A new and rather novel improvement in constructing roads is rapidly developing the resources of the agricultural districts of N. York bringing into play the enterprise of our farmers, and giving them advantages for travel little short of railroads; and in a manner particularly adapted to their accommodation, and at a comparatively small rate of expense.

Plank roads can be made, as a general rule, for about the year's interest of a wellmade railroad. About one hundred companies have already formed, or are about being formed, to construct these roads in various parts of the State of New York. The time is coming when most of roads of he State and Union, where there is any considerable amount of travel, and timber reasonable, will be planked.

State has fully equalled, if not exceeded, the expectation of their projectors. The fact that a pair of horses can with ease, and with increased speed, carry double the weight on a plank road that they can on the best common roads, without any other consideration, settles their value. When the roads are bad, as they usually are spring and fall, four times the weight can be taken on plank roads at such seasons that can be taken on common roads. The farmer can go to market at all times when he cannot work his farm on account of weather, or from other causes; and when other roads are impassable, he can trot off with his pair of horses and two tons' weight, and return (living some 15 or 20 miles distant from market) the same day; while with bad roads, taking the same weight, would require several days, besides great wear and tear of horses and wagons and harness-in fact, leaving actually little return after deducting expenses. This is no fanciful calculation; it has been fully proved. This improvement will bring up the value of farms within reach of markets, which have been greatly depressed by the low price of land at the West. The convenience of getting the produce of the farm to market will enable the farmer of the East better to compete with the farmer of the West. Although on or before the 1st day of February next. the cost of land is so much less at the West, the expense of distant transportation will

plank roads; they will for a long time answer the purpose of railroads, except on the great and central thoroughfares. Michigan should be wide awake on the subject. A plank road is to be immediately built

between the city of Schenectady and the village of Saratoga Springs-passingthrough the materials can be procured in season, the materials can be procured in season, the calculation is, to have the road built and ready in time for the pleasure travel of the present year; so that travellers Dry Goods, Hardware, Cutlery, from all quarters of our land can carry home accounts of it. This road will pass through a country for the most part very beautiful. It is contemplated to have spacious omnibuses, to run in connexion with the Albany and Schenectady railroad and the White Hall railroad; so that passengers can pass over the road in two hours, and to and from Albany in three hours, or less. Arrangements will probably be made to ticket passengers through from New York, or from Saratoga, via Albany, to New York; so that no care need be taken about luggage until it is deposited care of luggage taken from them by such traveller on plank roads.

The press cannot be too diligent in callthe South, where timber is cheap, and the suit purchasers. common roads execrable, they will be of great value; indeed, in every part of our Union, they can be constructed to great Law. advantage-giving employment to the laboring classes, increased value to real estate, and a good investment to stockholders. It is an improvement beneficial to all classes. Some fear has been expressed that the timber of the country would be exhausted by the rage for plank roads; but such will not be the case. These roads will be constructed so as to lead to those districts where the timber is now ready, but of little or no value to any one, or the land on which it grows, on account of the expense of getting it to market.

These plank roads are about to open MARBLE sources of wealth to the northern part of this State of more value to the public than BY GEO. DAUDER. the gold mines of California. It is found that very litle grading is required; one foot rise in from twelve to sixteen can easily be overcome, with a pair of horses, with two tons. If made perfectly level, advantage would be taken, and teams loaded with four or five tons would pass without any additional toll-carrying a weight too heavy for such a road. Legislation will be required to regulate the weight of loads, so as to prevent imposition.

When these roads were first thought of, it was supposed they would not answer, on account of the perishable nature of the material used; but it is now discovered that these roads wear out before they decay; and that while wearing out, the income is so great, that they will afford 10 per cent. to the stockholder (the maximum rate allowed by law in the State of New York,) and from 10 to 20 per cent. surplus to keep the

road in repair, and relay it when necessary It will take above 3,000 loads of plank of three inches in thickness, and eight feet long, to lay the Saratoga Schenectady road. In about every seven years the which he offers at very reduced prices for cash or on time worn plank will have to be replaced; the old ones will be valuable to the farmer on the line for many purposes. These roads will also give a good footwalk at all seasons of the year free of cost, and save the trouble of much horse harnessing in neighborhood-

pride of our State.

additional income to the great central lines of railroad and canals already constructed. Plank roads diverging from each side of them, extending through fertile valleys up to our mountain regions, will bring all the OR resources of our State into active play, employing every idle hand, and every idle dollar. Tens of thousands of dollars are now locked up in our agricultural districts -one hundred here, five hundred theredoing nothing for the want of a favorable investment. Plank roads will call forth such means, and set it at work for the public good, and at the same time give a fair return in interest.

