NORTH CAROLINIAN. FAVETTEVILLE, N. C.

Prospective Power of the United States. Mr Webster, in his celebrated letter to Chevalier Hulseman, said that Austria, in comparison with the United States, in territorial extent and resources, was but a patch on the earth's surface. The total area of the United States and their territories, according to an authentic estimate, is three millions of square miles, while that of all the States of Europe is There are also a fine Saw and Grist Mill on this tract. all new and in excellent order; one Turpentine Distillery, with Cooper and Blacksmith Shops. The location is proverbially healthy, with a pleutiful Well of the very best water. The sucjety is also good waters of Drowning Creek, 33 miles from Provetteville and 2 miles from the Centre Plank Road and Denmark and 2 miles of Deep River. statesman's remark was true of Austria, it is

times as large as the Russian Empire in Europe -"one sixth less only than the area covered by the fifty-nine or sixty empires, states and repub-There is a new Cotton Gin on the premises, which lies of Europe; of equal extent with the whole commands a large custom. There are about 130 acres Russian empire, or that of Alexander, neither of which is said to have exceeded three millions of square miles."

> These are startling facts, when we consider the ratio at which the population of the United States is increasing. Already possessing more territory than any other country, our manifest destiny is to outstrip all others in inhabitants. One century ago, (in 1750,) the total population of the United States was 1,058,000. In 1850 it had reached 23,191,876-a growth unparalleled in the history of nations. The same ratio of increase for a half century to come will place the American Confederacy in advance of any other power in population; and in territorial extent, resources and wealth, Europe itself, in comparison, will be but a patch on the earth's surface.

> Americans do not of course know in what light the ruling powers of the old world look upon the young giant which has already attained such vast proportions, and whose future career promises such astonishing results. Were our government a monarchy they might view it with no other sensation than jealousy; but when they consider that it is a republic-when they ability of the people to rule has been practically tested-when they bear in mind that the American Union is the radius whence the light of liberty is to illumine the whole earth-they must, at least, cast their eyes westward with foreboding and alarm .- Detroit Free Press.

From the Richmond (Va.) Bulletin: CHARLOTTSVILLE IN COMMOTION !- We have learned that several University students were imprisoned in Charlottsville jail on the 17th instant. While present at Wyman's exhibition, they made rather more noise than was agreeable, when ten or fifteen policemen rushed in upon them, and a conflict ensued, in which both policemen and students were injured. The policemen finally succeeded in securing two of the students and confining them in jail. It is I have from 12 to 15 Coopers constantly at work stated that one of the policemen held one of the students, while another struck him, knocking him out of his senses, and a committee of sale, at \$2 25 cash at the shop, or \$2 35 delivered in students was appointed by those who witnessed the affair, to arouse the student to avenge themwill pay within 15 cents per barrel of the Fayetteville selves. The students needed no committee for the purpose. Nearly three hundred assembled and threatened to tear down the county jail-

and some wished to burn the town! Prof. Harrison, after considerable difficulty, succeeded in appeasing them long enough to listen to a proposition from him to the effect that the students should appoint himself with five or six students as a committee to meet the town authorities. On his return, he informed them that the jail was guarded by a body of 160 riflemen. At the mention of this, their indignation was aroused anew, and they clamored out-"to Charlottsville-march upon them," and their shouts, as is stated by an eye witness, might have been heard for a mile.

The committee, however, reasoned them into desisting from any attempt to rescue their mates until they were better prepared, and on the morning of the 19th, they met at the rotunda 800 Bags Peruvian Guano, daily expected, and for of the lawn in great numbers. There they resolved, instead of going down in a body, to appoint a committee to see that justice was done their companions-yet their feelings are, it is said, not of the most pacific character, and blood may yet be shed. We earnestly hope, for the sake of the University, as well as of the students themselves, that the affair will not come to this -and we are assured that the faculty will use every exertion to prevent such a result.

..... SHORT DIRECTION FOR PLANTING TREES .- Remove all bruised or injured roots, by cutting them from the under side with a sharp knife. Dig the holes at least twice as large as the roots extend, so as to allow them easy access in their starting to the loose earth, which should be finely pulverized . when, the hole is half filled

pour in a few gallons of water, which has a p

dency to settle the earth and fill up vacancies. Be careful to avoid lifting the tree up, while filling in, which tend to give the roots a vertical and unnatural position. Let the soil in contact with the roots be the surface soil first thrown out, or rich loam, obtained expressly, would be better. Leaf mould, from the woods, is excellent. Let no manure be put into the hole around the root, with is apt to induce de-The subscriber has received his entire stock of Fall cay. If any is applied let it be on the surface, and Winter Goods, consisting of a general assortment to be carried down by rains. The fall of the and tied up, to prevent being shaken or disturbed by the winds. After-culture and periodical judicious pruning are also important. As a general rule, orchards should be ploughed and cultivated to insure fine fruit and good crops. Where this is not practicable, trees should be ing round and kept free from grass and weeds. Avoid especially deep planting; when the earth ettles, the tree should be about the same depth

is before removal. Mulching all trees the first season they are ransplanted, by covering the ground around, wo three feet each way, with grass or coarse 1ay, litter, &c., is very important to secure uccess. It preserves an even temperature in he soil, keeps it damp, and prevents, to some xtent, damage from sudden changes of weatheg .- Norristoun Register.
