BALTIMORE PIANO FORTE MANUFACTORY. VERY IMPORTANT INVENTION.

It has long been a question among teachers and amateurs Some at this time contend for a light touch, while others. Some at this time contend for a light touch, while others, with equal ability, advocate the heavy. This question is now permanently settled. WISE & BROTHER have invented a contrivance by which the same Instrument may be instantly set to any required touch, by the turning a single screw.varying, if necessary, three hundred and sixty-five differences. The advantages of this are evident both to teachers and amateurs, as lessons may be practised on the heavy, and exhibited on the lighter touch, to suit exactly any physical capacity which is agreeable to fact and progressive lessons. The contrivance is simple, and may be applied to any common Piano. We invite the most critical investigation. Patent is about to be taken for the improvement.