To the Public.

The Hotel in ELIZABETHTOWN, Bladen county, known as the BRICK HOUSE, is still kept open for the reception and accommodation of regular and transient Thus far every plank road made in this January. 13 1849.

CALIFORNIA GOLD! DISCOVERED BY SIGNOR D'AI VEAR'S GOLDOMETER!

THE GOLD SEEKER'S GUIDE! SECRET ART OF FINDING MINES OF GOLD, SILVER, IRON, LEAD, COPPER, COAL, and other MINERAL RICHES.

The first discovery of Gold in California was made by Don Jose D'Alvear, an eminent Spanish Geologist, Chemist and Natural Philosopher, by means of a newly invented Magnetic instrument,

THE GOLDOMETER, OR GOLD SEEKER'S GUIDE. Signor D'Alvear has just arrived at N. York, from the Gold regions of California, by way of Panama, Chagres, and New Orleans, bringing with him a very large quantity of Gold ore, valued at nearly one million of Dollars, which he collected there, long before the existence of the Gold mines became known to the residents of California generally.

HISTORY OF THE DISCOVERY.

Signor D'Alvear went out to California nearly wo years ago, in consequence of certain information which he had received of the geological character of that country, with the firm belief that vast mines of precious metals would be revealed there, upon careful investigation. He was encouraged to this enterprise, also, by his confidence n the powers of a certain Magnetic instrument which he had invented, called the "Goldometer," by whose aid he expected to be directed at once to the "Gold Placers," if any such existed. Nor were his expectations disappointed. His scientific calculations proved to be founded in truth and profound wisdom, and his new instrument, the Goldometer," fulfilled his highest hopes. In The following is an extract of a letter received less than two months after reaching California, from him: he struck upon one of the richest gold mines in that country, upon an obscure branch of the Sacramento river, in a gorge of hills extremely rocky and difficult of access, and seldom visited by the native Californians. Disguising his object under the pretence of purely scientic research. he obtained the aid of some fifteen or twenty simple and faithful Indians and steadily pursued his task, collecting often more than \$3,000 worth of gold in a single day, which he concealed in a deep ravine, without exciting any suspicion whatever, until after the discovery of gold at Capt. Sutter's Mill, when the mountains were ransacked by gold seekers, and Signor D'Alvear's "gold February next, unless previously disposed of, placer." the richest in all California, was beset with gready adventures It is now found that the real mines or sources of the gold, lie in the gorges of the mountains and not in the beds or sands of the rivers. Previous to leaving California, Signor D'Alvear sold his instrument, the Goldometer, a very imperfect one, for \$3,000. The person who purchased it confidently expected to make a handsome fortune, by simply finding "gold placers" and selling out the right of digging to the gold workers.

AND PUBLICATION OF THE GUIDE. Signor D' Alyear, in compliance with the request of numerous scientific gentlemen, has commenced serve to confirm the value of farms near the great markets.

Our new States, until they have more money, should go to work constructing many should go to work constructions for use, and a variety of Philosophia should go to work constructions for use, and a variety of Philosophia should go to work constructions for use, and a variety of Philosophia should go to work constructions for use, and a variety of Philosophia should go to work constructions for use, and a variety of Philosophia should go to work constructions for use, and a variety of Philosophia should go to work constructions for use, and a variety of Philosophia should go to work constructions for use, and a variety of Philosophia should go to work constructions for use, and a variety of Philosophia should go to wo cal hints drawn from the ancient and modern | ledging it, and commend it to the public. sciences, or the art of finding mines of Gold, Silver, Platinum, Quicksilver, Coal, Iron, Copper, Lead, and other mineral riches, the whole being given in a publication called the GOLD SEEK

ER'S GUIDE. This new work, and the Goldometer, are both now ready for sale

The Goldometer is so simple an instrument, that a child may learn to operate with it in five minutes. It is not affected by climate, moisture, or any other known cause, (except the natural magnet,) and will retain its power of pointing out mineral riches in the earth for any number of years. By the aid of the Guide any one may use the instrument at once with perfect success. FARMERS AND LAND OWNERS.

