## "HOT KISS" Vertical Water Wheel.

There are several hundred of these wheels in  
operation in different counties in North Carolina.  
For proof of their great advantage over  
the common flutter wheel, or any other wheels  
now in use for saw mills, we confidently refer to  
those who have applied them to their mills. We  
can recommend them particularly for their su-  
periority in cases of a low head of water, or back  
water.

We still keep a supply of wheels, suitable for  
different heads of water, at Wilmington, New-  
bern, Washington, Edenton, and Fayetteville.  
The wheels may also be had of E. A. Brevard,  
London, and Uriah Wells, Petersburg, Va.  
Persons wishing to obtain the right to use the  
wheels, will be served on application to D. Mc-  
Neill & Co., Fayetteville, N. C.

mittent & Remittent Fevers &  
all the various forms of  
Bilious Diseases  
SPEEDILY & THOROUGHLY  
CURED  
By Dr. Osgood's India Cholagogue

Extract of a letter from Edward Bingham,  
Esq., Druggist of Detroit.

Detroit, March 23d, 1841.

Dr. Charles Osgood, Dear Sir—I have the past  
year sold hundreds of bottles of the INDIA  
CHOLAGOGUE prepared by you, and have found  
it to give universal satisfaction in the cure of Fe-  
ver and Ague, Chill, Fever, Dumb Ague, &c. &c. I  
may say, I think, without hesitation, that I have  
never known it to fail in cases which have come  
under my own observation, where it has been  
faithfully used according to directions.

I am yours very truly,  
E. BINGHAM.

Extract of a letter from Messrs Scattergood,  
Haverstick & Co., of Philadelphia.

Philadelphia, 2d mo. 24th, 1842.

Dr. C. Osgood, respected friend: We have had  
occasion to see the good effects of thy medicine  
in the case of a young man who had been trou-  
bled with chills a long time and could not get  
clear of them, but since he commenced taking a  
bottle of thy preparation, has entirely recovered  
and is now becoming quite stout.

Respectfully thy friends,

## DR. SHERWOOD'S Vibrating Magnetic Machines.

By recent improvements in these Machines,  
their power is doubled in cases of the same size,  
and the prices reduced to \$12 and \$14 each; the  
\$12 size being greatly superior to the \$12 size  
of other machines. They now run with more  
power and smoothness, and are better adapted for  
purchasing the imitations of these machines, as  
they will be found of comparatively little value.  
Each case is accompanied with a Manual (11th  
edition, p. 400, 32 mo.) in the English or French  
language, according to order, which contains  
clear and minute directions for the proper use  
of the instrument in the various diseases to which  
it is applicable, which are found to include many  
of the most peculiar and obstinate that are known  
to the medical profession. The Manual also con-  
tains a synopsis of the different systems of medi-  
cal practice, Allopathic, Homopathic, and Mag-  
netic, with a full glossary.

Physicians and others are cautioned against  
purchasing the imitations of these machines, as  
they will be found of comparatively little value.  
No premium has ever been obtained over these  
magnetic machines at the American or any other  
Institute, as is represented by the manufacturers  
of interior machines.

As I have become the Agent for the sale of the  
above Machines from a conviction of their usefulness  
and safety, and not from any desire to speculate on them; and  
anxious to see the owner of them, they can only be  
obtained by the payment of the cash on the delivery of the  
Machine. I have deposited them with Mr. Bayne at the  
Carolinian Office, where they will be delivered on  
the payment of the cash price, and on no other terms.

## DR. H. H. SHERWOOD'S Compound Chloride of Gold,

## FOR SCROFULOUS DISEASES.

This remarkable medical remedy of the late  
eminent and well known Dr. Sherwood of New  
York, consisting of a preparation of magnetized  
CHLORIDE OF GOLD, combined with vari-  
ous other materials with great care and by a la-  
borious process, and of a BITUMINOUS PLAS-  
TER, have been tested by an extensive prac-  
tice of twenty-five years' continuance, and may now  
justly be considered as more successful than any  
other known remedy in the treatment of CON-  
SUMPTION in all its early stages, and of all  
Tuberculous or Scrofulous Diseases. For this  
class of complaints they are now extensively  
adopted by physicians in their own practice in  
various parts of the country. They are prepared  
by us under the direction of the Executive of  
the Society for the relief of Sufferers from Scrofula,  
and are accompanied by Dr. Sherwood's valu-  
able medical treatise upon the treatment of CON-  
SUMPTION, a work which was the result of  
many years of labor and research, and which  
shows in the clearest manner the principles un-  
der which the operation of his remedies is found-  
ed and their mode of cure. This work will en-  
able any person to detect the nature and extent  
of scrofulous or tuberculous disease in himself or  
others, by pressure on the ganglions of the spinal  
nerves, on the spaces between the vertebrae along  
each side of the spine.

## FAYETTEVILLE, N. C.

JUNE 23, 1849.

## Death of ex-President Polk.

We learn with regret that a telegraphic dis-  
patch received here last night (Monday 18th)  
announcing the death at Nashville, of JAMES  
K. POLK, ex-President of the United States, by  
Cholera.

