#### TO SPORTSMEN.

JUST received a fine assortment of Fish Hocks Lines, and Bottles covered Wicker. For sale by W. PRIOR. 527-3w.

March 31, 1849.

## NOTICE.

I OFFER for sale the following Property on Lower Little River in this county :-One Saw in the Munroe Mills, 12 miles from

town and 11 from Murchison's Factory. The mill has been recently rebuilt, and is now in complete repair. The stream affords a plentiful supply of water and easy navigation to Wilmington, and offers advantages for buying timber and sawing on shares, unequalled by any in this part of the country.

A small Farm adjoining the Mill, most of which is rich swamp land just cleared and ready for cultivation, and on which are a comfortable Dwelling house and improvements.

I have also an abundance of fine Timber on the stream, above the Mill. which I am willing to

J. C. HOOPER Fayetteville, March 24, 1849. 525-tf

#### HOTCHKISS' Vertical Water Wheel.

There are several hundred of these wheels in in operation in different counties in North Carolina. . For proof of their great advantage over the common flutter wheel, or any other wheels now in use for saw mills, we confidently refer to those who have applied them to their mills. We can recommend them particularly for their su-periority in cases of a low head of water, or back water.

We still keep a supply of Wheels, suitable for different heads of water, at Wilmington, Newbern, Washington, Edenton, and Fayetteville. The wheels may also be had of E. A. Brevard, Lincolnton, and Uriah Wells, Petersburg, Va. Persons wishing to obtain the right to use the wheels, will be served on application to D. Mc-Neill &

SPRING & SUMMER MILLINERY,

Extract of a letter from Edward Bingham, Esq., Druggist of Detroit.

Detroit, March 23d, 1841.

Dr. Charles Osgood, Dear Sir-1 have the past year sold hundreds of bottles of the INDIA Institute, as is represented by the nanufacturers CHOLAGOGUE prepared by you, and have found of interior machines. it to give universal satisfaction in the cure of Feit to give universal satisfaction in the cure of Fe-ver and Ague, Chill, Fever, Dumb Ague, &c. &c. I may say, I think, without hesitation, that I have never known it to fail in cases which have come under my own observation, where it has been faithfully used according to directions.

I am yours very truly, E. BINGHAM.

Extract of a letter from Messrs Scattergood, Haverstick & Co., of Philadelphia. Philadalphia, 2d mo. 21th, 1812.

Dr. C. Osgood, respected friend : We have had occasion to see the good effects of thy medicine in the case of a young man who had been troubed with chills a long time and could not get clear of them, but since he commenced taking a bottle of thy preparation, has entirely recovered and is now becoming quite stout.

Respectfully thy friends. SCATTERGOOD, HAVERSTICK & Co

DR. H. H. SHERWOOD'S

April 7, 1849. 6m.

Compound Chloride of Gold, FOR SCROFULOUS DISEASES

These remarkable medical remedies of the late eminent and well known Dr. Sherwood of New spout of vapor and water ejected is forked York, consisting of a preparation of magnetized and perpendicular till its force is spent. CHLORIDE OF GOLD, compounded with various other materials with great care and by a laborious process, and of a BITUMINOUS PLAS-TER, have been tested by an extensive practice of twenty-five years' continuance, and may now justly be considered as more successful than any other known remedy in the treatment of CON-SUMPTION in all its early stages, and of all Tuberculous or Scrofulous Diseases. For this liss of complaints they are now extensively dopted by physicians in their own practice in various parts of the country. They are prepared by us under the direction of the Executrix of the estate of the late Dr. Sherwood, to whom, by his will, his medical recipes are intrusted in the same manner in all respects as heretofore, and are always accompanied by Dr. Sherwood's valuable medical treatise upon the treatment of Chronic Diseases, a work which was the result of many years of labor and research, and which | with which it sculls and attempts to strike shows in the clearest manner the principles up- its enemy. The natural working of them on which the operation of his remedies is founded and their mode of cure. This work will enble any person to detect the nature and extent of scrofulous or tuberculous disease in himself or to windward. Of one that I have measurothers, by pressure on the ganglions of the spinal nerves, on the spaces between the vertebræ along each side of the spine

THE POPULAR CYCLOPEDIA

Of Modern Domestic Medicine. BY KEITH IMRAY, M. D.

AND LICENTIATE OF THE ROYAL COLLEGE OF SURGEONS, EDINBURGH.

This work gives a clear and concise idea of the nature of the distinctive symptoms, of the premonitory signs of diseases, of their predisposing causes, and of the methods of their treatment recommended by the most distinguished physicians.

The best modes of employing the medicines in general use are faithfully described; as are also diseases, and during convalescence. treated upon.

The publishers of the American Edition pretix valuable Treatises upon Anatomy, Physiology and Surgery; also Directions for the Treatment of the Sick, Management of the Sick Room,

Preparation of Food for the Sick, &c., &c.,

which is forcibly expelled all the water those huge denizens of the deep has been or breathing.

The form of the spout serves to distinguish at a distance the kind of whale, whether right-whale, (balaena mysticetus)

or sperm. The right-whate having two large orifices on the top of the back part of its head as it lies along in the water, the and it begins to fall over on both sides, looking then at a distance in shape like a Gothic elm parted into two branches. This can be easily perceived when the whale is either coming directly towards, or going directly off from the ship, the jets d' eau being sometimes thirty or even fifty feet high. The sperm whale, on the other hand, has but one blow hole, and that a little on one side or corner of its head, from which the ejected stream issues obliquely, and not straight up as in the right whale. Its propellers and means of defence are two fins planted a little behind the head on each side, and the flukes of its tail also, on their joints by the waves, after the animal is dead, will always carry the carcass ed, the fins were five feet long each, and the flukes twelve feet across, being horizontal. Of another, the body was thirty nine feet long and nineteen feet round, the head seven feet from its tip to the spout holes, three feet from the upper outside superficies to the roof of the mouth inside, making its entire head, with the mouth GATES, STEDMAN & COMPANY, closed, about 7 feet in diameter, or 21 feet

Iredell, Catawba. Third District. Lincoln, Gaston, round. The length of another which I have exactly measured, a sperm whale, was 59 Union,

feet long, and 30 feet round. The ear of the whale is extremely small, and so hidden like a mole's, that you would not find it without diligent search.