Farmers and land owners throughout the U. States, who have reason to suspect the existence of any kind of mineral riches upon their lands, should avail themselves of this opportunity to test that fact, by the surest of all known tests, before the abundance of discoveries in all parts of the country shall have lessened this source of wealth in their estate.

ADVENTURERS TO CALIFORNIA. Persons going to California cannot make a bet-

er investment than by purchasing one of these instruments, which will not only be worth fifty times its value there, to sell again, but will be of mestimable worth to those who go in search of gold, as has been proved by the most abundant experiment both in California and the U. S.

TESTIMONIALS. Signor D'Alvear does not deem it necessary to

ncumber this notice with a long list of testimonials, in proof of the value of the goldometer, and gold seeker's guide. The brilliant results of his labors in California, and the discovery, this very week, of fresh viens of Gold in Virginia, and beds of Coal in Rhode Island, by its use, are alone sufficent to stamp it as the greatest discovery of the age. Nothing but the extreme cheapness of the nstrument, and his desire to see it used for the benefit of mankind induces him to dispose of it at the low price for which he offers it. Besides this, his own desire for wealth is nearly satisfied

Astor House, New York, Dec. 21, 1848. The undersigned, having this day witnessed the practical operation of Signor Jose De Alvear's newly invented magnetic instrument, the goldometer, feel entirely satisfied that it possesses the extraordinary power of detecting Mineral ores hidden beneath the surface of the earth, and have no doubt that it will prove an invaluable aid in the discovery of the Mineral resources of the United States and the world. J. R. DRAPER, Jr. Chemist,

L. S. TIERMANY, Magnetic Ins. Maker. G. S. DANA, Geologist.

Los Angelos, California, August, 1848. This may certify that the undersigned is fully convinced that Signor Jose D'Alvear was the first discoverer of the gold deposites of Calfornia, and that this discovery was made by the aid of a Magnetic instrument called the Goldometer, which I have seen successfully applied to the discovery of veins of gold ore, in places where no indications of that substance appeared upon the surface saved my life, and would not be without it under Lt, 3d Artillery, U. S. Army.

NO AGENTS. In consequence of the difficulty of finding faithful agents, and of preventing frauds, where arti-Signor D'Alvear has determined to sell none of his works or instruments unless ordered by letters sent directly to him, when the desired publication, or instrument, will be forwarded under genuineness may be removed.

parting the gold detecting power is known to no the city, who have used it with perfect success person whatever, except the original inventor. in this and other distressing diseases. (The Goldometer, and gold-seeker's guide, will both be sent by mail, closely enveloped and sealed, and therefore, not subject to inspection by Postmasters, for the sum of three dollars, sent

post paid to Signor Jose De Alvear, box 2713, New York city The Instrument is very light, and the Guide is printed on thin paper—so that the charge by mail, or express, will be very small to any part of the United States. The price of the gold seekers guide alone, is one dollar, sent as above.—Address,
SIGNOR JOSE DE ALVEAR,

DR. TOWNSEND'S SARSAPARILLA.

This extract is put up in quart bottles; it is six times cheaper, pleasanter, and warranted superior to any sold. It cures diseases without vomiting, purging, sickening, or debilitating the patient.

