Nervous Energy
3.000 female complaints, and over
7.000 cures of diseases of the blood.

Viz. Ulcers, scrofula, erysipelas, salt rheum, pimples on the face, &c. together with numerous cases of consumptions, liver complaints, spinal affections. &c. This we are aware must appear incredible, but we have letters from physicians and our agents from all parts of the U. States, informing us of arts and in a parts. R. Van Enskirk, Ess. one of the of extraordinary cures. R. Van Buskirk. Esq. one of the most respectable Druggists in Newark. N. J., informs us that he can refer to more than 150 cases in that place alone. There are thousands of cases in the city of N. York which we will refer to with pleasure, and to men of character well

RHEUMATISM .- More than one thousand cases of chronic rheumatism have been cured by the use of Doctor Townsend's Sarsaparilla

To Dr. Townsend. sir: I think it my duty to return youny sincere thanks for the benefits I have experienced by my sincere thanks for the benefits I have experienced by the use of your Extract of Sarsaparilla. I was afflicted for many months by Rheumatic pains and also inflammation of the liver; the sufferings which I endured from these diseases rendered my life a burden to me. I tried every remedy that was prescribed for me by some of the best physicians in the city, but without receiving any permanent qenefit. I considered myself incurable, but by the advice of a friend was induced to try your compound. I had but faint hopes of success, but I am happy to say, I had not taken more than half a bottle before I experienced relief; this induced me to persevere in its use, and two bottles have effected an entire cure. It is now some months since I used your remedy, and I am grateful and happy to say I never enjoyed better health. I shall take great pleasure in recommending it to the afflicted, for by its use I firmly believe my life was saved. With the greatest respect, allow

Gutta Percha. This is the Malay name of a tree-and the gummy substance exuding from it, at certain seasons of the year -which attains a large growth, sometimes of January, 1848. six feet in diameter, in Malay and several of the East India Islands. This gum resembles India Rubber, and has of late been introduced into the arts of England, and last year the exports from Singapore to England chiefly, were nearly 100,000 pounds; selling at the former place, at about 8 cts per pound. It was first introdiced into this country through the agency of Aaron H. Palmer, who presented specimens of it to the club, with the above remarks. This gum is valuble in turpentine and a kind of varnish may be obtained from it. It was also stated that it might be used as glue. At the temperature of the atmosphere it is hard and almost unelastic, but at a boiling heat, it softens and may be moulded into any shape, which it will retain when cooled. It is said that it is unaffected by acids and chemical agents generally, and is not altered by atmospheric changes, damp, heat, &c. It may be formed into threads, strong as cat-gut, and when woven with threads of flax, forms a cloth of great strength, and when covered with a thin laver of the substance, is completely water proof.

Manures .- This subject was then brought

and descended. Manures were of two kinds-gaseous, and sale; the former ascended, and the latter descended. [I)r Underhill's theory, is that all mannres, through the action of the sun's rays, ascends by capillary attraction, except when washed down by the mechanical action of the rains.] Mr Pike said he thought it would be of more consequence to discuss the availability of manures. The most important question was, what manures was best adopted to the soil. For his part, his diately, will be waited on by a collecting officer.

A. & E. McPHERSON. experience had satisfied him that liquid January 1, 1848.

Judge Livingston said that it had been wheat sowed was prepared as follows: estimated that an acre contained 8000

GRAVES OF THE REGICIDES .- It is generally known that the dust of the two regicides Whalley and Dixwell repose in the rear of the Centre Church in New Haven, and that their graves are orly distinguishable by one or two fragments of stone. We are glad to learn from the slacked lime was mixed with the wheat and papers of that city that the two Messrs Dixwell of Boston, having satisfied themselves that one of the persons buried there is their with the lime stirred into it was left in the horshead over night, which produced toe has been readily granted by the city, to erect a monument to the memory of the

A Fowl Imposition. - A gentleman the wheat until it became dry enough to speaking of poultry says: "Much attention handle. The wheat thus mixed with ashes has been paid to the rearing of poultry at and lime, was immediately sown and har- the west, and the method now in use of rowed in. The quantity of wheat thus hatching chickens I consider far superior sown would equal about six bushels to the acre. The straw grew, fresh and clean, and yielded about twenty bushels to the acre. It is simply to fill a barrel with eggs, head it up, and set a hen upon the bung."—Charleston News.
