Advertising is conceded to be the most efficient promoter of business, and live men in thriving places do not fail to avail themselves of its advantages. Scarcely a day passes in which we do not hear persons complaining that they might have sold property higher, if such and such men had known it was in the market, and others that they would have given more, if the sale had been announced.

The California Pioneer.

Jean A. Sutter, in whose mill-race the first discovery of gold in California was made, is a Swiss by birth. He was Lieutenant in the Swiss Regiment of Charles X. and saw service at the Revolution of 1830, when he was wounded.

After the defeat and exile of his royal master, he came to this country, and first settled in Missouri, where he became naturalized. He then went to Oregon, across the plains, then to the Sandwich Islands, and thence, in 1836 to California, where he engaged in the mining business.

When he took himself to the vicinity of Marysville on Plume River, and called his new home Hoop Farm. There, with a competency, and joined by his wife and children, after twenty years' separation, he is leading a quiet, rural life.

We gather these particulars from a communication in a New York French paper, by a Pole, M. Holenski, who visited him a few years since. He found the "Old Captain," as Sutter is familiarly called, though less than fifty, and fresh and youthful in appearance, a very agreeable and talkative companion.

"No, sir," she answered; "our religion teaches us to avoid everything swinish, physically and morally; therefore, you will excuse me for declining to have any more words with you."