GREAT FALL AND WINTER MEDICINE. The great beauty and superiority of this Sarsaparilla over all other medicine, while it eradicates diseases, it invigorates the body. It is one of the very best fall and winter medicines ever known; it not only purifies the whole system and strengthens the person, but it creates new, pure, and rich blood; a power possessed by no

other medicine. We have letters from physicians and our agents from all parts of the United States, informing us of extraordinary cures. R. Van Buskirk, Esq, one of the most respectable Druggists in Newark, N. J., informs us that he can refer to more than 150 cases in that place alone. There are thousands of cases in the city of New York, which we will refer to with pleasure and to men of character. It is the best medicine for the preventive of diseases known

RHEUMATISM. This Sarsaparilla is used with the most perfect success in rheumatic complaints, however severe or chronic. The astonishing cures it has performed are indeed wonderful. Other remedies sometimes give temporary relief, this entirely eradicates it from the system, even when the limbs and bones are dreadfully swollen. Hear Mr Seth Terry, one of the oldest and most respectable lawyers in Hartford, Conn.

Dr. Townsend: I have used one bottle of your Sarsaparilla, and find it is excellent in its effects upon a chronic rheumatic pain, to which I am subject, from an injury occasioned several years ago, in a public stage. Please send me two bottles to the care of Dr. Seymour. I have conversed with two of our principal physicians, and recommend your Sarsaparilla.

SETH TERRY. Hartford, March 12, 1845.

GIRLS, READ THIS.

You who have pale complexions, dull eyes, lotches on the face, rough skin, and are "out of spirits," use a bottle or two of Dr. Townsend's anmarried ladies.

GREAT FEMALE MEDICINE. Dr. Townsend: My wife being greatly distres-sep by weakness and general debility, and sufferng continually by pain and a sensation of bearing down, falling of the womb, and with other difficulties, and having known cases where your medicine has effected great cures, and also hearing dicine has effected great cures, and also hearing the describes and the stomach and the stomach nor operate on the bowinstructions for use, and a variety of Philosophi- fits she received, I take pleasure in thus acknow-M. D. MOORE,

Corner of Grand and Lydius sts. Albany, Aug. 17, 1814.

TO MOTHERS AND MARRIED LADIES. This extract of Sarsaparilla has been expressprepared in reference to female complaints. o female who has reason to suppose she is aproaching that critical period, "the turn of life." hould neglect to take it, as it is a certain preventive for any of the numerous and horrible diseases to which females are subject at this time of life. This period may be delayed several years by using this medicine. Nor is it less valuable for those approaching womanhood, as it is calcuated to assist nature, by quickening the blood and invigorating the system. Indeed, this medicine is invaluable for all the diseases to which women are subject.

It braces the whole system, renews permanentv the natural energies-by removing the impurities of the body-not so for stimulating the system as to produce subsequent relaxation, which is the case of most medicines taken for female weakness and disease

SCROFULA CURED.

This certificate conclusively proves that this Sarsaparilla has perfect control over the most obstinate diseases of the blood. Three children cured in one house is unprecedented.

Dr. Townsend, Dear Sir: I have the pleasure to inform you that three of my children have been cured of the Scrofula by the use of your excellent medicine. They were afflicted very severely with bad sores; have taken only four bottles; it took them away, for which I feel myself under deep obligation. Yours respectfully, ISAAC W. CRAIN.

New York, March 1, 1847.

OPINIONS OF PHYSICIANS. Dr. Townsend is almost daily receiving orders rom physicians in different parts of the Union.

This is to certify that we, the undersigned, physicians of the city of Albany, have in numerous cases prescribed Dr Townsend's Sarsaparilla, and believe it to be one of the most valuable preparations in the market. H. P. PULING, M. D.

J. WILSON, M. D. R. B. BRIGGS, M. D. P. E. ELMENDORF, M. D. Albany, April 1, 1846.

UNITED STATES OFFICER.

Capt. G. W. McLean, one of the United States Marine Corps, and member of the New Jersey Legislature, has kindly sent us the following certificate. It tells its own story:

Rahway, Jan. 25, 1847. A year since, I was taken with the influenza and my whole system left in a debilitated state, I was induced to try Dr Townsend's Sarsaparilla. and after taking two or three bottles, I was very much relieved, and attribute it entirely to the said Sarsaparilla. I have continued taking it, and find that I improve every day. I believe it any consideration. G. W. McLEAN.

DYSPEPSIA.