## Later From Europe.

The steamer Cambria arrived at Halifax on  
the 13th inst.

The accounts from Germany represent affairs  
to be in a state of general commotion. Vast  
numbers of Russians are penetrating into Hun-  
gary from different quarters, while the Magyars  
are retreating into their mountain fastnesses,  
where they will have a much better chance of a  
successful resistance. The city of Buda is said  
to have fallen into the hands of the Magyars,  
who are reported to have massacred five or six  
hundred of the inhabitants. They are also said  
to be in possession of Trezume, the only seaport  
in Hungary, and a place of great strength.

The New French Assembly convened at Paris  
on the 25th of May. The sitting was charac-  
terized by intense excitement, arising from a  
remark of the President that the safety of the  
body was endangered by the intrigues of Ledru  
Rollin to excite the mob against them. This  
imputation was considered of so offensive a char-  
acter that four Secretaries resigned their places,  
and a number of the Deputies were about leaving  
the Chamber, when the President extracted the  
issue.

The number of ultra radical members elected  
is supposed to be from 210 to 240. The Duke  
D'Aumale, one of the sons of Louis Philippe,  
was elected, but the decree of exile against his  
family disqualifies him. A bill for a general  
amnesty was lost by a majority of five votes.

The French army had not entered Rome, and  
the troops manifest strong indications of sym-  
pathy with the Romans. The French are also ex-  
posed to the effects of the fatal malaria, and dis-  
affection is rapidly evincing itself among the  
troops. The negotiations of the French am-  
bassador had utterly failed, and the Romans re-  
solutely refuse admittance to the French troops,  
either as friends or enemies.

The Neapolitan troops had withdrawn from  
the Roman territory, and the Austrians were in-  
active.

In the British Parliament no further debate  
had taken place upon the affairs of Canada. There  
is no foundation for the belief that the State  
prisoners in Ireland under sentence of death will  
be pardoned.

Intense misery still prevails in Ireland. In  
one district the people were in such a horrible  
condition of starvation as to have eaten dead  
bodies that had been washed ashore.

The Cholera had broken out in London, and in  
many other parts of the island.

The war between Denmark and Prussia still  
continues, with little prospect of its speedy  
termination. The town of Frederika had been  
taken by the Prussian troops, and the Prussian  
fleet had made its appearance at sea. This war  
appears to be exciting but little interest.

Liverpool, June 2.

Cotton, fair Uplands, are quoted at 4d., and  
New Orleans at 4 1/2d., the same as at last advices,  
with a large business.

Carolina Rice had declined in price. Flour  
was dull, and had also experienced a decline.  
Indian Corn had advanced, and sold freely at 35s.  
6d. to 37s. 6d. for white.

Telegraphed for the Charleston Courier.

New Orleans, June 11.

The steam ship Crescent City arrived yester-  
day, in six days from Chagres, with 176 passen-  
gers, among them Gov. Mason. The Crescent  
City has nearly a million of dollars worth of gold  
dust on board.

The steamship California had arrived at Pana-  
ma, with advices from San Francisco to the 1st  
May. She brings the information that all the  
representations that have been made in refer-  
ence to the abundance of gold are far short of the  
reality. The California was to have left again for  
San Francisco on the 15th inst.

The steamships Panama and Oregon, had left  
Panama for California, taking with them nearly  
all the passengers who were awaiting a convey-  
ance to the gold region.

James Sinclair, of New York, died on board of  
the Crescent City, on the passage, of diarrhoea.  
He had accumulated a fortune in California.

We understand that the razor strop  
man, who is now in town, sharpened the  
water's edge with one of his strops the  
other day, and that Jones's soap washed a  
man overboard.—Baltimore Argus

## CHOLERA.—The Charleston Mercury, in re- lation to the bromistone cure, says:

For the present, we intend to publish  
everything, which seems to promise a par-  
tial benefit to the public; and if we are  
accused in consequence, of favoring quack-  
ery, we will defend ourselves with the  
following pertinent passage from Lacou:  
"It is better to have recourse to a quack,  
if he can cure our disorder, although he  
cannot explain it than to a physician, if he  
can explain our disease, but cannot cure it.  
In a certain consultation of physicians,  
they all differed about the nature of an  
intermittent, and all of them were ready  
to define the disorder. The patient was a  
king. At length an empiric, who had been  
called in, thus interposed: "Gentle-  
men, all seem to differ about the nature of  
an intermittent, permit me to explain it:  
an intermittent, gentlemen, in a disorder  
which I can cure, and which you cannot."

## BRIMSTONE.—A class of conceited, touchy people, who stop a newspaper on account of any petty paragraph, that dis- pleases them, are cleverly ridiculed by an exchange as follows. The paragraph should be kept before the people:

"A certain man hit his toe against a pebb-  
le stone and fell headlong to the ground.  
He was vexed, and under the influence of  
anger and active self-sufficiency, he kicked  
old mother earth right saucily. With im-  
perturbable gravity, he looked to see 'the  
vast globe itself dissolved, and come to  
nought. But the earth remained, and only  
his poor foot was injured in the encounter.  
This is the way of him. An article appears  
in the newspaper touching him in a weak  
place, and straight
