The Island of Niphon, in which Single situated, was visited on the 23d December a severe earthquake, most disastrous in its factors. effects. The City of Ohossaca, one of the larger in the Empire, was completely laid waste. Yell itself suffered considerably, but has since suffered more seriously from the effects of an extensive conflagration. The town of Simoda on our arrival presented a complete scene of desolation and ruin. After the shock of the earth quarte the shore, and the receded with great rapidity and soon returned in the second to the depth of six or seven feet, sweeping away houses, bridges and temples, and piling them up in a mass of ruin. ffects. The frigate which was lost in the midst of this shocking catastrophe, had on board the Vice Admiral Putiatin, engaged at the time in completing the treaty between Russia and Japan. She was at anchor in the port of Simoda, From the moment of the first shock of earthquake the sea exhibited such a movement of eddying and whirling, that in less than thirty minutes the ship pirouetted round herself more than forty times, snapping and twisting all the chains holding her. The motion was so rapid that no one on board could keep on his legs, and all were seized with vertigo. When the sea retired, the frigate, which drew twenty-one feet of water, was left in eight feet of water only. On its return, the sea rose to the height of five fathoms above its ordinary level, and in again retiring it left the frigate in less than four feet of water, so that the anchor stocks were visible. The agitation of the bottom of the sea was so great at the time, that the Diana, though only in four feet of water, was borne to a great distance. The officers believed that the port was bout to become the mouth of a submarine to be a great distance. we have alroady had intelligence of the great earthquake which occurred in the island of Niphon on the 23d of December, whereby the towns of Ohossaca and Simoda were destroyed, and Jeddo much injured, and the Russian frigate Diana lost. We find in the Courier du Havre the following details of the event:

As we have already informed our readers, an earthquake of the most violent kind has taken place at Japan, and among other misfortunes has occasioned the loss of the Russian frigate Diana. The American studier Powhatan, which was in the same vicinity, and which saved many of the shipwrecked mariners, has prepared an account of its voyage from Johan to Shanghac, from which the Novela and Mariner and Russian loss is supposed to be very great.