No fluid or medicine has ever been discovered which so nearly resembles the gastric juice or cles of this nature are sent out for general sale, saliva, in decomposing food and strengthening the organs of digestion, as this preparation of Sarsaparilla. It positively cures every case of dyspepsia, however severe or chronic. If any doubt this assertion, we invite them to read the his signature and seal, so that all doubts as to its following indispensable testimony of a gentleman enumeness may be removed.

Of the highest respectability. If this is not entirely satisfactory, we would be happy to give which may hereafter appear, as the secret of im- other reference to some of the first families in

Bank Department, Albany, May 10, 1848. Dr Townsend, Sir: I have been afflicted for several years with dyspepsia in its worst forms, attended with sourness of the stomach, loss of appetite, extreme heartburn, and a great aversion to all kinds of food, and for weeks (what I could eat) I have been unable to retain but a small portion on my stomach. I tried the usual remedies, but they had but little or no effect in removing the complaint. I was induced, about two months since, to try your extract of Sarsa-parilla, and I must say with little confidence, but after using nearly two bottles, I found my appetite restored, and the heartburn entirely removed, and I would earnestly recommend the use of it to those who have been afflicted as I have been.

Yours, &c. W. W. VAN ZANDT. For sale in Fayetteville by SAM'L. J.

HINSDALE, Druggist. December 30, 1848.

IMPORTANT TO MILL OWNERS. HOTCHKISS' Vertical Water Wheel.

THE Subscribers having witnessed the succesful operation of these wheels, were induced to ourchase the right of using them in the state of

North Carolina. Besides being generally adopted in the Northern States, these wheels are coming into general use in the southern States. We have sold about 200 Rights, 40 of which are in successful operation in Cumberland county.

These wheels are more durable, and more easily kept in order when properly put together than the flutter wheel. They will save one-third of the water, and will run in book water, when there is a head above. The speed of the saw is increased to more than double the strokes per minute We could refer to many gentlemen, some of whom have had the wheels in operation twenty. four months or more; and from many of them and others, we have received certificates expressing their high approbation of the superior advantages of these over the flutter wheel, stating that

their saws will cut 2500, 3000, 3500, and even as high as 5000 feet per day. They keep constantly on hand for sale, pairs of wheels, (vaying in size to suit different heads of water,) in Wilmington, Fayetteville, Washington, and Newbern, N. C.; and by Richard Yarborough, Caswell county! E A Brevard, Lincoln; J T Dodson, Danville, Va; Uriah Wells. Petersburg, Va.

The price of a right for one pair of wheels is \$50, and county rights will be sold on reasonable We caution all persons throughout the State gainst paying any person but ourselves, or our authorized agents, for the right of using these

wheels. NOTICE TO WILL WRIGHTS .- If you wish employment, acquaint yourselves with putting in these Wheels, as we now wish to employ at least 1000 in this business in different parts of

DUNCAN McNEILL. ARCH'D McLAUCHLAN, A A McKETHAN. C. T. GARDNER. Fayetteville, January 31, 1847.

Turpentine Stills. Those in want of Turpentine Stills are informed that they can be furnished by me at the shortest notice, and at reasonable prices. They would do well to give me a call before purchasing North. F. T. WARD.

March 25, 1848. TIN WARE, Wholesale and Retail.

CARRIAGE MANUFACTORY.

Nearly Opposite Liberty Point. The subscriber having taken the stand lately occupied by Simpson & McLaughlir, respectfully returns his thanks for the liberal patronage heretofore extended to him, and hopes by unremitted attention to business to merit a contin-

uance of the same. I have on hand several vehicles : Carriages. Barouches, Buggies, Rockaways, Vaggons, &c., of the most approved style, which, for lightness

and durability, compare with any made here or elsewhere. Persons wishing to purchase will do well to call and examine them, as I am determined to sell very low for cash or approved notes. Having had several years experience in one of

the largest establishments north, I am prepared

to manufacture Carriages of any description, at the shortest notice. All work warranted for twelve months; and repaird, free of charge, should it fail in point of wokmanship or mater-REPAIRING neatly executed at the shortest notice and most reasonable charge. Orders thankfully received.

A, C. SIMPSON. Fayetteville, Jan. 13, 1849.
