

THE NORTH CAROLINIAN

AGRICULTURE.

Written for the Wilmington Journal. WASHINGTON CITY, D. C., May 4.

MR EDITOR—During my journeying through Virginia and other Southern States, I have had opportunities for ascertaining the results of guano on different soils in various locations. It would seem that, to use guano now would not be an experiment, as in almost, indeed I may say in every county where is evinced a spirit of agricultural improvement, it has been tested, and unlike the "new broom" that loses its qualities by using, the longer it is used the more satisfactory are its results.

The high price at which it was held last fall, frightened some out of the use of it who were advocates for it, while others who paid \$60 per ton confidently believe the investment equal to 50 per cent.

Experiments have been made on most of the crops grown in the Eastern and Middle States. The better to test its utility on wheat, spaces have been left with no guano.

There is now no difficulty in ascertaining exactly where those spaces are, as the wheat that was guanoed is more luxuriant and much in advance of that on the spaces which exhibit but little verdure.

A few weeks since, in company with Ambrose Ford, of Cumberland county, Va., I visited a wheat field of his upon which an experiment as above had been made. The difference between the spaces and the guanoed wheat was very visible, sufficiently so to elicit the enquiry, why those barren places?

Mr Ford estimates the products of the guanoed wheat at 11 bushels, and the spaces at 5 bushels per acre.

Guano has been so extensively and thoroughly tested, that we may suppose its character as a fertilizer fully established and appreciated. And yet there are those who are skeptical on the subject, for whose benefit I give the results of a few of the experiments that have recently fallen under my observation.

Gen. Gordon, of Albemarle county, Va., last year tested its importance on corn by applying 200 lbs. per acre to 3 measured acres; another measured acre adjoining had none. The manner of cultivation was the same the field over.

Result: the one acre 7 1/2 bushels, the three acres 37 bushels per acre. Gain by the use of guano, 50 bushels of corn per acre.

The General also made an experiment on wheat last fall, which is worthy of note.

A portion of his field was nearly new, never having had but two crops in it; the balance was a field that, by bad culture, had become exhausted—Guano was applied upon the old ground—upon the new he supposed none was needed, but the wheat upon the old field evidences that a little guano applied to the new ground would have been profitable, as the guanoed promises a much larger harvest than the other.

Col. Andrew Joyner, near Weldon, N. C., has made a very successful experiment upon wheat. The portion guanoed is some weeks in advance of that not guanoed, and promises a much better yield.

Lewis Bailey, Fairfield county, Va., says guano increased his crop of corn and stalks last year three-fold more than fish-offals, which has been considered the best manure for corn within the farmer's reach.

Yours truly, A. SHERMAN.

LOVE OF LIFE.—What a native clinging of mankind to this poor life there must be, what an inextinguishable sweetness in the mere face of existence, or at least what a dread of the hour of dissolution, when millions of human beings, placed in circumstances which many of their fellow-creatures regard as infernally wretched, yet pursue their weary journey faithfully to its natural end, grudging to lose the smallest inch! Watch a poor old man in rags slowly dragging himself along in a mean street, as if every step were a pain. His life has been one of toil and hardship, and now he may be wifeless, friendless, and a beggar. What makes that man hold on any longer to existence at all? Is it any remnant of positive pleasure he still contrives to extract from it—the pleasure of talking twaddle to people who will listen to him, of looking about him at children playing, of peering into doors and entries as he passes; is it fear and a calculation of chances, or is it the mere imbecility of habit? Who can tell?—North British Review.

MOUNT VESUVIUS.—It is said that a project is on foot at Naples to extinguish the fires of Mount Vesuvius, that have been burning for thousands of years! The plan is to dig a trench or canal from the sea to the crater, the bottom of the grand one being several thousand feet below the level of the sea. The expense will not exceed \$2,000,000, and the lands thus to be reclaimed will be worth ten times that amount.—Mirror.

EMIGRATION TO LIBERIA.—The Maryland Colonization Journal confirms the rumors that have been in circulation of a large party of free colored persons in Baltimore making preparations to emigrate to Liberia on or about the 1st of July. The Rev. Jacob Moore, the founder, and for some years the pastor, of the colored Methodist Episcopal Church in Howard street, is the leader in the movement, which embraces twenty-five respectable and industrious families, numbering fully one hundred persons.—Baltimore Sun.

