DR. SHERWOOD'S Vibrating Magnetic Machines.

By recent improvements in these Machines, their power is doubled in cases of the same size, and the prices reduced to \$12 and \$14 each; the \$12 sizes being greatly superior to the \$12 sizes of other machines. They now run with more power and smoothness, and are better adapted for magnetizing patients than any other in use. Each case is accompanied with a Manuel (11th edition, p. 400, 32 mo.) in the English or French language, according to order, which contains clear and minute directions for the proper use of the instrument in the various diseases to which it is applicable, which are found to include many of the most peculiar and obstinate that are known to the medical profession. The Manuel also contains a synopsis of the different systems of medical practice, Allopathic, Homospathic, and Magnopathic, with a full glossary.

Physicians and others are cautioned against ourchasing the imitations of these machines, as they will be found of comparatively little value. No premium has ever been obtained over these magnetic machines at the American or any other Institute, as is represented by the nanufacturers of interior machines.

(17-As I have become the Agent for the sale of the above Machines from a conviction of their usefulness in disease, and not from any desire to speculate on them; and am responsible to the swner for them, they can only be obtained by the payment of the cash on the delivery of the Machine. I have deposited them with Mr Bayne at the Carolinian Office, who will show them, or deliver them on the payment of the cash price, and on no other terms. the payment of the cash price, and on no other terms.

CHARLES MONTAGUE. April 7, 1849. 6m.

DR. H. H. SHERWOOD'S Compound Chloride of Gold,

FOR SCROFULOUS DISEASES. These remarkable medical remedies of the late minent and well known Dr. Sherwood of New York, consisting of a preparation of magnetized CHLORIDE OF GOLD, compounded with various other materials with great care and by a laborious process, and of a BITUMINOUS PLAS-TER, have been tested by an extensive practice of twenty-five years' continuance, and may now justly be considered as more successful than any other known remedy in the treatment of CON SUMPTION in all its early stages, and of all Tuberculous or Scrofulous Diseases. For this class of complaints they are now extensively adopted by physicians in their own practice in various parts of the country. They are prepared by us under the direction of the Frecutrix of his will, his medical recipes are intrusted in the same manner in all respects as heretofore, and are always accompanied by Dr. Sherwood's valuable medical treatise upon the treatment of Chronic Diseases, a work which was the result of many years of labor and research, and which shows in the clearest manner the principles upon which the operation of his remedies is founded and their mode of cure. This work will enable any person to detect the nature and extent of scrofulous or tuberculous disease in himself or others, by pressure on the ganglions of the spinal nerves, on the spaces between the vertebræ along

each side of the spine. H. H. SHERWOOD'S Successors, No. 102 Chamber st., New York. Our Agent in Fayetteville, N. C., is CHARLES MONTAGUE.

Telegraphic dispatches received at Frankfort

Arrangements have been made to return the visit made by the French National Guards The Bank of France will, it is asserted, resume

specie payments in a short time, BALTIMORE, May 1, 1849. A convention assembled at Frankfort, Ky vesterday, to consider and determine upon the course proper to be pursued by those who are opposed to the continuation and perpetuation of slavery in the State, and they agreed to sundry propositions: 1. That slavery, as it exists in Kentucky, is injurious to the interest of the Commonwealth, is inconsistent with the fundamental principles of free government, is contrary to the rights of mankind, and should not be perpetuating are entirely new, having been purchased ed. 2. Any scheme of emancipation should be prespective, and only operating on negroes born after its adoption. They also agreed that the following provisions should be adopted in the new Constitution: I. CHLOROFORM APPLIED TO THE

A witness of the dear Redeemer's power."

o the inhalation of chloroform; surgeons have been turning their attention of late to the employment of this powerful sedative locally, in order to deprive of sensation parts intended to be operated upon. A very interesting experiment of this kind was made at the royal Cornwall Infirmary. England, as related by the Cornwall Royal Gazette, by Mr Spry, on a young man from the parish of Beage, who had been suffering for seven years from a very painful tumor in the sole of his left toot .-The pain had been gradually increasing with the size of the swelling since December last, so that he could not make a single step without greatly aggravating his sufferings. Folded lint, saturated with chloroform, was applied to the tumor, over which a piece of oilded silk was placed, to prevent its too rapid evaporation, and a few turns of a roller were made around the

foot to retain the lint in contact with the

After a quarter of an hour had elapsed, more chloroform was added to the lint, but the quantity used was rather less than two teaspoonfuls; and in about half an hour from its first application, it was found that the skin which would not before bear the slightest touch without pain, might now be compressed with impunity. The operation was now proceeded with, the patient betraying no sign of sufferings, either by the retraction of the foot, or by the expression of the countenance; and he afterwards assured the gentlemen present, that the only part of the processat which he felt any pain, was in the deepest! part of the incision, but that it was so little as not to be worth talking about. Every one is aware of the peculiar sensitiveness of the skin of the sole, and therefore this case was selected as a fair test of the chloroform effiacy when applied externally. The result was highly satisfactory, and the poor man looked on with the greatest composure, not moving a limb while the diseased part was being removed, although he had been taught to expect, before coming to the infirmary, that the operation would occasion great pain, and perhaps even a lock-jaw. - Scientific American.
