived there three years; and many other things, which I believed. Afterwards I came to this city, saying that I would take a little adventure to Liberia. If I thought that I could not live there, I would return, to go to St. Domingo. But the longer I staid, the better pleased I became with the country. And, no matter what my former opinions were, or those of others, I saw that Africa presented more inducements than any other land for the general amelioration of the African race.

In natural resources and beauty, it is second to none. About health, abstinence, and in my opinion in all things, a very sure guaranty of life and health. In proof of my believing that others can live, I have just returned from the West with my two children bound for Liberia. There we shall be patriots; for patriotism is fostered by so many causes. May heaven's blessing rest upon the best of human agencies for our elevation in the scale of intellectual, moral and religious virtues.

I am, Sir, Your humble servant, E. J. ROYE.

"An' so you're going' out to the East Indies, my darlint Mrs Moroney?" said an old Irish cove to a young wife of a soldier about to embark for Madras. "I've been in them parts meself, and well do I remember the torments I went through night and day with the muskatoes. They have long suckers hanging down from their heads, and they'll draw the life-blood out of ye, before you can say 'peas'?" This terrifying account lived in the memory of the young woman; the vessel made Madras roads, the decks were soon crowded, all hands delighted at the sight of land, Mrs Maroney amongst the rest—but her joy was of short duration, for on the shore she perceived an elephant's horn-struck at the sight, and in breathless agitation, she approached the mate, exclaiming with uplifted hands, "Holy mother! is that a muskato?"

ANECDOTE.—Rose, the private and confidential secretary of Louis XIV, had married his daughter to M. Portall, president of the French Parliament. The husband was constantly complaining of the temper and disposition of his daughter. "You are right, said Rose, she is an impertinent jade, and if I hear more complaints of her, I will disinheret her." The husband felt no desire to make any more complaints of his wife.

Dr. JOHNSON'S PUDDING.—During the doctor's excursion to Scotland, Boswell generally preceded him in search of food, and, being much pleased with an inn, he went into the larder, where he saw a fine leg of mutton, which he ordered to be roasted, and gave particular orders for a nice pudding. On his arrival the doctor got off his pony, and, finding his coat damp, went into the kitchen and threw it on a chair before the fire; he sat on a hob near a little boy who was busy attending to the meat. Johnson did not like the appearance of his head, and, upon the boy's scratching, thought he saw something fall upon the mutton. The dinner being ready, the doctor fell eagerly to work on the pudding, and left the meat for Boswell. The table being cleared, Boswell said, "Doctor, while I was eating the mutton, you seemed frequently inclined to laugh; pray tell me what tickled your fancy?" The doctor then told him all that passed at the kitchen fire. Boswell turned pale and sick, and said to the boy, "You little filthy hound, when you basted the meat, why did you not put on the cap I saw you in this morning?" "I could not, sir," replied the boy, "for mummy took it to boil the pudding in." The doctor gathered up his Herculean frame, with his mouth wide open, and stomach heaving; at last he recovered his breath, and roared out, with the lungs of a Stentor—"Mr Boswell, sir, leave off laughing, and, under pain of my eternal displeasure, never utter a single syllable of this abominable adventure to any soul living while you breathe."