At Cincinnati on Friday last a carpenter named Ezra O'Hara was shot dead by a man named Warwick, from Lexington, (Kentucky). On the same day, Mrs. Manson, widow of the late Dr. Manson, entered the law office of John M. Wilson, and deliberately fired a double barreled pistol twice at him. The balls fortunately missed him. She fainted immediately afterwards, and was taken away insensible.

SAILING UNDER WATER.—The Paris Journal of Debates states that a new species of vessel destined it is expected to solve the great problem of sub-marine navigation, has been constructed in the establishment of M. Cressot. This vessel will proceed from Cressot's establishment, thro' Paris to Calais, by sea with the aid of its machinery, which is similar to that of propellers. In going out of the port of Calais it will plunge under water, and reappear a few hours afterwards before Dover. Thence it will gain the Thames, which it will ascend to London, where it will figure at the exhibition, among the most interesting productions of French industry and genius.

TO TELL THE NUMBER THAT ANY PERSON SHALL THINK OF.—Bid the party double the number which they have fixed on in their mind; which done, bid them multiply the amount by 5 and give the product (which they will never refuse to do, it being so far above the number thought), from which, if you cut off the last figure of the product (which will always be a cipher), the number left will be that first thought upon.

As for example, let the number thought on be 26, which doubled, make 52; that multiplied by 5, produce 260; then if you take away the cipher, which is in the last place, there will remain 26, the number thought on.

More persons fall out concerning the right road to heaven than ever get to the end of their journey.

IMPORTANT INVENTION.

THE subscriber having bought the right for this county, of Waitman Davis' Patent Self Setter for Saw Mills, gives notice that he is now prepared to Manufacture and put in successful operation such machinery.

It claims the following advantages over the old mode of Sawing: First—One hand can tend the mill and saw as much Lumber in one day as two hands can accomplish.

Second—By a peculiar arrangement of the dogs it will saw one fifth more Lumber from the same stock.

Third—The Mill is not stopped until the log is sawed up. After the log is once dogged dogs are not moved, and the Lumber is of one uniform thickness. One of these machines can be seen in operation at Mr. McLaughlin's Mill in this town, who gives it the following recommendation.

H. G. HALL, Fayetteville Foundry. A Model can be seen at the Fayetteville Foundry. March 15, 1851. 629-1f

I hereby certify that I have one of W. Davis' improvements on Saw Mills in use on my mill, and so well convinced am I of its utility, that in my opinion it requires only to be introduced to be put in general use by mill owners. I therefore cheerfully recommend its use to all Saw Mill owners who would regard their own interest.

PILOT MOUNTAIN. SUMMER RETREAT.

THIS GRAND CURIOSITY is situated in Surry county, two miles west of the Stokes and Surry line, and near the leading road from Germanton and Salem to Rockford, 12 miles from Germanton and 25 miles from Rockford.

The Pilot Mountain House, 11 miles from the pinnacle, has been newly fitted up for the approaching season, and no expense or attention will be spared to render enjoyment to visitors who may be pleased to seek health or pleasure at the Pilot Mountain.

One mile from the house is a fine mineral spring, and a good carriage road leading to it. The ascent to the pinnacle has been rendered perfect, safe, and comparatively easy, by ladders made for the purpose. The view from this point is the grandest spectacle in North Carolina, if not in the whole southern country, being a huge shaft run up 1500 feet into the blue ethereal arch, from a comparatively level surrounding surface, and embracing the Blue Ridge and Alleghany Mountains, from the peaks of Otto to the north 50 miles, to the Table Rock in South Carolina, 100 miles, including within the range Paris' Mountain, Spartanburg district, and both peaks of King's Mountain in York District.

The large number of visitors to this grand curiosity has greatly increased within a few years, and the subscriber can assure the public that all who come shall enjoy themselves so far as depends upon him. The number of visitors during the last season, as shown by the register, was between three and four hundred.

A good Guide to conduct visitors up the pinnacle, and to point out the different and distant objects, will always be in attendance.

Travellers passing over the Blue Ridge, by Mount Airy, will lose but little in time or distance, by calling at Pilot Mountain House. The purity of the air, the excellence of the water, and the beautiful scenery, never fails to invigorate the enervated and the invalid, and to make robust the man of health.

The plank road from Fayetteville west (now completed to Carthage) will go to Salem, within 25 miles of the mountain, and if extended, will probably go within a mile of the Sixty miles it will be completed this summer, bringing the traveller nearly half way to the mountain.

His prices are very moderate, as he wishes to encourage and induce the people of the State to visit this one of their grandest curiosities. W. GILLAM. Pilot Mountain, April 15, 1851. 635-4f
